## Harper's New Classical Library.

The want of a Series of LITERAL TRANSLATIONS of the Greek and Latin authors who are usually studied in the American course of Academic education, has been long felt by the most intelligent and assiduous classical teachers. That they are capable of being abused by the indolent and unfaithful pupil is no plea against their utility when employed in their legitimate place. A translation of an ancient writer into English, as perfectly literal as is permitted by the idioms of the respective languages, affords an invaluable aid to the instructor in the accomplishment of his arduous task. If executed with fidelity and skill, it saves much time and labor in the consultation of dictionaries, and embodies the best results of philological acumen and research in the shortest possible space. Pages of learned commentary are thus concentrated in the rendering of a single word.

The works which it is proposed to issue are reprints from "BOHN'S CLASSICAL LIBRARY," brought out uniform with the English edition, and comprising faithful translations of the principal Greek and Latin classics.

Each work will be given without abridgment, and will include short suggestive notes, adapted to the comprehension as well as the actual wants of the student. Copious and accurate indices will be appended to every translation. No version will be adopted without ample and thorough revision, correcting its errors by the lights of modern research, and placing it on a level with the present improved state of philological learning.

This NEW CLASSICAL LIBRARY has received a cordial welcome from the whole corps of American classical teachers. The important uses of such a work in their daily avocations are too obvious to require discussion. Nor is the interest of the series confined to teachers by profession. Every reading man, though destitute of a knowledge of the ancient languages, feels a laudable curiosity to form an acquaintance with the incomparable models of literary art which they have preserved. In the literal translations with which he is furnished by the present series, he will find the information that he seeks, enabling him to comprehend current classical allusions with facility, to become familiar with the true spirit of the ancients, and to share in conversation and studies which presuppose a knowledge of Greek and Roman antiquity.

The following volumes are now ready. Portraits. 12mo, Muslin, 75 cents each.

## Harper's Statistical Gazetteer of the World,

particularly describing the United States of America, Canada, New Brunswick, and Nova Scotia. By J. CALVIN SMITH. Illustrated by Seven Maps. Complete in one Volume, Royal 8vo, Muslin, \$5 00; Sheep extra, \$5 75; Half Morocco, \$6 00; Half Russia, \$7 50.

The general reader, the student, the merchant, and the artizan, will find in this work all the information adapted to their special requirements, brought down, as nearly as possible, to the present day, in a form more commodious and accessible than in any other work of similar character which has ever been offered to the public. The late censuses of the United States of America, Canada, New Brunswick, and Nova Scotia, and the returns of Mexico, the States of Central America, South America, Great Britain, and the countries of Continental Europe, and many elaborate and complete works upon Statistics and Geography, and various special branches of science, have been laboriously consulted in the preparation of the present work, and the information contained in them has been arranged and classified in such a manner as to be really available to the inquirer.

## Harper's School History.

Narrative of the General Course of History, from the earliest Periods to the Establishment of the American Constitution. Prepared with Questions for the use of Schools, and illustrated with 150 Maps and Engravings. Square 12mo, Muslin, \$1 25; Sheep, \$1 38.

This work is intended as a complete text-book of general history for the use of schools. It does not consist, as is often the case with books of this class, of a condensed summary of names, dates, and detached chronological events, but presents in a simple and connected narrative, a general view of the great leading events that have occurred in the history of the world, beginning at the earliest periods and coming down through the Assyrian, Persian, Grecian, Roman, and British empires, to the organization of the American Republic, and the establishment of the American Constitution. It is intended for Americans, and the narrative consequently follows the line which leads to, and is most directly connected with, the events of our own history. The work is fully illustrated with maps and engravings, and is prepared with questions on a new and very convenient plan for the use of teachers.

## Hildreth's History of the United States.

FIRST SERIES.—From the First Settlement of the Country to the Adoption of the Federal Constitution. 3 vols. 8vo, Muslin, \$6 00; Sheep extra, \$6 75; Half Calf, \$9 00.

SECOND SERIES.—From the Adoption of the Federal Constitution to the End of the Sixteenth Congress. 3 vols. 8vo, Muslin, \$6 00; Sheep extra, \$6 75; Half Calf, \$9 00.

This work, by common consent of the most competent judges, has attained the rank of a standard authority on the subject of American history. In a terse, compact, and highly perspicuous narrative, the writer traces the progress and workings of American institutions until the close of the administration of President Monroe. The course of legislation since the establishment of our National Independence is minutely described, receiving from the hands of the author, the degree of attention which its importance demands. In relating the early settlement of the Colonies and the events of the Revolutionary struggle, he crowds a great amount of matter into a narrow compass, leaving no important incident untouched, but never tempted by the interest of the theme into an unnecessary diffuseness. The work is especially valuable as a book of reference, a manual for instruction in American history. In no other way can the student of our annals find such a clear, precise, and copious statement of events, as by consulting these volumes. The accuracy of their details, the acuteness and sobriety of their comments, and the masculine vigor and naturalness of their style, make them equally indispensable to the statesman, the politician, the man of letters, and the general reader.

## Hildreth's Theory of Politics.

A discussion of the foundation of governments, and the causes of political Revolutions.

## Motley's Dutch Republic.

The Rise of the Dutch Republic. A History. By JOHN LOTHROP MOTLEY. With a Portrait of William of Orange. 3 vols. 8vo, Muslin, 6 00; Sheep, \$6 75; Half Calf, \$9 00.

In this valuable contribution to historical literature, by an American writer, we have a parallel to the masterly productions which have given such an enviable celebrity to the names of Irving, Prescott, Bancroft, and Hildreth in a similar department of composition. It embraces the period from the abdication of Charles V., in 1555, to the death of William the Silent, Prince of Orange, in 1584. The memorable conflict between the feudal institutions of the Middle Ages and the dawning light of modern liberty; between the most malignant form of religious bigotry, and the infant genius of toleration; between the arrogant claims of monarchical prescription and the timid aspiration of universal justice, is portrayed by Mr. Motley in vivid colors, and with enthusiastic sympathy in the cause of human progress. The foreground of the picture is occupied by that admirable specimen of patriotism and nobleness of character, William the Silent, whose eminent virtues belong to the same class of excellence as those which have since commanded the homage of the world in the person of Washington. The scene is crowded with significant and impressive events, connected with the development of political and religious freedom. Mr. Motley has produced a vigorous narrative, worthy of the great historical themes to which it is devoted. In beauty and animation of style, picturesque variety of grouping, and dramatic exhibition of character, his work is not surpassed by any of the classic historical productions which are among the most remarkable literary features of the age.

## Bancroft's Miscellanies.

The volume embraces a series of compositions that spread over an interval of more than thirty-five years. The intrinsic value of its contents will make it welcome to all intelligent readers, while the lovers of literary history will follow, with curious interest, the course of study and of thought which has ripened into such a pure and exalted fame.

## Curtis's History of the Constitution.

History of the Origin, Formation, and Adoption of the Constitution of the United States. By GEORGE TICKNOR CURTIS. Complete in two large and handsome Octavo Volumes. Muslin, \$4 00; Law Sheep, \$5 50; Half Calf, \$6 00.

This work, by an accomplished scholar, supplies a want which has never been adequately met in the historical literature of the country. It embraces the period from the commencement of the Revolution to the assembling of the Convention of 1787, showing the causes which rendered the calling of that body inevitable, and which gave the shape and coloring to its decisions; explaining the foundations on which our national liberty and prosperity were then settled by the statesmen to whom the American Revolution gave birth; and presenting a series of graphic memoirs of the principal members of the Convention. In preparing this great national work, Mr. Curtis enjoyed the encouragement and counsels of Daniel Webster, who took the liveliest interest in its completion, and urged its importance almost in the last days of his life. Written in a condensed and vigorous style, founded on accurate and persevering historical research, crowding a lively narrative with novel incidents and events, and presenting the characters of the illustrious framers of the Constitution in bold and discriminating portraits, this highly important work is adapted to occupy a distinguished place in the records of American history. It is an accession of sterling merit to our Revolutionary annals, and can not fail to challenge the attention and admiration of our statesmen, scholars, and politicians, no less than the great body of the American people.

## Ticknor's History of Spanish Literature.

With Criticisms on the particular Works, and Biographical Notices of prominent Writers. 3 vols. 8vo, Muslin, \$6 00; Sheep extra, \$6 75; Half, \$9 00.

The author of this standard historical work has devoted the studies and labors of nearly a lifetime to its preparation. In point of comprehensiveness of plan, richness of information, sagacity of criticism, and thoroughness of execution, it may claim pre-eminence over any similar production in the English language; and it is certainly not surpassed by the most celebrated master-pieces of its kind in Continental literature. It gives a complete survey of the origin and development of Spanish literature, traces the progress of intellectual culture in that nation, presents copious biographical sketches of her great authors, with genial comments on their writings, and furnishes a variety of translations from the most celebrated poets. The style of the work is refined and classical, finished with exquisite propriety, and abounding in those subtle graces of expression, which distinguish the pen of the mature scholar. No work issued from the American press has received warmer commendation from European critics, or has done more to diffuse and elevate the fame of our native literature.

Mr. Sparks's labors can not be too highly estimated. His researches have been prosecuted with untiring diligence, and with such success that almost every question within their scope has been definitively settled. The great merits of Mr. Sparks are reverence for truth, soundness of judgment in regard to evidence, and exhausting fullness of detail and illustration.—*Griswold's Prose Writers.*

## Judge Story on the Constitution of the U. S.

A familiar Exposition of the Constitution of the United States. Designed for the use of School Libraries and General Readers. With an Appendix, containing important Public Documents illustrative of the Constitution. By Judge STORY. 12mo, Muslin, 75 cents; Half Calf, \$1 60.

A book of great interest to the student of history as well as to the lawyer. With vast learning, strong sense, great industry, reasoning powers of a high order, and accurate taste, his memory is said to have been so retentive that a single and hasty reading was quite sufficient to make him familiar with almost any author. Perhaps none of the distinguished jurists of his day could be compared with him for extent of acquisition.—*Prose Writers of America.*

## Maury's Geography of the Sea.

The Physical Geography of the Sea. By M. F. MAURY, LL.D., Lieut. U. S. Navy. With Wood-cuts and Charts. New Edition, greatly enlarged and improved. 8vo, Muslin, \$1 50; Half Calf, \$2 50.

A philosophical account of the winds and currents of the ocean—of its depth and temperature, of the wonders that are hidden in its bosom, and of the phenomena that are exhibited at its surface. The economy of the sea and its adaptations, its salts, its waters, its inhabitants—also pertain to the subject, and are amply treated in the present volume. The discussion, it will be perceived, is of a unique character, and opens details that are rarely touched in the records of science. In the hands of Lieutenant Maury it assumes a popular interest, no less than scientific importance. His descriptions of the phenomena of the Gulf Stream, of the currents of the sea, and other cognate topics, are singularly graphic in their style, besides containing a rich fund of curious and valuable information. It is rarely that a treatise on any branch of physical science is so attractive in its details or so fruitful in its instructions as this volume. The work has elicited universal interest and admiration both in America and Europe.

## Brodhead's History of New York.

In this elaborate volume, Mr. Brodhead has supplied the want of a thorough history of New York, with a completeness and accuracy of research, a genuine historical acumen, and a lucidity and vigor of style which at once elevate his work to the rank of a standard and classical authority on the subject. Mr. Brodhead has investigated the subject, to a great extent, by the aid of original materials. His pages not only bear the marks of extensive research, but of conscientious impartiality, excellent judgment, and refined and liberal scholarship.

LOSSING. 2 vols. 8vo, Muslin, \$8 00; Sheep extra, \$9 00; Half Calf, \$10 00; Morocco, gilt edges, \$15 00. *Sold only by Agents.*

A new and carefully revised edition of this magnificent work is just completed in two imperial octavo volumes of equal size, containing 1500 pages and 1100 engravings. As the plan, scope, and beauty of the work were originally developed, eminent literary men, and the leading presses of the United States and Great Britain, pronounced it one of the most valuable historical productions ever issued in America. The prime object of the author in arranging his plan was to reproduce the history of the American Revolution in such an attractive manner, as to entice his countrymen to read the wonderful story, study its philosophy and teachings, and to become familiar with the founders of our Republic and the value of their labors. In this he has been eminently successful; the pages of the *Field-Book* are read with the same avidity as those of a romance.

Its exquisite illustrations have a lasting and intrinsic value as delineations of fact. An analysis shows that these illustrations exhibit 245 portraits, 475 autographs of eminent men, 182 celebrated buildings, 62 maps and plans of battles, fortifications, &c., 46 views of battle-grounds, 102 views of other historical localities, 96 sketches of curious historical objects, 26 fac similes of manuscripts, 27 medals, seals, &c., 46 views of fortifications, sketches of 12 remarkable trees, 76 monuments, 24 old churches, 6 statues, 75 appropriate initial letters, and about a dozen miscellaneous fancy sketches. There are in all 1100 engravings, including 1500 distinct illustrations of objects described in the text.

A very elaborate Analytical and Chronological Index has been prepared for each volume, by the late Rev. Dr. SHROEDER, which enables the student to readily find any name, event, locality, or fact mentioned in the war.

For public and private libraries, for constant reference in families, and as a reading-book in households and schools, it has no superior among the many books offered to the public. Explanatory notes are profusely given upon every page in the volumes, and also a brief biographical sketch of every man distinguished in the events of the Revolution, the history of whose life is known. The Supplement of forty pages contains a History of the *Naval Operations of the Revolution*; of the *Diplomacy*; of the *Confederation and Federal Constitution*; the *Prisons and Prison-ships of New York*; *Lives of the Signers of the Declaration of Independence*, and other matters of curious interest to the student of our history. As a whole, it contains all the essential facts of the early history of our Republic, which are scattered through scores of volumes, often inaccessible to the great mass of readers. It forms a complete *Guide-book* to the tourist seeking for fields consecrated by patriotism, which lie scattered over our broad land.

Nothing has been spared to make this great National Work complete, reliable, and eminently useful to all classes of citizens. Upward of \$40,000 have been expended in its publication. The publishers take great pleasure in presenting these volumes as the best specimen of typography ever issued from the American press.

## Stephens's Travels in Central America.

Travels in Central America, Chiapas, and Yucatan. By J. L. STEPHENS. With a Map and 88 Engravings. 2 vols. 8vo, Muslin, \$5 00; Half Calf, \$7 00.

We close this book with regret. From the first page to the last the animation, the characteristic energy, the buoyant spirit of the author remained undiminished. Our extracts might have been thrice trebled, and yet left the volumes rich in important and original matter. The political details, for instance, from which we have systematically abstained, would in themselves be sufficient to render the work one of high interest and permanent value. Let our friends of the New World send out half a dozen such travelers as Mr. Stephens, and we predict that the records of their wanderings, discoveries, and adventures will do more to elevate the literary character of America than the angry philippics of all the reviewers and newspapers throughout the Union, backed though they may be by an entire phalanx of servile echoes in England.—*London Quarterly Review*.

## Stephens's Travels in Yucatan.

Incidents of Travel in Yucatan. By J. L. STEPHENS. 120 Engravings, from Drawings by F. CATHERWOOD. 2 vols. 8vo, Muslin, \$5 00; Half Calf, \$7 00.

At once so amusing in their details and so instructive in their inquiries.—*Literary Gazette*.

These delightful volumes! It is grievous to quit a store so brimful to overflowing of what we like best.—*Athenæum*.

The pleasantest and best work that has lately appeared.—*Spectator*.

## Stephens's Travels in Greece.

Travels in Greece, Turkey, Russia, and Poland. By J. L. STEPHENS. Engravings. 2 vols. 12mo, Muslin, \$1 75; Half Calf, \$3 45.

Very pleasant volumes. Such, indeed, is the spirit of the author's descriptions, and the vivid force and truth of his narrative, that reading his work is like accompanying him on his route, and the reader grows at last to take a personal interest in all his adventures.—*Athenæum*.

## Stephens's Travels in Egypt.

Travels in Egypt, Arabia Petræa, and the Holy Land. By J. L. STEPHENS. Engravings. 2 vols. 12mo, Muslin, \$1 75; Half Calf, \$3 45.

One of the most brilliant and fascinating books of travel ever published. The account of the visit to the city of Petræa, which is excavated in the solid rock, and had not before been visited for centuries by any European traveler, is most deeply interesting.

## Tacitus, Literally Translated.

Tacitus. The Works of Tacitus. The Oxford Translation, Revised. With Notes. Vol. I. The Annals. Vol. II. The History, Germany, Agricola, and Dialogues on Orators. 2 vols. 12mo, Muslin, \$1 50; Half Calf, \$3 20.

## Goodrich's British Eloquence.

Select British Eloquence; embracing the best Speeches entire of the most eminent Orators of Great Britain for the last two Centuries; with Sketches of their Lives, an Estimate of their Genius, and Notes, Critical and Explanatory. By CHAUNCEY A. GOODRICH, D.D., Professor in Yale College. 8vo, Muslin, \$3 50; Sheep extra, \$3 75; Half Calf, \$4 50.

In this carefully prepared volume, we have an important contribution to rhetorical literature. Containing the speeches of the great British orators, which are regarded as the master-pieces of their respective authors; a memoir of each orator, showing the leading events of his public life, and the distinctive characteristics of his oratory; an historical introduction to each of the speeches, explaining the circumstances of the case; the state of parties and the exact point at issue; an analysis of the longer speeches in side notes; and a large body of critical and explanatory notes, together with translations of the passages quoted from foreign languages; it leaves nothing to be desired as a text-book of the political and forensic eloquence of Great Britain. The copious and valuable memoirs and notices by the editor make this less a compilation than an original work. The manner in which he has performed his task is a model of accurate and thorough editorship. He has omitted nothing which the most exacting student could demand for the elucidation of the subject in hand, without ever being tempted to indulge in superfluous details. A great mass of attractive information is thus presented, and in a style of singular clearness, strength, and elegance. It is rarely that so much profound scholarship, sound judgment, refined taste, and vigorous expression are devoted to the critical preparation for the press of the standard productions of other writers.

## Dr. Sanger's History of Prostitution.

The History of Prostitution: its Extent, Causes, and Effects throughout the World. (Being an Official Report to the Board of Alms-House Governors of the City of New York.) By WILLIAM W. SANGER, M.D., Resident Physician, Blackwell's Island, New York City; Member of the American Association for the Advancement of Science; late one of the Physicians to the Marine Hospital, Quarantine, New York, &c., &c., &c. 8vo, Muslin, \$3 00.

This important work is the first serious attempt that has ever been made to collect into one volume all the facts respecting the great social evil, Prostitution. It contains a brief summary of all the facts and statistics given in the famous work of Parent Duchatelet, and in the more recent works by various authors on Prostitution in England, Germany, &c. The subject of Prostitution in the United States is most thoroughly treated, with copious statistics from the Police records and other authentic sources of information. Dr. Sanger's official experience and the opportunities opened to him by the Governors of the Alms-House, have undoubtedly enabled him to produce a work that will necessarily become the text-book on this painful but vitally important subject, and which, as such, must form part of the library of every magistrate, physician, and philanthropist, not only in this country but throughout the civilized world.—*N. Y. Observer.*

It is a book that every magistrate, every professional man, and, indeed, most adult citizens should read. The enormous evil must be grappled with, and an able, scientific work upon it, like the present, is necessary in order that it may be intelligently treated.—*N. Y. Christian Advocate and Journal.*

These valuable Commentaries combine a just proportion of the devotional with the critical. The first rank among Biblical critics has been assigned to Albert Barnes. His fame has become European. "I know of no Commentary," says the Rev. Dr. Cumming, of England, "so succinct, full, and impartial. It is fitted to instruct the preacher no less than the Sunday-school teacher. It seems to be his grand effort to unveil solely what 'the Spirit saith to the churches.' I venture to predict that his faithful and lucid comments will find a response in the minds, hearts, and consciences of most Christian readers."

SQUIER, formerly Chargé d'Affaires of the United States to the Republics of Central America. With Numerous Original Maps and Illustrations. A New and Enlarged Edition. 8vo, Muslin, \$3 00.

Mr. Squier has all the requisites for his undertaking. He has resided in the country for a considerable period in a distinguished position, and he has traversed it in all directions. Of a high and bold spirit, a clear-sighted observer, and indefatigable even among those transatlantic Anglo-Saxons whom nothing tires, he is at once historian, geographer, archeologist, naturalist, political economist, politician, man of business, negociator, mineralogist, physiologist; when necessary he is even an engineer. He presents, in fact, a fine specimen of the most remarkable type of the North American, one who is fit for every thing, uniting flexibility of mind with force of will. Under these circumstances, Mr. Squier has been enabled to present us with a most interesting picture of Central America, in which he displays its various resources, astonishing in their variety. —MICHEL CHEVALIER, in *Journal des Debats*.

This is a narrative of adventure on that part of the Eastern coast of Central America known as the "Mosquito Shore." It presents an animated and lively picture of the character and habits of the people and scenery of that coast, which lately had been invested with much interest on account of the pretensions set up there by Great Britain, and strenuously denied by the United States. A rapid sketch of the relations of the two countries is given in the Appendix. The artist has enriched and illustrated his descriptions with striking and characteristic sketches of scenery and incidents.

By GEORGE WILLIAM CURTIS. 12mo, Muslin, \$1 00; Half Calf, \$1 85.

In this brilliant volume of Eastern travels, the genius of the youthful author, who has since attained such eminent distinction, was first revealed to the literary public. Written in a style which combines the voluptuous softness of an Oriental atmosphere with the sunny splendors of the tropics, it at once marked the writer as a new star in American literature. He takes the reader with him into rare and beautiful scenes of nature, unfolds the mysteries of Arabian life, and reproduces the strange incidents of a unique tour in language of wonderful vividness and force.

## Lotus-Eating.

A Summer Book. By GEORGE WILLIAM CURTIS. Beautifully Illustrated from Designs by Kensett. 12mo, Muslin, 75 cents; Half Calf, \$1 60.

This delightful volume is a record of the summer rambles of the author, touching gracefully on many of the most interesting spots in American scenery, and giving a series of lively pictures of the celebrated places of fashionable resort. Humor, pathos, and sentiment are generally blended in its pages, its reflections are always suggestive, its narratives never pall upon the taste, its brilliant word-painting is relieved by an undercurrent of genuine feeling, and its fresh and glowing descriptions give a new charm to familiar objects.

## The Potiphar Papers.

By GEORGE WILLIAM CURTIS. Illustrated from Drawings by HOPPIN. 12mo, Muslin, \$1 00; Half Calf, \$1 85.

These papers made the reputation of the periodical in which they were first given to the world. They were hailed with the liveliest delight by the American reading world, who acknowledge in their anonymous author a new star in their literary firmament. As graphic and telling descriptions of a peculiar phase of American society they are unexcelled; the fresh and sparkling wit, the genial humor, and keen and truthful satire with which "our Best Society" is dissected, have delighted thousands, and made "Mrs. Potiphar" a proverb. Hoppin's pencil has ably aided the pen of the Howadji in these collected sketches.

## Prue and I.

By GEORGE WILLIAM CURTIS. 12mo, Muslin, \$1 00; Half Calf, \$1 85.

In the character and fancies of an old bookkeeper, "who wears a white cravat and black trowsers in the morning, who rarely goes to the opera, and never dines out," the author of these charming essays has embodied the sweetest and most genial humor which has graced English literature since the delightful Essays of Elia. "Prue and I" is a book for the fireside, for a leisure hour, or for a summer day.

## Herman Melville's Works.

The new path struck out by Melville in *Typee* and *Omoo* has led to a wide and brilliant fame in a short space of time. Few of the younger American authors are more extensively read or more universally admired. His pictures of primitive social life in the islands of the South Sea possess an irresistible charm. The works devoted to this subject are redolent of the spicy fragrance of the native forests, and glow with the splendid lights of a tropical sky. In his other productions, comic humor is admirably blended with powerful description, grave reflection, and exciting narrative. Surpassed in originality by no recent writer in literature, his works form an epoch in its progress, and are indispensable in every library.

Judge Longstreet, its accomplished author, has placed himself among the classics of his department. One of the most laughter-moving volumes extant."

## Miss Sedgwick's Works.

Miss Sedgwick has marked individuality; she writes with a higher aim than merely to amuse. Indeed, the rare endowments of her mind depend in an unusual degree upon the moral qualities with which they are united for their value. Animated by a cheerful philosophy, and anxious to pour its sunshine into every place where there is lurking care or suffering, she selects for illustration the scenes of every-day experience, paints them with exact fidelity, and seeks to diffuse over the mind a delicious serenity, and in the heart kind feelings and sympathies, and wise ambition and steady hope. Her style is colloquial, picturesque, and marked by a facile grace, which is evidently a gift of nature. Her characters are nicely drawn and delicately contrasted; her delineation of manners decidedly the best that have appeared.—*Prose Writers of America.*

## Memoir of Joseph Curtis.

A Model Man. By CATHARINE M. SEDGWICK. 16mo, Muslin, 50 cents.

Joseph Curtis was a merchant and a philanthropist. In the course of an unobtrusive and laborious business life of over fifty years, he proved how very much practical good can be accomplished in any society by a man of small means, but large and active faith. As the leader of the Manumission movement in New York, the originator and first superintendent of the Juvenile House of Refuge, and as a most active and practical member of the School Board, his name will live in the memories of the citizens of New York. As a careful, kind, and loving father, his life is a model for all. Miss Sedgwick's memoir is a plain statement of facts, without eulogy other than that contained in the facts themselves. Mr. Curtis's career is a model for the youth of our land.

## Married or Single?

A Novel. By CATHARINE M. SEDGWICK. 2 vols. 12mo, Muslin, \$1 75.

"In this book Miss Sedgwick has entered New York society, and selected her people as her actors. Without caricaturing, every person is drawn from life, with all the follies and all the virtues that make up a frequenter of New York circles. It is a simple, yet an absorbing story of modern life. In its progress, married life is laid bare of all its concealments, and the contrast with singleness of heart and life is made plain. The pains, trials, troubles, sorrows, and agonies resulting from marriage are among the prominent incidents of the history; yet the moral can scarcely be said to be in favor of single life."

## Hope Leslie.

A Novel. By CATHARINE M. SEDGWICK. 2 vols. 12mo, Muslin, \$1 25.

Miss Sedgwick occupies a high position in America, not merely as an ornament of its world of light literature, but as a moral teacher.

The book abounds with generous and true sentiments, and those simple and reconciling truths which we are so apt to lose sight of in this bustling, work-day world; and all conveyed, too, in that same elegant form which marks all of Mrs. Sigourney's writings.—*N. Her poetry is characterized by ease, tenderness, a chastened fancy, and a delicate sensibility of whatever is beautiful in nature or charming in truth. It may be described in one word, as the poetry of refined religious emotion.—*Chambers.*

Illustrated with more than 200 Portraits, engraved by BENSON J. LOSSING. 8vo, Muslin, \$3 50 ; Sheep, \$4 00 ; Half Calf, \$4 50 ; Full Turkey Morocco, \$7 50.

Many years have been devoted to the preparation of this comprehensive work, which contains complete and accurate sketches of the most distinguished women in all ages, and, in extent and thoroughness, far surpasses every previous biographical collection with a similar aim. Mrs. Hale has ransacked the treasures of history for information in regard to the eminent women whom it commemorates; few, if any, important names are omitted in her volumes, while the living celebrities of the day are portrayed with justness and delicacy. The picture of woman's life, as it has been developed from the time of the earliest traditions to the present date, is here displayed in vivid and impressive colors, and with a living sympathy which could flow only from a feminine pen. A judicious selection from the writings of women who have obtained distinction in the walks of literature is presented, affording an opportunity for comparing the noblest productions of the female mind, and embracing many exquisite gems of fancy and feeling. The biographies are illustrated by a series of engravings, which form a gallery of portraits of curious interest to the amateur, as well as of great historical value.

## Miss Beecher's Letters to the People.

Letters to the People on Health and Happiness. By Miss CATHARINE E. BEECHER. 16mo, Paper, 37½ cents; Muslin, 50 cents.

This work assumes that the American people are now pursuing a course in their own habits and practices that is destructive to health and happiness, and that they are systematically educating their children to become diseased, deformed, and miserable, as much so as if it was their deliberate aim. The work points out the methods by which this is pursued, gives statistics to show the shocking results, and then points out the remedies for the evils already done, and the methods of prevention for the future.

**Hilliard's Speeches and Addresses.**

Speeches and Addresses. By HENRY W. HILLIARD. 8vo, Muslin, \$1 75; Half Calf, \$2 75.

The greater portion of this volume consists of speeches delivered in the United States House of Representatives, of which the author was a member during a most critical and eventful period. They are devoted to the discussion of the most important questions which have ever agitated the country; prominent among which are the sub-treasury scheme, the Mexican war, the peace which concluded this war, the form of government to be adopted for the newly-acquired territory, and the political aspects of the question of slavery. These are discussed in the light of principles of universal application, rather than on mere temporary and party grounds. The addresses of a literary character which are appended show that, in entering the stormy arena of politics, Mr. Hilliard has not neglected the pursuits of the accomplished scholar and thoughtful philosopher.

## Men and Things in Europe.

Men and Things as I saw them in Europe. By KIRWAN. 12mo, Muslin, 75 cents.

A lively and interesting work of travels, written in a vigorous and attractive style, which is quite sure to secure readers where an ordinary tourist would fail to get attention. The author is an accurate and close observer, and his volume furnishes evidence that he knows what to observe and what will be likely to prove interesting to the general reader. It is not like an ordinary "book of travels."

## American Principles on National Prosperity.

A Thanksgiving Sermon preached in the First Presbyterian Church, Elizabethtown, November 23, 1854. By KIRWAN. 8vo. Paper, 10 cents.

## Parish and Other Pencilings.

By KIRWAN. 12mo, Muslin, 75 cents.

The effective pen of the famous anti-Catholic polemic is every where to be recognized in this racy volume. A large portion of the work is devoted to familiar narratives, illustrating the leading truths of religion by examples drawn from real life. The writings of Kirwan have already gained an extensive popularity, and must always command the attention of the public by their vehement expression of opinion, their glowing religious spirit, and their robust natural eloquence.

## The Happy Home.

By KIRWAN. 16mo, Muslin, 50 cents.

This volume treats at length of the moral training which is essential to the young, and of the religious culture without which no ethical inculcations possess vitality. These important themes are discussed in a tone of earnest appeal, and illustrated by a great variety of incidents drawn from the experience of real life.

## Kendall's Santa Fe Expedition.

Narrative of the Texan Santa Fé Expedition: comprising a Description of a Tour through Texas, and across the great South-western Prairies, the Comanche and Caygüa Hunting-grounds, &c. By G. W. KENDALL. New Edition. With a Map and Illustrations. 2 vols. 12mo, Muslin, \$2 50.

It has seldom fallen to our lot to read so interesting and touching a narrative of travel as abound in these volumes; we were not prepared to find in them reading so very attractive, nor could we form any idea that such a narrative of toils and sufferings as are here detailed by the sufferer himself would probably present so many points of instruction to the general reader.—*Methodist Quarterly Review*.

## Boat Life in Egypt.

Boat Life in Egypt and Nubia. By WM. C. PRIME. Illustrations. 12mo, Muslin, \$1 25; Half Calf, \$2 10.

A volume of travel which deals in no dry description, but is full of the spirit of travel incident. Arabs and sunlight, ruins and moonlight, a chibouk with Abd-el-Kader Bey, and a solitary night with a dead sailor on the deck of a Nile boat, a seat in the lap of Memnon, and a seat in the bazaar on the shop front of Suleiman the merchant—these and a hundred other scenes of the traveler's experience appear on the pages which, at the same time, give clear, reliable, and valuable accounts of Ancient and Modern Egypt—all these make it the most thorough and complete work on Egypt now extant. The Appendix contains full advice to travelers about to visit Egypt, and also a history and explanation of the hieroglyphics, which is not contained in any other work. Mr. Prime's own excavations and explorations, especially in the catacombs at Alexandria, and the crocodile pits at Maabdeh, are among the most interesting and valuable parts of the book.

## Tent Life in the Holy Land.

By WM. C. PRIME. Illustrations. 12mo, Muslin, \$1 25; Half Calf, \$2 10.

Mr. Prime went from Egypt to the Holy Land. This book contains the sketches of horseback travels up and down the holy hills. Traveling in the most comfortable style, with a lady, surrounded by Bedouin and Egyptian attendants, he loitered through the sacred scenes, describing them while he describes his own adventures. Ladies will learn from this book and *Boat Life in Egypt* what incidents they may anticipate, if they have courage to undertake the journey. Mr. and Mrs. Prime visited Hebron, entered the Mosque of Machpelah; at Jerusalem they passed a day in the Mosque of Omar, and in various parts of the Holy Land they succeeded in visiting many places hitherto unseen by travelers. The book is enriched with a thorough history of the Holy Sepulchre and the Holy Cross. It contains a remarkable account of the English Princess who married a Bedouin at Palmyra, whose residence they visited. As a guide-book, and as a readable account of travel and adventure in the Holy Land, it has no equal.

## The Old House by the River.

By WM. C. PRIME. 12mo, Muslin, \$1 00; Half Calf, \$1 85.

This work consists of a series of highly agreeable sketches illustrating the oddities and delights of American life amid rural scenes and summer pastimes. The sketches are all conceived from the stand-point of an introverted mind, tenacious of old fancies and affections. The object of the book is clearly to excite attention toward the past and its attachments. There is a freshness and beauty in the details that come from the heart and reach the heart of the reader.

## Later Years.

By WM. C. PRIME. 12mo, Muslin, \$1 00; Half Calf, \$1 85.

"*Later Years*," like "*The Old House by the River*," consists of sketches, legends, descriptive essays, and the like. It is distinguished by the same sweetness and pathos of sentiment, the same picturesqueness and vigor of description, and the same graceful flow of diction, which have won such a flattering welcome to former productions of the author. He has made his place good among our most natural and forcible writers on rural scenes, and the present work will enhance his enviable reputation. Though selecting prose for his medium of expression, he has the eye and heart of a poet, and his words will always find an echo among readers of a poetical temperament.

## Dr. Prime's Travels in Europe and the East.

Travels in Europe and the East. A Year in England, Scotland, Ireland, Wales, France, Belgium, Holland, Germany, Austria, Italy, Greece, Turkey, Syria, Palestine, and Egypt. By Rev. SAMUEL IRENÆUS PRIME, D.D. Engravings. 2 vols. Large 12mo, Muslin, \$2 00; Half Calf, \$3 70.

These volumes are the records of a year of travel in some of the most interesting parts of the world—Europe, Asia, and Africa—by a writer whose sparkling and brilliant style, keen perception of the beautiful, and active imagination, have lent a charm to his writings which have won him thousands of admirers and friends. They are not dull and heavy description, but are full of personal incident and adventure, serving, at the same time, to engross and fasten the interest of the reader.

## Dwight's Theology.

Theology Explained and Defended, in a Series of Sermons. By TIMOTHY DWIGHT, LL.D. With a Memoir of the Life of the Author. Portrait. 4 vols. 8vo, Muslin, \$6 00; Sheep extra, \$6 50.

As a work of systematic theology this has no equal in the language. The admirable arrangement, the clear and eloquent style, the masterly and profound argument, and the spirit of piety and reverence which characterize its pages, have long since given it a character in this country and England that no other treatise has obtained. Dr. Dwight's fame is more widely extended than that of any other American divine, with, perhaps, the exception of Edwards. His discourses are familiar to theologians wherever the English language is spoken.

## Neal's History of the Puritans.

History of the Puritans, or Protestant Non-conformists; from the Reformation in 1518 to the Revolution in 1688; comprising an Account of their Principles, Sufferings, and the Lives and Characters of their most considerable Divines. By DANIEL NEAL, M.A. With Notes, by J. O. CHOULES, D.D. 2 vols. 8vo, Muslin, \$2 75; Sheep extra, \$3 00; Half Calf, \$4 75.

A valuable and interesting work, developing the causes of the primitive settlement of the colonies of New England, and containing the most compendious view of the United States in their early provincial dependence which can be found. The history is judicious, impartial, and unimpeachably accurate and authentic. Few men possessed more of the requisite qualifications for producing a work of this character than were enjoyed by Mr. Neal for ascertaining the whole truth upon the momentous subject which he describes.

## Forster's Celebrated British Statesmen.

Lives of Celebrated British Statesmen. The Statesmen of the Commonwealth of England; with a Treatise on the popular Progress in English History. By JOHN FORSTER, D.D. Edited by Rev. J. O. CHOULES. Portraits. 8vo, Sheep extra, \$1 50; Half Calf, \$1 25.

An entertaining and useful work. There is no period in the history of man kind more truly interesting to every intelligent American than that of the Commonwealth of England; and there is no form in which it can be so perfectly attained as in the personal history of the great leaders of that age and movement.

## Virginia Illustrated:

Containing a Visit to the Virginian Canaan, and the Adventures of Porte Crayon and his Cousins. Illustrated from Drawings by PORTE CRAYON. 8vo, Muslin, \$2 50; Half Calf, \$3 50.

These graphic and amusing sketches of the adventures of Porte Crayon and his fair cousins in the Old Dominion are already partly known to the readers of "Harper's Magazine." Their great literary and artistic ability render them well worthy of the permanent and beautiful form in which they are now issued, and the volume can not fail to be a household favorite with all lovers of the humorous and beautiful. The life-like illustrations have introduced to the American people a pencil quite equal to either Leech's or Doyle's, and with a touch of the humor of both. They have been pronounced to be by far the best of the kind ever done in the United States.

## Mills's Literature.

The Literature and Literary Men of Great Britain and Ireland. By ABRAHAM MILLS, A.M. 2 vols. 8vo, Muslin, \$3 50; Half Calf, \$5 50.

The plan of this work is of a very comprehensive character. It embraces the whole field of English literature, from the origin and formation of the Anglo-Saxon language to the close of the seventeenth century. Account is given of nearly all the noteworthy poets, historians, novelists, dramatists, divines, and philosophers in Great Britain and Ireland during the space of more than twelve centuries, with critical notices of their writings, and choice extracts sufficiently numerous to give a fair impression of the genius and peculiar style of each individual. Such a compendium must be a treasure to all who desire to have the gems of British literature made accessible without labor, and without the expense of a large library.

This work is at once one of the most charming and most instructive specimens of biographical literature in our language. The admirable autobiography of Madame Guyon is the basis of the work, and to this the accomplished pen of Professor Upham has added numerous facts, derived from her own writings and from other sources, which enable the reader to obtain a complete view of her history, and to estimate aright her rare intellectual endowments, high attainments, and the beautiful purity of her character. Not the least attractive portion of the work consists in the notices which are given in the course of the narrative of the personal history and religious sentiments of the amiable Fenelon.

Mr. Chambers's edition is the completest presentation of the Scottish poet in existence. The various compositions are here strung in strict chronological order upon the Memoir, that they may render up the whole light which they are qualified to throw upon the history of the life and mental progress of Burns, while a new significance is given to them by their being read in connection with the current of events and emotions which led to their production. The result of this plan is not merely a great amount of new biographical detail, but a new sense, efficacy, and feeling in the writings of the poet himself.

It comprises not only all the essays, letters, poems, criticisms, tales, descriptions, and dramatic works of Addison, but also *the whole of the "Spectator;"* this last being a new and very useful arrangement, inasmuch as many of the finest essays, narratives, and characters in that admirable series were contributed jointly by Addison and others. Care has been taken to designate not only the papers contributed by Addison, but also those furnished by each of the other writers, and, in all other respects, the edition of the "Spectator" comprised in these volumes is as complete and perfect as any ever published.

Professor Shedd's essay is considered one of the most intelligent, profound, and discriminating discussions of a philosophical theme to be found in American literature. It is singularly lucid in thought, consecutive in argument, and chaste and appropriate in expression—and is well worthy of the place which it occupies at the side of President Marsh's Preliminary Essay, which every competent judge regards as one of the noblest modern specimens of philosophical composition.

Mr. Southey's connection with the progress of English literature during the early part of the present century, his strong political predilections, the extent and variety of his productions, and his singular devotion to a purely intellectual life, make his biography one of the most entertaining and instructive records that have been published in this department of letters. ## Southey's Doctor.

By ROBERT SOUTHEY. 12mo, Muslin, 75 cents; Half Calf, \$1 60.

What wisdom and poetry lie scattered about the pages! On one we see the amplitude of his learning; on another, the author's peculiar strain of sentiment; his pure Saxon English in a third. The common-place book of a reader of such out-of-the-way lore as Southey loved could not fail to be replete with amusement, and possibly substantial information. It is a work which, whatever may be its faults, "the world will not willingly let die;" which will take a permanent place upon the book-shelf, and be read and enjoyed when his ponderous epics shall have passed into oblivion.—*The Critic*.

## Sydney Smith's Life and Letters.

A Memoir of the Reverend Sydney Smith. By his Daughter, LADY HOLLAND. With a Selection from his Letters, Edited by Mrs. AUSTIN. 2 vols. 12mo, Muslin, \$2 00; Half Calf, \$3 70.

The Reverend Sydney Smith, the wit, the satirist, the determined antagonist of Dissenters and Tories, is here presented in the familiar intercourse of domestic life. This work abounds with choice sayings, and, though without a tincture of Boswell, has many of the attractions of that worthy's *Life of Dr. Johnson*. The letters range over a period of 44 years, and amount to upward of 560. Written in a way of rapid allusion to what was passing in fashionable, literary, and political society, they throw much light on the great questions of the time, in which the writer bore so conspicuous a part, and complete by confirming the character of the man given in the Memoir.

## Sydney Smith's Moral Philosophy.

An Elementary Treatise on Moral Philosophy, delivered at the Royal Institution in the Years 1804, 1805, and 1806. 12mo, Muslin, \$1 00; Half Calf, \$1 85.

Sydney Smith's remarks are always lively, pointed, and apposite, betraying a familiar knowledge of the world, and a quick perception of the bearing and character of current events; while their caustic wit is usually attempered with an inexhaustible fountain of good humor. The work is prefaced by a commendatory letter by Lord Jeffrey, written but a few days before his death, wherein he says that these lectures "will do their author as much credit as any thing he ever wrote."

## Moore's Life of Byron.

Letters and Journals of Lord Byron. With Notices of his Life. By THOMAS MOORE. 2 vols. 8vo, Sheep, \$3 00; Half Calf, 5 00.

Considered merely as a composition, it deserves to be classed among the best specimens of English prose which our age has produced. Of the deep and painful interest which this book excites no abstract can give a just notion. So sad and dark a story is scarcely to be found in any work of fiction; and we are little disposed to envy the moralist who can read it without being softened.—MACAULAY.

## Galt's Life of Byron.

Life of Lord Byron. By JOHN GALT. 18mo, Muslin, 40 cents.

Mr. Galt enjoyed the advantages consequent upon a long and intimate acquaintance with the noble poet, and has given a striking and satisfactory description of his character. One of the greatest merits of the work is its strict impartiality; the writer is evidently free from prejudice, either favorable or adverse to his subject, and tells what he knows, or believes, to be the truth without bias.

## Sophocles, Literally Translated.

The Tragedies of Sophocles; in English Prose. The Oxford Translation. New Edition, revised according to the Text of Dindorf. Portrait. 12mo, Muslin, 75 cents; Half Calf, \$1 60.

## Sophocles, Translated by Francklin.

The Tragedies of Sophocles. Translated by T. FRANCKLIN, D.D. 18mo, Muslin, 45 cents.

## Haydon's Autobiography.

Life of Benjamin Robert Haydon, Historical Painter, from his Autobiography and Journals. Edited and Compiled by TOM TAYLOR, of the Inner Temple, Esq. 2 vols. 12mo, Muslin, \$1 75; Half Calf, \$3 45.

This is a work of uncommon interest, describing the artistic career, the personal experience, and the perpetual struggles and difficulties of the celebrated English painter, drawn from his own autobiographical narrative in part, and from his own copious journals, with brief editorial comments to preserve the continuity of the story. Haydon was a decided original. His journals give a vivid portraiture of the man, and are marked by deep pathos. They are full of anecdotes of celebrated men, and contain many valuable criticisms upon art. Haydon was in relations with the Duke of Wellington, Lord Brougham, Sir Robert Peel, and other British statesmen, of whom he gives a variety of interesting reminiscences. His anecdotes of Wordsworth, Leigh Hunt, Keats, Shelley, Sir Walter Scott, as well as of several contemporary painters, are attractive features of the book.

## Autobiography of Leigh Hunt,

with Reminiscences of Friends and Contemporaries. 2 vols. 12mo, Muslin, \$1 20; Half Calf, \$3 20.

This work abounds with frequent anecdotes of Coleridge, Wordsworth, Shelley, Byron, Keats, Lamb, Hazlitt, and Moore; gives a detailed exposition of Hunt's connection with the Examiner, and his imprisonment for libel; his residence in Italy; his return to England, and his various literary projects; and describes, with the most child-like frankness, the present state of his opinions and feelings on the manifold questions which have given a direction to his intellectual activity through life. Whatever impressions it may leave as to the character of the author, there can be but one opinion as to the fascination of his easy, sprightly, gossiping style, and the interest which attaches to the literary circles, whose folding-doors he not ungracefully throws open.

## Men, Women, and Books.

A Selection of Sketches, Essays, and Critical Memoirs from his uncollected Prose Writings. By LEIGH HUNT. 2 vols. 12mo, Muslin, \$1 50; Half Calf, \$3 20.

The subjects embrace almost every topic of a pleasurable and refining kind one can think of in the whole round of literature and experience—poetry, love, character, human pursuits, criticism, biography, and fantastic speculations of all conceivable sorts.

## Miss Mitford's Literary Recollections.

Recollections of a Literary Life; or, Books, Places, and People. By MARY RUSSELL MITFORD. 12mo, Muslin, \$1 00; Half Calf, \$1 85.

A work of peculiar interest to American readers. In addition to a rich store of delightful personal reminiscences, genial and graceful criticisms on old English authors, as well as on contemporary celebrities, and copious selections from their choicest productions, Miss Mitford presents several agreeable sketches of American authors and other distinguished men, including Daniel Webster, Halleck, Hawthorne, Whittier, Wendell Holmes, &c. She shows a sincere love for this country, and a cordial appreciation of its institutions and its literature.

## Lady Blessington's Memoirs.

The Literary Life and Correspondence of the Countess of Blessington. Compiled and Edited by R. MADDEN, Esq. With Portrait. 2 vols. 12mo, Muslin, \$2 00; Half Calf, \$3 70.

During the last fifty years there have been few books of such peculiar interest to the literary and political world. It has contributions from every person of literary reputation—Byron, Sir E. Bulwer (who contributes an original poem), James, D'Israeli, Marryat, Savage Landor, Campbell, I. E. L., the Smiths, Shelley, Jenkyn, Sir W. Gell, Jekyll, &c., &c.; as well as letters from the most eminent statesmen and foreigners of distinction—the Duke of Wellington, Marquis Wellesley, Marquis Douro, Lords Lyndhurst, Brougham, Durham, Abinger, &c., &c.

## Life and Letters of Thomas Campbell.

Edited by W. BEATTIE, M.D. With an Introductory Letter, by WASHINGTON IRVING. 2 vols. 12mo, Muslin, \$2 00; Half Calf, \$3 70.

A charming piece of biography. In any hands, the subject could not be without intense interest, and as it has here been treated, possesses a fascination rarely found in any recent production. Free use is made of the letters of Campbell, many of which are of the highest order of epistolary composition, abounding in those delicate and expressive touches which reveal the heart of the man and the genius of the poet in the purest and most beautiful light. The present edition is introduced by a letter of Washington Irving to the publishers, in which our admirable countryman relates some personal reminiscences of Campbell with exquisite grace and felicity.

## Memoirs of Abernethy.

Memoirs of John Abernethy, F.R.S. With a View of his Writings, and Character. By GEORGE MACILWAIN, F.R.S. 12mo, Muslin, \$1 00; Half Calf, \$1 85.

Abernethy, while living, became known most widely by the circulation of characteristic anecdotes of his intercourse with patients. But they revealed only one side of his extraordinary character, and the amusing play of his wit and tact; we have here, in a popular form, better means of appreciating his great ability and distinguished character as a man of science, a teacher, and a practitioner. The author writes as a pupil and a friend, with a vigorous and free pen. It is a very instructive as well as lively and amusing book.

## Sir Hudson Lowe's Letters and Journals.

History of the Captivity of Napoleon at St. Helena; from the Letters and Journals of the late Lieut. Gen. Sir HUDSON LOWE, and Official Documents not before made Public. With Portrait and Map. By WILLIAM FORSYTH, M.A. 2 vols. 12mo, Muslin, \$1 75; Half Calf, \$3 45.

A complete narrative of the Emperor Napoleon's life at St. Helena, founded on the letters and other posthumous documents of the late Sir Hudson Lowe. It defends the conduct of Sir Hudson in the treatment of his illustrious captive. The work is important as a contribution to the history of one of the most remarkable political measures of modern times. No one who pretends to the exercise of impartiality in his judgment of Napoleon will fail to examine the interesting evidence presented in these volumes.

## Curran and his Contemporaries.

By CHARLES PHILLIPS. 12mo, Muslin, 88 cents; Half Calf, \$1 72.

Curran, the celebrated Irish orator, was a man of rare genius and endowments; he formed the centre around which were gathered a number of noticeable men. No one who wishes to gain an insight into the character of the leading men of Ireland during the last generation should fail to read this brilliant book, which Lord Brougham has characterized as "one of the most extraordinary pieces of biography ever produced."

## Guizot's Corneille.

Corneille and his Times. By M. GUIZOT. 12mo, Muslin, \$1 00; Half Calf, \$1 85.

Distinguished by the weight of thought, temperance of expression, and various learning characteristic of the historical productions of M. Guizot, this volume will be found an indispensable aid in the study of French literature. The merits of the great dramatist and his leading contemporaries are discussed with rare critical discrimination and winning felicity of language.

## Guizot's Shakspeare.

Shakspeare and his Times. By M. GUIZOT. 12mo, Muslin, \$1 00; Half Calf, \$1 85.

The views presented by Guizot in this work are the fruit of profound study and reflection. Acute, logical, and unimpassioned, he subjects the immortal productions of Shakspeare to a rigid analysis. As the deliberate judgment of one of the most discreet and intelligent writers in French literature, on numerous important questions of dramatic art, this volume must be regarded as a most acceptable contribution to Shaksperian criticism.

## Croly's George IV.

Life of George IV., with Anecdotes of Distinguished Persons. By Rev. GEORGE CROLY. 18mo, Muslin, 45 cents.

This work contains many light and pleasing sketches of the characters of those men whose great qualities of mind and heart made those days illustrious in England's annals. The names of Pitt, Fox, Burke, Sheridan, Canning, Grattan, and Curran appear in the historic narrative in their various degrees of celebrity, and are characterized always with force and freedom of style.

## Louis the Fourteenth

And the Court of France in the Seventeenth Century. By Miss PARDOE. Illustrated with numerous Engravings, Portraits, &c. 2 vols. 12mo, Muslin, \$3 50; Half Calf, \$5 20.

The reign of Louis XIV. may be said to include all that was interesting in the seventeenth century. Frederic the Great, in sober earnestness, declared that the "*petticoat* history of the seventeenth century remained to be written." We rejoice that the task has been undertaken by a lady, since to a feminine mind alone could the mysterious motive and agencies engaged be at all intelligible.—*London Athenæum*.

## Episodes of French History

During the Consulate and the First Empire. By Miss PARDOE. 12mo, Muslin, \$1 00.

## Hume's History of England.

History of England, from the Invasion of Julius Cæsar to the Abdication of James II., 1688. By DAVID HUME. A New Edition, with the Author's last Corrections and Improvements. To which is prefixed a short Account of his Life, written by Himself. With a Portrait of the Author. 6 vols. 12mo, Muslin, \$3 75; Sheep, \$4 50; Half Calf, \$9 60.

When a young man of eighteen asks for a History of England there is no resource but to give him Hume. David Hume is the master of the field. There is not a page of his that we could not correct and amplify, nevertheless we can not do without him; we have not the resolution, nor, we may add, the genius to supply a substitute. On the whole we expect to see no rival to Hume in our times.—*Times*.

## Gibbon's Rome.

History of the Decline and Fall of the Roman Empire. By EDWARD GIBBON. With Notes, by Rev. H. H. MILMAN and M. GUIZOT. With Maps and Engravings. A new cheap Edition, with Notes, by Rev. H. H. MILMAN. To which is added a complete Index of the whole work, and a Portrait of the Author. 6 vols. 12mo (uniform with Hume) Muslin, \$3 75; Sheep extra, \$4 50; Half Calf, \$9 60.

Gibbon's great work is acknowledged to be a master-piece of historical composition. It was the work of the author's life. To its preparation he brought unwearied industry and unbounded learning. It is replete with wit, philosophy, and eloquence. In it, for the first time, has been bridged over the abyss between ancient and modern times. Notwithstanding the exceptions which have been taken to various portions of the work, all competent critics acknowledge that, for general accuracy and impartiality, it has no rival in historical literature.

## Carleton's Buena Vista.

The Battle of Buena Vista, with the Operations of the "Army of Occupation" for one Month. By Captain CARLETON. 12mo, Muslin, 70 cents.

## Grote's History of Greece.

12 vols. 12mo, Muslin, 75 cents per Volume; Half Calf, \$19 20 per Set.

The author has now incontestably won for himself the title of *the* historian of Greece.—*Quarterly Review*.

Mr. Grote is unrivaled in the erudition and genius with which he has revived the picture of a distant past, and brought home every part and feature of its history our intellects and our hearts.—*Times*.

The acute intelligence, the discipline, faculty of intellect, and the excellent erudition every one would look for from Mr. Grote; but they will find here also the element which harmonizes these, and without which, on such a theme, an orderly and solid work could not have been written. Poetry and Philosophy attend the historian on either hand, and do not impede or misguide his steps.—*Examiner*.

## Hallam's Constitutional History of England,

From the Accession of Henry VII. to the Death of George II.

8vo, Sheep extra, \$1 75; Half Calf, \$2 50.

Mr. Hallam is far better qualified than any other writer of our times for the task he has accomplished. He has great industry and great acuteness; his knowledge is extensive, various, and profound; his mind is equally distinguished by the amplitude of its grasp and by the delicacy of its touch. On a general survey, we do not scruple to pronounce the "Constitutional History" the most important book that we ever read.—*MACAULAY*.

This is a production of the greatest value, and distinguished, like his other works, for research, judgment, taste, and elegance.—*Chancellor KENT*.

## Hallam's Literature.

Introduction to the Literature of Europe, during the Fifteenth, Sixteenth, and Seventeenth Centuries. By HENRY HALLAM. 2 vols. 8vo, Sheep extra, \$3 50; Half Calf, \$5 00.

This edition will naturally find its way into all libraries. No work on foreign history or politics can be more instructive or useful to American statesmen. The *Edinburgh Review* pronounces it "the most important contribution to literary history received for many years;" and a writer in the *London Quarterly Review* says, "To all lovers of literature it will be acceptable; to the young, we conceive, invaluable. We almost wish that we could renew our own youth, in order to profit by its instructions; it would have prevented us from reading a vast number of very bad books, and induced us, perhaps, to read some good ones."

## Hallam's Middle Ages.

State of Europe during the Middle Ages. By HENRY HALLAM.

8vo, Sheep extra, \$1 75; Half Calf, \$2 50.

The object of this work is to trace the progress of Europe from the middle of the fifth to the end of the fifteenth century; from the establishment of Clovis in Gaul to the invasion of Italy by Charles the Eighth. The plan of this work is more extensive than that of Robertson's, its views more comprehensive, and its information more copious and critical. It is written throughout with a spirit of freedom and liberality that does credit to the author.

## Hallam's Historical Works:

Comprising the above. 4 vols. 8vo, uniformly bound in Sheep extra, \$7 00; Half Calf, \$10 00.

## Robertson's Discovery of America.

His writings are equally remarkable for their elegance and perspicuity. In his History of Charles V., the knowledge displayed by the historian, and the enlarged and liberal spirit of his philosophical inquiries are not the least worthy of commendation.—CHAMBERS.

## Russell's Modern Europe.

History of Modern Europe, with a View of the Progress of Society, from the Rise of Modern Kingdoms to the Peace of Paris in 1763. By W. RUSSELL. With a Continuance of the History, by WM. JONES. Engravings. 3 vols. 8vo, Sheep, \$4 50; Half Calf, \$6 75.

The history of modern Europe, by Dr. Russell, has always been prized for its comprehensiveness. It includes the most important period in the annals of mankind, as the author's narrative introduces the era when the renovation of society commenced, after the protracted continuance of that mental gloom which, during several centuries, covered the civilized world. Says Chambers of this work, "It is a production at once so succinct, yet so perspicuous, comprehensive, and entertaining, that all rivalry appears to be precluded."

## Beaumarchais and his Times.

Sketches of French Society in the Eighteenth Century, from unpublished Documents. By LOUIS DE LOMÉNIE. Translated by HENRY S. EDWARDS. 12mo, Muslin, \$1 25; Half Calf, \$2 10.

The "Life of Beaumarchais" constitutes a valuable addition to the social history of France in the eighteenth century. Upon the shelves which contain the voluminous memoirs of French society, none are more curious, authentic, and amusing than those which we now recommend to the attention of our readers.—*Edinburgh Review*.

## Miss Strickland's Queens of Scotland.

Lives of the Queens of Scotland and English Princesses connected with the Regal Succession of Great Britain. By AGNES STRICKLAND. Complete in 8 vols. 12mo, Muslin, \$1 00 per Volume; Sets in Half Calf, \$14 80.

The author of this great historical work combines a feminine susceptibility to moral worth with a masculine power of research and systematic narrative. She has spared no pains in the investigation of facts, ransacked rare archives and dusty depositories for all accessible documents, and has presented the fruit of her labors in a style of equal force and gracefulness. Her sympathies always incline her to take sides with the beautiful, the oppressed, and the suffering, but she never permits the indulgence of her benevolent feelings at the expense of historical truth.

## Helps's Spanish Conquest.

The Spanish Conquest in America, and its Relation to the History of Slavery, and to the Government of Colonies. By ARTHUR HELPS. 3 vols. Large 12mo, Muslin, \$3 00; Half Calf, \$5 50.

An elaborate and complete history of the Conquest of Spanish America, from the time of Columbus to that of Hernando Cortez. Though portions of the work have been ably treated in Irving's Columbus and Prescott's Peru and Mexico, yet, as a connected whole, the ground is almost unbroken. The work is written with special reference to the elucidation of the establishment of slavery in this country, and on that subject contains many interesting developments—though it is not sectarian or partizan in its tone. The subject is one of the most important in modern history—the author is favorably known as a sound thinker and a scholar of rare accomplishments—and his work, learned, scholar-like, and yet popular, has been pronounced, by leading critical authority in England, to be one of the most important and valuable contributions to historical literature recently published in that country.

## Thirlwall's Greece.

History of Greece. By Rev. CONNOP THIRLWALL, D.D. 2 vols. 8vo, Muslin, \$2 75; Sheep extra, \$3 00; Half Calf, \$4 75.

If my early friend Dr. Thirlwall's "History of Greece" had appeared a few years earlier, I should probably never have conceived the design of the present work at all. Having studied, of course, the same evidences as Dr. Thirlwall, I am better enabled than others to bear testimony to the learning, the sagacity, and the candor which pervades his excellent work.—*Preface to Grote's "History of Greece."*

## Rollin's Ancient History.

Rollin's Ancient History is indispensable to any one who wishes to acquire a connected view of the ancient monarchies. The sound moral tone of the work, and its constant regard to the great interests of religion, have gained high and deserved respect for it.

## Alison's History of Europe. First Series.

From the commencement of the French Revolution, in 1789, to the Restoration of the Bourbons in 1815. In addition to the Notes on Chapter LXXVI., which correct the errors of the original work concerning the United States, a copious Analytical Index has been appended to this American edition. 4 vols. 8vo, Muslin, \$5 00; Sheep extra, \$5 50; Half Calf, \$9 00.

Alison combines the minutest attention to detail, the utmost carefulness in authenticating facts, with the greatest facility in deducing principles and laying them before the reader. His is by far the most remarkable historical work of the century. It exhibits remarkable diligence, and does impartial justice on higher principles than have yet been announced in history.

## Alison's History of Europe. Second Series.

From the Fall of Napoleon, in 1815, to the Accession of Louis Napoleon, in 1852. A New Series. 4 vols. 8vo, Muslin, \$5 00; Sheep extra, \$5 50; Half Calf, \$9 00.

The merits of Sir Archibald Alison as a historian need not be commented on in order to call attention to this important work. He brings industry, high culture, indefatigable perseverance, an active and elegant mind, and rare powers of description, to the accomplishment of a task in which he evidently takes a cordial delight. Viewing his work as an elaborate digest of the events of the age, accompanied with frequent vivid and expressive portraitures of conspicuous scenes, it must be regarded as a welcome contribution to our resources on European history, and an indispensable aid to the studies of every intelligent reader."

from the Creation of the World to the Decease of George III., 1820. 6 vols. 18mo, Muslin, \$2 70; Half Roan, \$3 00.

The object of the work is to furnish a regular plan for the important study of history, and to unite with the detail of facts so much of reflection as to aid the mind in the formation of rational views of the causes and consequences of events, as well as the policy of the actors. The author has also endeavored to give due share of attention to the state of the arts and sciences, the religion, laws, government, and manners of nations, which he has treated in distinct sections and at particular periods.

A Popular Account of their Manners and Customs, condensed from his larger Work, with some new Matter. Illustrated with 500 Wood-cuts. 2 vols. 12mo, Muslin, \$2 00; Half Calf, \$3 70.

In this important work, a complete view of Egyptian antiquities is presented, showing the character of the domestic life, political institutions, religious observances, and industrial arts of that remarkable people. It is the product of long and laborious research; it bears the stamp of thoroughness on every page; it is copious without being confused; the descriptive portions are crowded with information, while they are couched in a flowing and attractive style, clothing the hoary and wasted Past in a life-like costume. The volume is illustrated by a multitude of engravings, which make the explanations of the writer perfectly clear to the eye. It will be welcomed by the student of profane history, and no less by the searcher of the Scriptures, as an efficient and most interesting aid in their pursuits.

## Layard's Nineveh.

A Popular Account of the Discoveries at Nineveh. By AUSTEN HENRY LAYARD. Abridged by him from his larger Work. With numerous Wood Engravings. 12mo, Muslin, 75 cents; Half Calf, \$1 60.

The London Examiner pronounces this a "charming volume, to which we may safely promise a circulation without limit, and as unbounded popularity. The great feature of the abridgment is, the introduction of the principal Biblical and historical illustrations (forming a separate section of the original work) into the narrative, which, without sacrificing any matter of importance, makes the story more compact, useful, and, indeed, complete in its abridged than it was in its original form."

## Layard's Fresh Discoveries.

Fresh Discoveries in Nineveh and Babylon; with Travels in Armenia, Kurdistan, and the Desert: being the result of a Second Expedition, undertaken for the Trustees of the British Museum. By AUSTEN HENRY LAYARD, M.P. With all of the Maps and Engravings in the English Edition. 8vo, Muslin, \$2 25; Half Calf, \$3 25.

This deeply interesting volume describes the result of a second expedition devoted to exploring the remains of the ruined cities of the East. The discoveries are related with graphic beauty, and are equally striking with those before published, and throw new light on many obscure passages of Holy Writ, as well as on the social and domestic characteristics of numerous Oriental regions, concerning which we know comparatively little.

## Sir James Stephen's History of France.

Lectures on the History of France. By Sir JAMES STEPHEN, K.C.B. 8vo, Muslin, \$1 75.

These lectures comprise a series of brilliant discursive commentaries on the salient points of French history, from the time of Charlemagne to that of Louis XIV. Of the twenty-four lectures which compose the volume, three are devoted to the "Power of the Pen in France," and discuss in a masterly style the character and influence of Abeilard, Bernard, Montaigne, Descartes, Pascal, and other eminent French writers.

## Waddington's Church History.

History of the Church, from the Earliest Ages to the Reformation. By Rev. GEORGE WADDINGTON, M.A. 8vo, Muslin, \$1 75; Half Calf, \$2 75.

The work was expressly written for and published by the Society for the Diffusion of Useful Knowledge, a sufficient guarantee for value and soundness of opinion, even had not the amazing sale of above one hundred thousand copies in England given it the surest proof of general approbation. It is recognized generally by theologians as most clear, accurate, and comprehensive; and the arrangement is esteemed particularly judicious.

## Feuerbach's German Criminal Trials.

Translated by Lady DUFF GORDON. 12mo, Muslin, 45 cents.

## Mosheim's Ecclesiastical History.

Ancient and Modern; in which the Rise, Progress, and Variation of Church Power are considered in their Connection with the State of Learning and Philosophy, and the Political History of Europe during that Period. Translated, with Notes, &c., by A. MACLAINE, D.D. A new Edition, continued to 1826, by C. COOTE, LL.D. 2 vols. 8vo, Sheep extra, \$3 00; Half Calf, \$4 50. Truly excellent; his erudition it would be superfluous to commend, and to his fidelity I can bear full testimony.—SOUTHEY.

The author's ingenious illustrations of the sacred writings, his successful labors in defense of Christianity, and the light he has cast upon the history of religion and philosophy by his researches, appear in these volumes, which are deservedly placed among the most valuable treasures of sacred and profane literature; and this learned and judicious work has rendered his name illustrious in the records of religion and letters.

## Gieseler's Ecclesiastical History.

A Text-book of Church History. By Dr. JOHN C. L. GIESELER. Translated from the Fourth Revised German Edition. By SAMUEL DAVIDSON, LL.D., and Rev. JOHN WINSTANLEY HULL, M.A. A New American Edition, Revised and Edited by HENRY B. SMITH, Professor in the Union Theological Seminary, New York. Vols. I., II., and III., 8vo, Muslin, \$6 00; Sheep extra, \$6 75; Half Calf, \$9 00.

In the new edition of this incomparable Church History a thorough revision of the translation has been made, with additional references to the English and later German works. The alterations are numerous, giving more exactly the sense of the original, and correcting frequent mistranslations.

The work, when finished, will form a complete and authentic history of the Christian Church to A.D. 1843, composed with abundant and careful learning, especially adapted to the wants of students, and indispensable as a guide to any who would examine the original sources.

The civil history of the Middle Ages can not be understood without some acquaintance with ecclesiastical history, so that this work has an interest for all classes of historical inquirers. The text is brief and compact, the notes crowded with exact information. This conciseness makes the book of the utmost value for consultation and reference, or as a guide to the teacher and the student.—*Extract from a Letter to the Publishers from GEORGE BANCROFT.*

## Thucydides, Literally Translated.

## Sir William Hamilton's Works.

Discussions on Philosophy and Literature, Education and University Reform. Chiefly from the Edinburgh Review. Corrected, vindicated, enlarged, in Notes and Appendices. By Sir WILLIAM HAMILTON, Bart. With an Introductory Essay, by Rev. ROBERT TURNBULL, D.D. 8vo, Muslin, \$1 50; Half Calf, \$2 50.

The preliminary essay by Dr. Turnbull appears to me to add greatly to the value of the book; and I feel much gratified by so able an introduction, and in general by the style in which the work is published.—*Extract from a Letter to the Publishers from Sir WILLIAM HAMILTON.*

In the present state of metaphysical inquiry, the writings of Sir William Hamilton are indispensable for reference, if not for authority. The portion of the volume relating to education possesses the greatest interest for the general reader, while the student of the history of philosophy will find in the papers devoted to that subject an overflowing treasury of learning, ample quotations from writers eminent in their day, but now little read, and a store of critical suggestions. The present edition is prefaced by an appropriate Essay by Robert Turnbull, D.D., presenting a luminous view of the progress of philosophical speculation from the dawn of philosophy among the nations of the East to its latest developments in Continental Europe.

## Jay's Works.

Complete Works of Rev. William Jay: comprising his Sermons, Family Discourses, Morning and Evening Exercises for every Day in the Year, Family Prayers, &c. Author's enlarged Edition, revised. 3 vols. 8vo, Muslin, \$4 00; Sheep extra, \$4 50; Half Calf, \$7 00.

The devotional writings of the late William Jay have found intimate access to the hearts of the Christian world. His excellent influence will not soon pass away. Unequaled for his pious simplicity, his winning unction, his unaffected devotion, his apt use of Scriptural phraseology, and his genuine religious wisdom, he has left an enviable reputation, of which these volumes form an appropriate and interesting memorial. They will long hold a cherished place in the library of practical religious works, and prove equally acceptable to evangelical Christians of every name.

## Jay's Morning and Evening Exercises

for the Closet, for every Day in the Year. Portrait. 8vo, Muslin, \$1 25; Half Morocco, \$2 25; Half Calf, \$2 25.

## Dr. Livingstone's South Africa.

Missionary Travels and Researches in South Africa; including a Sketch of Sixteen Years' Residence in the Interior of Africa, and a Journey from the Cape of Good Hope to Loando on the West Coast; thence across the Continent, down the River Zambesi, to the Eastern Ocean. By DAVID LIVINGSTONE, LL.D., D.C.L. With Portrait, Maps by Arrowsmith, and numerous Illustrations. 8vo, Muslin, \$3 00; Half Calf, \$4 00.

The African Columbus has broken the egg, and let the world into his secret. What he has achieved, and endured, and conquered; the witchcraft which, for sixteen years, he has used against a vertical sun and a malign climate—how he has run the gauntlet of carnivores, and pachyderms, and ophidia—how he has lived on roots, and locusts, and frogs, and moistened his mouth only with rain or river water—how he has striven with thirst and fever, with the loss of letters, and the absence of intelligent companionship—how he has sounded unknown lakes, broken through thorny jungles, navigated unknown rivers, opened to light a world teeming with floral, animal, and mineral wonders—obtaining ingress for science, for commerce, for religion—and leading after him, as the special spoils of his expedition, a throng of colored indigeni, drawn along by no other fetters save of love and admiration. So runs the story of his book—a book not so much of travel and adventure as, in its purport and spacious relation, a veritable poem.—*Athenæum*.

### NOTICE.

Messrs. HARPER & BROTHERS take this opportunity of cautioning the Public against several spurious publications, which, by artful advertisements, are made to appear as though emanating from Dr. Livingstone. They are authorized to say that Dr. Livingstone repudiates them entirely, and wishes it to be generally known that the present work is the *only authentic narrative of his Adventures and Travels in Africa*.

## Dr. Barth's North and Central Africa.

Travels and Discoveries in North and Central Africa. Being a Journal of an Expedition undertaken under the Auspices of H.B.M.'s Government, in the Years 1849–1855. By HENRY BARTH, Ph.D., D.C.L. Profusely and elegantly Illustrated. Complete in 3 vols. 8vo, Muslin, \$7 50; Sheep, \$8 25; Half Calf, \$10 50.

Dr. Barth's wonderful travels approach the Equator from the North as nearly as Dr. Livingstone's from the South, and thus show to future travelers the field which still remains open for exploration and research.

The researches of Dr. Barth are of the highest interest. Few men have existed so qualified, both by intellectual ability and a vigorous bodily constitution, for the perilous part of an African discoverer as Dr. Barth.—*London Times*.

Every chapter presents matter of more original interest than an ordinary volume of travels. This is high praise, but it is due to the intelligence and zeal of Dr. Barth, who pursued his adventure with unflinching courage, and neglected no opportunities. His discoveries, in fact, are parallel with those of Dr. Livingstone in the South. We confess that such a relation has for us an intense interest; we are sure that no serious reader will be disappointed in the narrative of Dr. Barth, which, sprinkled with anecdotes, varied with glittering descriptions of landscapes and manners, written with vigor and simplicity, and disclosing amid the gloom of Africa the secrets of centuries, is a rich repertory of knowledge, and deserves to take its place among the classics of travel.—*Lond. Leader*.

## Andersson's Lake Ngami.

Lake Ngami; or, Explorations and Discoveries during Four Years' Wanderings in the Wilds of Southwestern Africa. By CHARLES JOHN ANDERSSON. With Numerous Illustrations, representing Sporting Adventures, Subjects of Natural History, Devices for Destroying Wild Animals, &c. New Edition. 12mo, Muslin, 75 cents.

This narrative of African Explorations and discoveries is a very important geographical work. It contains the account of two journeys made between the years 1850 and 1854, in the first of which the countries of the Damaras and the Ovambo, previously scarcely known in Europe, were explored; and in the second the newly-discovered Lake Ngami was reached by a route that was deemed impracticable, but which proves to be the shortest and the best. The work contains much scientific and accurate information as to the geology, the scenery, products, and resources of the region explored, with notices of the religion, manners, and customs of the native tribes. The continual sporting adventures, and other remarkable occurrences, intermingled with the narrative of travel, make the book as interesting to read as a romance, as, indeed, a good book of travels ought always to be. The illustrations by Wolf are admirably designed, and most of them represent scenes as striking as any witnessed by Jules Gérard or Gordon Cumming.

## Cumming's Hunter's Life in Africa.

Five Years of a Hunter's Life in the Interior of South Africa. With Notices of the Native Tribes, and Anecdotes of the Chase of the Lion, Elephant, Hippopotamus, Giraffe, Rhinoceros, &c. With Illustrations. 2 vols. 12mo, Muslin, \$1 75.

The writer of this work appears to be a fierce, blood-thirsty Nimrod, whose highest ideal is found in the destruction of wild beasts, and who relates his adventures with the same eagerness of passion which led him to expatriate himself from the charms of English society in the tangled depths of the African forest. Every page is redolent of gunpowder, and you almost hear the growl of the victim as he falls beneath the unerring shot of the mighty hunter.

## Wilson's Africa.

Western Africa: its History, Condition, and Prospects. By Rev. J. LEIGHTON WILSON, Eighteen Years a Missionary in Africa, and now one of the Secretaries of the Presbyterian Board of Foreign Missions. With numerous Engravings. 12mo, Muslin, \$1 25.

Mr. Wilson is probably better acquainted than any other man with Western Africa and its inhabitants. During a residence of almost twenty years, he repeatedly visited all portions of the coast, mastered the principal languages of the natives, composed grammars and dictionaries, and published books in them. He has either written or furnished the materials from which have been elaborated some of the most valuable contributions that have been recently made to the sciences of ethnology and philology. He is a careful and shrewd observer, and presents the results of his observations in an excellent style. His book is a valuable addition to our knowledge of a country which is rapidly rising in importance.

## History of the National Constituent Assembly,

from May, 1848. By J. F. CORKRAN, Esq. 12mo, Muslin, 90 cents.

## Atkinson's Siberia.

Oriental and Western Siberia: A Narrative of Seven Years' Explorations and Adventures in Siberia, Mongolia, the Kirghis Steppes, Chinese Tartary, and part of Central Asia. By THOMAS WITLAM ATKINSON. With a Map and numerous Illustrations. (Uniform with "Livingstone's Travels.") 8vo, Muslin, \$3 00; Half Calf, \$4 00.

A book of travels which, in value and sterling interest, must take rank as a landmark in geographical literature. Mr. Atkinson has traveled where it is believed no European has been before. He has seen nature in the wildest, sublimest, and also the most beautiful aspects the old world can present. These he has depicted by pen and pencil; he has done both well. Many a fireside will rejoice in the determination which converted an artist into an author. Mr. Atkinson is a thorough Englishman, brave and accomplished, a lover of adventure and sport of every kind. He knows enough of mineralogy, geology, and botany to impart a scientific interest to his descriptions and drawings; possessing a keen sense of humor, he tells many a racy story. The sportsman and the lover of adventure, whether by flood or field, will find ample stores in the stirring tales of his interesting travels.—*Daily News*.

## Humboldt's Cosmos.

A Sketch of a Physical Description of the Universe. By ALEXANDER VON HUMBOLDT. Translated from the German, by E. C. OTTÉ. 5 vols. 12mo, Muslin, \$4 25; Half Calf, \$8 50.

Here is a work which unites the grandeur and extent of early speculations with the fullness and precision of modern science. Akin to the *Timæus* of Plato in its artistic repose, in solemn earnestness and calm magnificence of diction, its most astonishing speculations are based upon severe and rigorous investigation. We are equally surprised at the fullness and minuteness of his knowledge, and the masterly clearness with which his facts are arranged. Indeed, *Cosmos* is a work of art almost as much as of philosophy; and we know not where to point out its fellow as a composition. Written in the evening of a long life, it has the mellowed light of the setting sun.—*London Spectator*.

## Humboldt's Travels and Researches.

Being a Condensed Narrative of his Journeys in the Equinoctial Regions of America, and in Asiatic Russia; together with Analyses of his more important investigations, by W. MACGILLIVRAY, A.M. Engravings. 18mo, Muslin, 45 cents.

## Lives of the Humboldts.

Lives of the Brothers Humboldt, Alexander and William. Translated and arranged from the German of KLENCKE and SCHLESIER, by JULIETTE BAUER. With Portraits. 12mo, Muslin, \$1 00; Half Calf, \$1 85.

This is a most valuable contribution to biographical literature. William Humboldt was connected with the most eminent men of his age in politics and literature, and his life is a lucid commentary on the intellectual development of Germany. Alexander Humboldt, in spite of his great age (nearly 90 years), is still actively engaged in the loftiest intellectual pursuits completing his great work, *Cosmos*.

## Bunsen's Signs of the Times.

Signs of the Times; Letters to Ernst Moritz Arndt on the Dangers to Religious Liberty in the Present State of the World. By CHRISTIAN CHARLES JOSIAS BUNSEN, D.D., D.C.L., D.Ph. Translated from the German, by SUSANNAH WINKWORTH, Author of "The Life of Niebuhr." 12mo, Muslin, \$1 00; Half Calf, \$1 85.

An investigation of the religious principles at work in the Christian world; tracing, as far as modern politics extend, the action of priesthood, associations, and secular decrees enforcing spiritual dogmas. The work is a valuable one, by a statesman of consummate intellect, and upon a subject of great interest and importance.

## Bunsen's Life of Niebuhr.

Life and Letters of Barthold George Niebuhr. With Essays on his Character and Influence. By the Chevalier BUNSEN, and Professors BRANDIS and LORBELL. 12mo, Muslin, \$1 25; Half Calf, \$2 10.

A sketch of the life of the celebrated Roman historian, with copious selections from his familiar letters on a great variety of literary and personal topics. In his correspondence, his private feelings, his studies, his literary projects, his plans of life, are all described without reserve. The work is rich in sketches of contemporary literary men and politicians, presenting, in fact, a lucid commentary on the development of German culture during the last half century.

## Debit and Credit.

A Novel. From the German of GUSTAV FREYTAG. By L.C.C. With a Preface, by CHRISTIAN CHARLES JOSIAS BUNSEN, D.D., D.C.L., D.Ph. 12mo, Muslin, \$1 00.

A true work of art, which speaks for itself. \* \* Since our German literature attained maturity, no novel has achieved a reputation so immediate, or one so likely to increase and endure, as *Soll und Haben*, by Gustav Freytag. \* \* The admirable delineation of character, the richness of invention, the artistic arrangement, the lively descriptions of nature, will be ever more fully acknowledged by the sympathizing reader as he advances in the perusal of the attractive work.

## Lamartine's Girondists.

History of the Girondists; or, Personal Memoirs of the Patriots of the French Revolution. By A. DE LAMARTINE. From unpublished Sources. 3 vols. 12mo, Muslin, \$2 10; Half Calf, \$4 65.

The Girondists were the moderate party during the latter part of the French Revolution who vainly endeavored to check the excesses of the Jacobins, and fell victims in the unsuccessful effort. Many of them were men of the most brilliant talents and of lofty virtue. The story of their struggles and of their destruction forms one of the most exciting episodes of modern history. Lamartine has done full justice to his stirring theme. His style is brilliant and captivating, combining the interest of a romance with the instruction of history.

## Lamartine's Celebrated Characters.

Memoirs of Celebrated Characters. By ALPHONSE DE LAMARTINE, Author of the "History of the Girondists." 3 vols. 12mo, Muslin, \$2 63; Half Calf, \$5 18.

The essence of many volumes is here condensed and reproduced in the fascinating style of which Lamartine is such a great master. The subjects of the volumes are Nelson—Heloise—Columbus—Palissy the Potter—Roostam—Cicero—Jacquard—Joan of Arc—Cromwell—Homer—Gutenberg—Fenelon—Socrates—William Tell—Madame de Sévigné—Milton—Antar—Bossuet. An air of beauty is thrown around them all. Whatever is romantic in their histories is set forth with consummate artistic skill, and a fresh and beautiful light is made to play on old facts. The Life of Nelson is perhaps the hardest one for a Frenchman, and above all, for Lamartine, to write justly—and yet it is most admirably done. He portrays the mingled strength and weakness of his character with a master hand, and condenses and narrates the leading events of his life in a story of thrilling interest.

## Lamartine's Past and Present.

Past, Present, and Future of the Republic. 12mo, Muslin, 50 cents.

## Lamartine's Raphael;

Or, Pages from the Book of Life at Twenty. By ALPHONSE DE LAMARTINE. 12mo, Muslin, 37½ cents.

An extraordinary book; pronounced by eminent critics the chef d'œuvre of the poet, and supposed to be the history of his own early struggles and aspirations. The book is written in admirable style, spirited, poetic, and glowing with the warmth of actual life.

## Lamartine's Memoirs of My Youth.

8vo, Paper, 25 cents.

Not less interesting than his Raphael. It abounds in reflections on life and manners which show him to have deeply studied human nature. Some of the scenes in the descriptions of "Graziella" remind one of the inimitable pathos of Sterne.

## Additional Memoirs of My Youth.

By ALPHONSE DE LAMARTINE. 8vo, Paper, 25 cents.

## Narrative of a Journey round the World.

Comprising a Winter Passage across the Andes to Chili; with a Visit to the Gold Regions of California and Australia, the South Sea Islands, Java, &c. By F. GERSTAECKER. 12mo, Muslin, \$1 00.

A very entertaining and instructive narrative of personal adventure and experience during a journey of five years. It contains descriptions of the manners and customs of different portions of South America; graphic accounts of society and life in California, shortly after the discovery of gold there; notices of life in the Sandwich and Society Islands; the incidents of a residence in Australia; and adventures in Java.

## Madame Pfeiffer's Second Journey.

A Lady's Second Journey round the World: from London to the Cape of Good Hope, Borneo, Java, Sumatra, Celebes, Ceram, the Moluccas, &c., California, Panama, Peru, Ecuador, and the United States. By IDA PFEIFFER, Authoress of the "Lady's Journey round the World." 12mo, Muslin, \$1 25.

With scanty funds, few letters of introduction, and no more luggage than a carpet-bag to be carried in her own hand, this elderly and not very robust lady sets out on journeys, the dangers and discomforts of which might well appal the hardiest of the stronger sex. Some of the places to which she penetrated had never before been visited by Europeans, and the account of parts of the interior of Borneo, Java, and Sumatra, is a novel contribution to the records of travel. In the New World she passed over more familiar ground, but not on that account the less interesting will be found the reports of a traveler so observant, intelligent, and trustworthy.—*Literary Gazette*.

## Twenty Years in the Philippines.

By PAUL DE LA GIRONIERE. Revised and Extended by the Author expressly for this Translation. Engravings. 12mo, Muslin, \$1 00.

A spicy narrative of a life of strange and romantic adventures in the farthest East. The author is a Frenchman of education and ability, who, thrown upon the shores of the Philippine Islands at an early age, takes up his residence among the natives, becomes a sort of Oriental potentate among the barbarians, devotes himself to the welfare of his unique colonies, and at the close of twenty years sets about recording his marvelous career for the benefit of his contemporaries. In a style of uncommon freshness and *naivete*, he relates the thousand-and-one odd incidents of his life—many of which are droll enough in all conscience—though their truth is attested by the incidental statements of European and American naval officers, who were familiar with the proceedings of the self-inaugurated monarch. His narrative is, moreover, replete with an endless variety of curious and valuable information, and throws much light on a state of society which, in this western world, we usually have but the faintest conception.

## Leather Stocking and Silk;

Or, Hunter John Myers and his Times. A Story of the Valley of Virginia. By JOHN ESTEN COOKE. 12mo, Muslin, \$1 00.

Without a trace of the audacity and extravagance which are so much in vogue with many recent American writers of fiction, this unique story of Virginia life quietly winds its way to the heart of the reader, by its simple touches of nature, its gentle pathos, and the admirable harmony and fidelity of its coloring. The author has a rare perception of the capacities of character for dramatic effect.—*N. Y. Tribune*.

## Henry St. John, Gentleman,

This charming story depicts the social life of Virginia in the time of Governor Dunmore, and is full of happy, effective touches. The characters are well introduced, and the scenes of Old Virginia are finely sketched.

## Wood's Natural History.

With 450 Engravings, designed expressly for this Work, by HARVEY. Square 12mo, Muslin, \$1 50.

This work presents the subject of Natural History in a manner suited to interest and instruct the general mass of readers. It combines accuracy of information and systematic arrangement with brevity and simplicity of treatment. The descriptive portions in the various branches of Natural History are marked by vividness and simplicity: numerous original anecdotes are introduced, illustrative of animal habits and peculiarities, in connection with scientific details, and a great variety of spirited engravings give a life-like aspect to the whole volume. It possesses equal interest for juvenile and for mature readers.

## The Principles of Courtesy.

With Hints and Observations on Manners and Habits. By GEORGE WINFRED HERVEY. A New Edition, with Additions and Corrections. 12mo, Muslin, 75 cents.

The design of this work is to illustrate and enforce the duty of courtesy in all its principles and applications. From the opinions of the leading critics of the day, already laid before the public, it may be inferred that the book is unique, original, and, apart from the very important practical theme of which it treats, a curiosity in the literature of the age. The subjects, they tell us, are discussed in a spirit of cheerful, charitable, and liberal ethics.

## The Rhetoric of Conversation ;

Or, Bridles and Spurs for the Management of the Tongue. By GEORGE WINFRED HERVEY. 12mo, Muslin, 75 cents.

This volume is intended to be of the same use to *all* who talk, as the ordinary works on rhetoric are to public speakers and writers; containing all the instruction as to the proprieties and ethics of talking that the aspirant after colloquial excellence can reasonably require. To the great number of critical judgments in regard to this work which have appeared in the United States, we may be allowed to add one from the *London Literary Gazette*, a periodical which, according to Christopher North, "stands, beyond dispute, at the head of its own class." "In this volume, by an American writer, will be found much sensible and entertaining counsel and illustrations, historical and biographical. On the art and ethics of talking, it is a comprehensive manual, and *no book in the English language* has entered so systematically into the subject, and presented so many striking and appropriate hints for practical use."

## Cooper's Surgical Dictionary.

A Dictionary of Practical Surgery, comprehending all the most interesting Improvements, an Account of the Instruments and Remedies employed in Surgery, the Etymology and Signification of the principal Terms, &c. With numerous Notes and Additions, derived from the Practice of American Surgeons, together with a Supplementary Index, in which the Science of Surgery is brought down to the present Period, by DAVID M. REESE, M.D., LL.D. 8vo, Sheep extra, \$3 00.

Cooper's Surgical Dictionary, with the voluminous notes and extensive supplementary Appendix of the American editor, which the venerable author incorporated in his latest London edition, is not only the standard authority in surgery in every college at home and abroad, but, as a book of reference in this science, can never be supplanted by any of the kindred works on the same subject, all of which give evidence that their learned authors have been obliged to draw largely from this great Cyclopædia of Surgery for their authorities, their doctrines, and their facts. The name of Samuel Cooper and his work must be coeval with surgery so long as this science is cultivated among men.

## Stewart on the Diseases of Children.

8vo, Muslin, \$1 50; Sheep extra, \$1 75.

## Masse's Anatomical Atlas.

A Pocket Anatomical Atlas of the Descriptive Anatomy of the Human Body. By J. N. MASSE, M.D. Translated from the last Paris Edition, and Edited by G. S. Here is a work which may be carried in the pocket, taken into the anatomical theatre and the dissecting room. It will also be highly useful to the surgeon who has no means of referring to the *subject* previous to an operation; and the physician, also, when meeting with symptoms which can not be explained, by examining the position of the organs, and studying their relations and nervous supply, as beautifully delineated in these plates, may find many of his difficulties removed, and thus be able to practice his art with more satisfaction to himself as well as benefit to his patients.—*New York Journal of Medicine.*

## Cruveilhier's Anatomy of the Human Body.

## Copland's Medical Dictionary.

A Dictionary of Practical Medicine: comprising General Pathology, the Nature and Treatment of Diseases, Morbid Structures, and the Disorders especially incidental to Climates, to the Sex, and to the different Epochs of Life; with numerous Prescriptions for the Medicines recommended. LEE, M.D. Complete in 3 vols. Royal 8vo, Sheep extra, \$15 00. The vols. sold separately, at \$5 00 each.

An encyclopedia, embracing the whole range of medical science. Dr. Copland by his individual effort, sustained by the force of great learning and extensive experience, has succeeded in the production of a work unequaled by the labor of many. It has been pronounced by critics, both in England and America, to be altogether unrivaled in medical literature. The indefatigable compiler has devoted over twenty years of arduous labor to his subjects, collating the experience and authorities of the leading European practitioners and medical writers of the age; and in this American republication are incorporated those of our own country. The information amassed in these volumes is literally enormous; the whole of the materials have been most carefully selected, patiently studied, valued, winnowed, digested, elaborated, and arranged into compact and simple forms, easily accessible, and readily available. It is not easy to point out, in the whole range of medical literature, any work by a single hand so much calculated to excite admiration of the industry and talents of the author.—*British and Foreign Medical Review.*

We have no hesitation in pronouncing the work, beyond all comparison, the best of the kind in the English language.—*Medico-Chirurg. Review.*

As a work of reference, at once systematic and comprehensive, it has *no rival in medical literature.*—*London Medical Gazette.*

## Kane's Chemistry ;

Including the most recent Discoveries and Applications of the Science to Medicine and Pharmacy, and to the Arts. Edited by JOHN W. DRAPER, M.D. With about 250 Wood-cuts. 8vo, Muslin, \$1 50; Sheep extra, \$1 75.

This text-book is undoubtedly the best, because the most comprehensive, in the English language; the additional notes of Professor Draper have been deemed exceedingly valuable. The leading idea of the author has been to present the student an account of the general principles and facts of chemistry, and of its application to pharmacy, medicine, and the useful arts. For its laborious research, accurate analysis, and profound learning, this work stands unrivaled among the productions of its class.

## Butler's Analogy. By Emory and Crooks.

This edition contains the original treatise, with a life of the author, by G. R. Crooks, and a complete and accurate analysis of the work, by the late President Emory, of Dickinson College. The analysis, which is an important feature of the present edition, is drawn up with eminent skill, and must prove an invaluable aid to the student in pursuing the deductions of Bishop Butler. The utility of the volume is increased by the brief explanatory notes of the editor and by a comprehensive index.

## Butler's Analogy. By Hobart.

Analysis of Butler's Analogy of Religion, Natural and Revealed, to the Constitution and Course of Nature, with Notes. Also CRAFTFORD'S Questions for Examination, revised and adapted to the Use of Schools. By CHARLES E. WEST. 18mo, Muslin, 40 cents.

No one can peruse the masterly writings of Butler without great intellectual profit. Of all English authors, his researches in the science of ethics have produced the most precious and the most permanent fruit. As a wholesome discipline, in these days of rash and superficial thought, its value can scarcely be overrated.

## The Homes of the New World.

Impressions of America. By FREDRIKA BREMER. Translated by MARY HOWITT. 2 vols. 12mo, Muslin, \$2 00.

Miss Bremer kept traveling while she was with us; went west to Minnesota; visited the upper waters of the Mississippi; bivouacked on the prairies; halted at nearly every town, large or small, on the banks of that river down to New Orleans; crossed over to Cuba; saw Mobile, Savannah, St. Augustine, in fact, almost every place in the country. And of almost every step of her way she has given some account, while her work offers a kind of portrait gallery of all the people from whom she received services. She gives us clever pictures of almost every man or woman of note in the country.

## Bremer's Novels.

Miss Bremer possesses, beyond any other living writer of her class, the power of realizing to the imagination every individual she introduces. The moral beauty and womanly purity which steadily illuminate her narrative, must receive implicit admiration on all hands.

The Pillars of Hercules; or, A Narrative of Travels in Spain and Morocco in 1848. By DAVID URQUHART, M.P. 2 vols. 12mo, Muslin, \$1 70.

Mr. Urquhart, whose writings upon the Russ6-Turkish complications have brought him prominently before the public at various times, is not only a reliable and genial traveler, but also a Political Economist, a man of science, and an elegant writer. These volumes are a record of a leisurely tour through the southern provinces of Spain and the little-known Barbary. The author describes graphically the manners and customs of the people, and the peculiarities of the countries he saw, and his volumes abound in curious historic and ethnographic lore.

## Dr. Olin's Works.

The Works of STEPHEN OLIN, D.D., late President of the Wesleyan University. 2 vols. 12mo, Muslin, \$2 00; Half Calf, \$3 70.

Dr. Olin's style is forcible and his manner earnest, while his language is suggestive and full of thought. Strength and clearness of reasoning, aptness of illustration, and a straightforward purpose are always to be detected in his sermons. The lectures and addresses in the second volume are mostly devoted to topics connected with *Christian education*. The author's large and comprehensive views of this important subject were both developed and modified by the experience of a quarter of a century, during which he was brought in contact with students of great diversity of mental and moral structure.

## Dr. Olin's Life and Letters.

2 vols. 12mo, Muslin, \$2 00; Half Calf, \$3 70.

The biography of such a man can not be other than a public benefaction. Its effect must be as salutary as the character of its subject was unworldly and pure. In the present case, the interest of the work is greatly enhanced by the space that is allotted to the correspondence of President Olin, whose letters form almost a connective autobiography.

## Stansbury's Interest Tables at Seven per Cent.

Calculated by Months and Days, and by current Days at the rates of 360 and 365 to the Year. Decimally arranged under the head of Time. Each Period of less than a Year having a separate Table by Months and Days, and Days as 360ths, contained on the third of a Page; a Table for a Year being repeated on each two Pages under Observation at the same time. Each Day up to 146 having also a separate Table, at 365 to the Year; with a Table of 146 Days, repeated like the Year Table. Together with Factors for calculating Rebate or Discount; and also convenient Time Tables. Royal 8vo, Half Bound, \$1 50.

Simplicity of arrangement, accuracy of calculation, and compactness of form, commend this work to all who have occasion to refer to such tables. It is true of most interest tables that a ready accountant will ascertain the interest on any sum by the old-fashioned method of computation in as little time as the several pages of the table-book can be referred to, and the several amounts added together, and the result thus obtained. Stansbury's tables, however, present on one page the interest on any sum which it may be necessary to find.

There is more truth and more philosophy inculcated by these simple tales than can be found in nine tenths of all the crack-brained elaborations that have flooded the world for a hundred years. Instruction and moral amusement was their purpose. The design is distinctly stamped upon them, and clearly indicated by the well-written preface. The present volume is a gem in its way, beautifully printed and elegantly embellished with eighty-one engravings.—*Albion*.

VOL. XVI. John Marten.

This cheap and handsome edition of the works of Mrs. Sherwood is certainly one of the most admirable family series, from the pen of a single writer, in the English language. The subjects are exceedingly various, and adapted to different degrees of capacity, from that of opening youth to the matured intellect of riper years; but in all, the sentiments, the spirit, and the influence upon the mind, are such as to command the warmest approbation of every enlightened Christian; while, in their aptitude for the cultivation of the understanding and the improvement of the heart, they challenge competition. These features render the works of Mrs. Sherwood peculiarly suitable for the libraries of Sunday-schools.

How many have thanked God for the hour that first made them acquainted with the writings of Hannah More. She did perhaps as much real good in her generation as any woman that ever held the pen. It would be idle for us to dwell here on works so well known. They have established her name as a great moral writer, possessing a masterly command over the resources of our language, and devoting a keen wit and a lively fancy to the best and noblest of purposes.—*Quarterly Review.*

VOL. X. Helen.

It is unnecessary at this late day to eulogize the works of Miss Edgeworth—they have taken an enduring position in English literature. Sir Walter Scott, with his characteristic frankness, has acknowledged that his original idea when he commenced his career as a novelist, was to be to Scotland what Miss Edgeworth was to Ireland—to portray the peculiarity of manners belonging rather to the generation passing away than to that which now exists, and to give life to the natural scenery, and permanence to the national characteristics of his countrymen. In depicting the strange varieties of Irish character, whether grave or gay, Miss Edgeworth is confessedly without an equal. Her comic and playful satire ranks her high in the dominions of humor, while it is combined with a sterling common sense, and a power of picturesque description which seldom fall to the lot of the wit or the satirist. Her story-telling powers are admirable.

The whole of the works, as published in this edition, have undergone a careful revision and correction by the author herself.

It is impossible to read one of them without feeling that they were intended and are calculated to soften dispositions, correct errors, and remove prejudices; while they are so full of interest, merely as tales, as to gain and hold the attention of the most careless reader.

## G. P. R. James's Novels.

Mr. JAMES is the only conspicuous representative of the school of fiction so signally illustrated by Sir Walter Scott. His prolific genius has given birth to a whole library of novels, on which the verdict of public opinion has set its seal of approval. In splendor of diction, ease and copiousness of description, and felicity of character-drawing, James has few rivals, and, with these merits, his popularity with the million will sustain the test of time. The historical character of many of his novels makes them agreeable sources of information. They refresh the memory of past scenes, and give a glowing illustration to the incidents of a by-gone age.

## James's Chivalry and Crusades.

History of Chivalry and the Crusades. By G. P. R. JAMES. Engravings. 18mo, Muslin, 45 cents.

A volume full of interest and instruction. ## James's Life of Charlemagne.

Life of Charlemagne. With an Introductory View of the History of France. By G. P. R. JAMES. 18mo, Muslin, 45 cents.

Charlemagne was one of the world's great men, and from his time most of the nations of Europe date their origin. In narrating the life of this hero, Mr. James was fully inspired with the greatness of his subject. He has shed light upon the darkness which has long overhung this most interesting and important period of history.

## Dark Scenes of History.

By G. P. R. JAMES. 12mo, Muslin, \$1 00.

These are the compositions in which the author excels, combining historical information with critical acumen. Eight "Dark Scenes of History" have been selected for his themes. They are all of a sanguinary and stirring kind—sad and memorable pictures of by-gone times in various countries. They are treated in a dramatic manner, and with great dramatic effect. The tragical descriptions are full of force.

## James's Henry IV.

Life of Henry IV. King of France and Navarre. By G. P. R. JAMES. 2 vols. 12mo, Muslin, \$2 50.

His peculiar power consists in being able to describe with wonderful spirit busy and stirring scenes, to bring out into bold relief pictures of daring and courage, to delineate with a few bold strokes a landscape, and occasionally to portray the deeper and finer feelings of human nature, which few succeed in handling well. There are scenes of infinite beauty and touching pathos in his works.

## Old Whitey's Christmas Trot.

A Christmas Tale. By A. OAKLEY HALL. Beautifully Illustrated from Original Drawings by THWAITES. Square 4to, Muslin gilt, 50 cents; gilt edges, 60 cents.

The scene of this story is laid partly in New York, in an old Knickerbocker mansion near St. John's Park, and in sundry lawyer's offices, and partly in a delightful old parsonage in the country. The plot is highly effective. Great interest is given to the development of the story. For the most part it is in a tender, touching vein, though free from any cases of mawkish sentimentality. The style is quite simple, with a certain dash of quaintness, often reminding the reader of Washington Irving, and sometimes of Ike Marvel.

Or, Which makes the Man? 18mo, Muslin, 45 cents.

A narrative full of stirring incidents and lively description, the moral of which is that no amount of wealth, unaccompanied by worth, is sufficient to entitle a person to respect or esteem; while genuine worth may often be found accompanied by poverty.

## What's to be Done?

Or, The Will and the Way. By the Author of "Wealth and Worth." 18mo, Muslin, 45 cents.

## American Adventure by Land and Sea.

Being remarkable Instances of Enterprise and Fortitude among Americans; Indian Captures, Shipwrecks, Adventures at Home and Abroad, &c. By EPES SARGENT. 2 vols. 18mo, Muslin, 90 cents.

The narratives here presented are well fitted to impress upon the mind the importance of heroic virtue, self-possession, and fortitude in times of extreme peril. They aptly illustrate the apothegm that Providence helps those who help themselves.

## Perilous Adventures;

Or, Remarkable Instances of Courage, Perseverance, and Suffering. By R. A. DAVENPORT. 18mo, Muslin, 45 cents.

In collecting so many tales of woe and enterprise, the author seeks to inculcate the salutary lesson, "that there are few things that may not be accomplished by perseverance and courage, accompanied by self-command and presence of mind."

Edited by the Rev. JOSEPH SAMUEL C. F. FREY. 8vo, Muslin, \$2 00; Sheep, \$2 25.

\*\*\* The method is an admirable one, and the plan is executed with marked wisdom and ability. It is an invaluable work to theological students, and, indeed, to ministers in general: eminently suggestive of topics and matter for instructive and well-finished sermons.—*Biblical Repository*.

## Siebold's Japan and the Japanese.

Manners and Customs of the Japanese in the Nineteenth Century. From the Accounts of Recent Dutch Residents in Japan, and from the German work of Dr. PH. FH. VON SIEBOLD. 18mo, Muslin, 45 cents.

## Bulwer's Novels.

To Bulwer, the author of *Pelham*, *The Caxtons*, and *My Novel*, we assign the highest place among modern writers of fiction. There is always power in the creations of his fancy; he is always, polished, witty, learned. Since the days of Scott were ended, there is, in our apprehension, no pinnacle so high as that on which we hang our wreath to Bulwer; like the Roman emperor, a prince among his equals, the first among his craft.—*Blackwood's Magazine*.

With Views of the Literature, Philosophy, and Social Life of the Athenians. By Sir E. BULWER LYTTON. 2 vols. 12mo, Muslin, \$1 20.

Bulwer has here mingled, with the happiest skill, the literature with the politics of Athens, and shown, in their inseparable connection, the secret of those triumphs of both, which have survived for upward of twenty centuries the annihilation of her liberty and language.

## England and the English.

By Sir E. BULWER LYTTON. 2 vols. 12mo, Muslin, 85 cents.

An honor to our literature as well as to the high attainments of Sir Edward Lytton.—*Literary Gazette*.

## Bulwer's France.

France, Social, Literary, and Political. By Sir HENRY LYTTON BULWER. 2 vols. 12mo, Muslin, 90 cents.

The object of this work is, in describing the present to connect it with the past, which, in speaking of what is daily and accidental, would separate it from what ages have sanctioned, and distant ages are likely to see; a work which, in showing the effect which time, and laws, and accident produce upon the character of the people, would also show the manner in which the character of a people traverses time, enters into laws, and dominates over accident.

## Mackenzie's Works.

Novels and Miscellaneous Works of Henry Mackenzie: comprising "The Man of Feeling," "The Man of the World," "Julia de Roubigné," &c. With a Memoir of the Author, by Sir WALTER SCOTT. 12mo, Muslin, \$1 00; Half Calf, \$1 85.

Of Mackenzie's works Professor Wilson, the famous "Christopher North" of Blackwood's Magazine, thus speaks: "The beautiful visions of his pathetic imagination had stamped a soft and delicious, but deep and indelible impression on my mind long before I had heard the name of criticism. The very names of the heroes and heroines of his delightful stories sounded in my ears like the echoes of some old romantic melody, too simple and too beautiful to have been framed in these degenerate, over-scientific days."

## Miller's Boys' Own Book.

The Boy's Own Book of the Seasons. Comprising the Spring, Summer, Autumn, and Winter Books. Descriptive of the Seasons, Scenery, Rural Life, and Country Amusements. By THOMAS MILLER. Embellished by numerous and exquisite Engravings. 4 vols. in one. 12mo, Muslin, \$1 75. 4 vols. separately, Paper, 37½ cents each; Muslin, 45 cents each.

Really charming books. The writer is the most successful in describing rural scenery among the writers of the day. His scenes have all the freshness and beauty which characterizes the sketches of Miss Mitford and Washington Irving. The engravings are all exquisite.—*Professor Frost.*

## De Tocqueville's French Revolution.

The Old Régime and the Revolution. By ALEXIS DE TOCQUEVILLE, of the Académie Française, Author of "Democracy in America." Translated by JOHN BONNER. 12mo, Muslin, \$1 00; Half Calf, \$1 85.

A calm, philosophical inquiry into the causes of the French Revolution, and the working of the Old Regime. In this work M. de Tocqueville has daguerre-typed French political society under the old monarchy; shown us where the real power lay, and how it affected individual Frenchmen in the daily avocations of life; what was the real condition of the nobility, of the clergy, of the middle classes, of the "people," of the peasantry; wherein France differed from all other countries in Europe; why a Revolution was inevitable. The information supplied under these various heads, it may safely be said, is now first printed. It has been obtained, as M. de Tocqueville informs us, mainly from the manuscript records of the old intendant's offices and the Council of State. Of the labor devoted to the task, an idea may be formed from the author's statement that more than one of the thirty odd chapters contained in the volume alone cost him a year's researches.

## El Gringo;

Or, New Mexico and her People. By W. W. H. DAVIS, late United States Attorney. 12mo, Muslin, \$1 25.

A lively and attractive book, commencing with a graphic account of the journey across the prairies, from Fort Independence to Santa Fé. The author then gives a brief sketch of the history of New Mexico, and describes its customs, manners, religion, administration of law, and condition of society. The ground covered is new, there being no full recent account of the territory of New Mexico. The work, therefore, will form a useful addition to the authorities on that subject, besides being very agreeable reading.

## Doré.

By A STROLLER IN EUROPE. 12mo, Muslin, \$1 00.

A book of travels, as the author says in his Preface, as little in the style of the guide-books as possible. Full of keen love of the ludicrous—bright, sparkling, and genial—showing on every page that the author was at home in every situation, from the ridiculous flannel gown and omnium gatherum of the baths at Loèche to the grisette's floor, *au sixième*, in Paris. It is hardly to be called a book of travels. It is a collection of notes of adventure and thoughts suggested by incidents of foot, vettura, and diligence journeying on the Continent.

## European Acquaintance:

Being Sketches of People in Europe. By J. W. DE FOREST. 12mo, Muslin, 75 cents.

One of the most readable, pleasant volumes upon Europe, or rather upon persons there encountered by the author, published for some time. The charm of Mr. De Forest's book is his utter want of pedantry. He passes over what is called classic ground, and avoids referring to what other writers have said. He conveys his own impressions in a very agreeable manner.—*Boston Transcript*.

## Madeira, Portugal, and the Andalusias.

Sketches and Adventures in Madeira, Portugal, and the Andalusias of Spain. By the Author of "Daniel Webster and his Contemporaries." With Illustrations. 12mo, Muslin, \$1 25.

In this record of frolicsome adventure, the author lives over again the scenes in which he fully verifies the old proverb of "When in Rome do as the Romans do." He becomes one of the people among whom he temporarily loiters, adapts himself to the humor of the moment like a native, and thus bears away a singularly racy experience of every soil over which he wanders. Few books of modern travel combine so much novel information with such an insinuating nonchalance of manner, or present the countries which they describe in such a fascinating light.

Engravings. 12mo, Paper, 75 cents; Muslin, 90 cents; Sheep extra, \$1 00.

It has been the design of the author of this work to produce a treatise which should be authentic in every particular, worthy to be trusted and appealed to upon every question of importance to the wool-grower. That he has succeeded in this endeavor is abundantly shown by the testimonials of the New York State Agricultural Society, who recommend the work in the highest terms. Its value is much enhanced by the portraits of the principal varieties of sheep, which are pronounced by competent judges to be entirely accurate.

It contains two charts, the one of the Polar regions, and the other of Simson's Straits. The volume is replete with interest, being the substance of six or seven large quarto, and several smaller volumes, and the compiler has very happily arranged the subject in a most attractive manner. ## Piteairn's Island

and its Inhabitants. With an Authentic Account of the Mutiny of the Ship *Bounty*, and of the subsequent Fortunes of the Mutineers. By Sir JOHN BARROW, F.R.S. 18mo, Muslin, 45 cents.

A portion of the crew of the English ship *Bounty* rose against their officers, and sent them adrift upon the sea in an open boat. The mutineers, with a number of native women, at length took possession of an uninhabited island, and, in the course of a year or two, almost all of them perished in quarrels among themselves. The sole survivor of the mutineers now repented of his evil courses, and became the religious instructor of the native women and their children. After many years the island was accidentally visited by an English vessel, who found the inhabitants grown up into a well-ordered community. This volume narrates the perilous adventures of the officers who were put adrift, and the conduct of the mutineers and their peaceful descendants. The whole story is full of interest.

The second portion presents an original plan of mental culture, in which the various aspects of the subject—its physical, moral, and intellectual phases—are fully discussed. This division of the work has been based upon notes taken by the editor in short hand at the time, while attending the lectures of a distinguished German professor on pedagogics ; to which other valuable additions have been made on physical education, &c.

## Sylvan Holt's Daughter.

A Novel. By HOLME LEE. 12mo, Muslin, \$1 00.

We know of no work superior in the idiomatic vigor of its style, or in the delicacy and truth of its feelings. It is evidently the result of profound observation and careful study, and could have been written only by a person of great analytic powers and an intimate acquaintance with the springs and motives of human conduct in almost every station of life.—*Illustrated News of the World.*

This copiously illustrated work affords a storehouse of practical suggestions to all who are interested in the building of country houses in America; and as the architectural designs of which it is composed have been for the most part prepared in detail for actual execution, this work has the all-important advantage of being the result of *bona fide* experience both on the part of employers and architect. It also contains a much-needed chapter, in which the special features of interest that occur in building country houses are touched on and drawn in detail, and a valuable amount of information on these points is thus introduced in a condensed, intelligible manner. To avoid any confusion of ideas in examining the book, the various illustrations are so arranged that the whole scope of each design may be comprehended at a glance; and the vignettes that are appended to the designs have afforded opportunities for treating in an artistic manner many interesting accessories that have hitherto scarcely attracted the attention they deserve. To a great number of persons this volume will have an additional interest, as it contains several designs that were prepared while the author was in partnership with the late A. J. Downing, whose well-known works have had such a beneficial influence on rural taste in the United States.

The tale is told with great delicacy and propriety, and is of an admirable moral tendency.

## Blackstone's Commentaries.

Commentaries on the Laws of England: in Four Books; with an Analysis of the Work. By SIR WILLIAM BLACKSTONE, KNT., one of the Justices of the Court of Common Pleas. With the last Corrections of the Author, with Notes. From the Twenty-first London Edition. With copious Notes, explaining the Changes in the Law effected by Decision or Statute down to 1844. Vol. I. By J. F. HARGRAVE, Lincoln's Inn, Barrister at Law. Vol. II. By G. SWEET, of the Inner Temple, Barrister at Law. Vol. III. By R. COUCH, of the Middle Temple, Barrister at Law. Vol. IV. By W. R. WELSLY, Recorder of Chester. Together with Notes, adapting the Work to the American Student. By JOHN L. WENDELL, late State Reporter of New York. 4 vols. 8vo, Law Sheep \$7 00.

In itself the work is inestimable; but the last London edition having been prepared for publication by four distinguished barristers of England who, after each taking a volume of the Commentaries for service, have added copious notes to the text, explaining changes in the law which have been effected in England by decision or statute, down to the year 1844. To the work thus prepared have been added notes, adapting it to the use of the American student, to show the law as it exists in this country under our institutions, and also to point out the diversities of the Common Law, as held in England and in this country, in the instances in which a difference prevails.

A more original and suggestive work on the subject has never been produced.

## Ford's Plays.

The Dramatic Works of John Ford. Adapted for Family Reading. 2 vols. 18mo, Muslin, 85 cents.

**THACKERAY'S WORKS.**

Thackeray's novels are an indispensable portion of every well-selected library. His vivid pictures of real life, his keen perception of the shams and pretense that lurk under an imposing exterior, his biting sarcasm on fashionable follies, his anatomical dissection of character, with the terse and pointed vigor of his style, place him in the front rank of English fiction-writers, and assure a lasting fame to his productions. The personages who have been the subjects of his caustic pen appear like the men and women whom we meet in the daily walks of society, and, by their life-like naturalness, make an indelible impression on the imagination and memory. No popular novelist has succeeded so well in representing the darker shades of human nature without indulging in exaggeration or description of low depravity. His works are no less valuable as an introduction to a knowledge of the world than as an inexhaustible fund of entertainment.

Why have I alluded to this man? I have alluded to him, reader, because I think I see in him an intellect profounder and more unique than his contemporaries have yet recognized; because I regard him as the first social regenerator of the day—as the very master of that working corps who would restore to rectitude the warped system of things; because I think no commentator on his writings has yet found the comparison that suits him, the terms which rightly characterize his talent. They say he is like Fielding; they talk of his wit, humor, comic powers. He resembles Fielding as an eagle does a vulture; Fielding could stoop on carrion, but Thackeray never does. His wit is bright, his humor attractive, but both bear the same relation to his serious genius that the mere lambent sheet-lightning, playing under the edge of the summer cloud, does to the electric death-spark hid in its womb.—“CURREY BELL,” Author of *Jane Eyre*, *Shirley*, *Villette*, and *The Professor*.

## The English Humorists

of the Eighteenth Century. By W. M. THACKERAY. Together with the Author's Lecture on "Charity and Humor." 12mo, Muslin, \$1 00; Half Calf, \$1 85.

In none of the productions of Thackeray's pen is his admirable genius exhibited to greater advantage than in these exquisite sketches of the English humorists. His fine and subtle criticisms of their literary characteristics are by no means the most valuable feature of the work. He aims rather at giving a faithful portraiture of their personal traits; at presenting them in the familiarity of their homes and habitual haunts; at showing us the men whom we have chiefly known as writers, and enabling the readers to trace their characters in their productions. Such a gallery of intellectual celebrities, with pictures so accurately drawn, so brilliantly colored, and so exquisitely shaded, is not to be found in any language.

## Sandwich Island Notes.

By a Häolé. With Illustrations. 12mo, Muslin, \$1 00.

As a mere narrative, this book will abundantly repay perusal; but considered in the light of the information presented, it becomes very valuable and important. An intelligent correspondent in the Sandwich Islands pronounces the work "the most important and correct view of the islands, as they now are, that has appeared from the American press."

It is an admirable book for the thoughtful study of the young, and abounds in lessons of perseverance, patience, and hope, which can not be too frequently or profoundly pondered. The notes and hints of Dr. Wayland display the wisdom and sense for which he is conspicuous. The authorship of the work is ascribed to Mr. G. L. Craik, one of the editors of the *Pictorial History of England*.

It has the merit of enthralling interest; an interest that is supreme, that is present throughout, that inflames the attention, and renders it breathless with curiosity.—*London Sun*.

Years of thought and attention have been devoted to the collection of the materials for this work; and, while it is valuable for the direct information it conveys, it is still more so for the habits of personal observation which it must induce in the reader.

## The Boyhood of Great Men.

By JOHN G. EDGAR, Author of "The Footprints of Famous Men" and "History for Boys." With Illustrations. 16mo, Muslin, 60 cents.

In this volume is given the early life of about fifty of the greatest men whom the world has ever known. They comprise poets and philosophers, sailors and soldiers, painters and sculptors, lawyers and divines, musicians and scholars. More instructive and cheering examples than are contained in these early biographies it would not be possible to find. The boy who reads them without being roused to emulation must be dull indeed.

## The Footprints of Famous Men.

By JOHN G. EDGAR, Author of "The Boyhood of Great Men" and "History for Boys." With Illustrations. 16mo, Muslin, 60 cents.

At the same time, the accurate biographical information which it contains, together with its sound and discriminating comments on eminent public characters, commend it to the attention of all classes of readers. The narrative is remarkably compact without being obscure from its brevity. The language is not let down to the supposed level of a child's comprehension, but, while it is animated, it is uniformly chaste and dignified. It is a good book for beginners in the study of history of all ages. It would be valuable in families as a convenient book of reference, as well as in schools.

## The Wars of the Roses.

## Utah and the Mormons.

The History, Government, Doctrines, Customs, and Prospects of the Latter-day Saints. From personal Observations during a Six Months' Residence in Great Salt Lake City. By BENJAMIN G. FERRIS, late Secretary of Utah Territory. With numerous Illustrations. 12mo, Muslin, \$1 00.

The author resided in the valley of the Great Salt Lake for six months, during which time he had ample opportunities to examine the customs and institutions of the eccentric people who claim to be the chosen saints of the "latter days." The historical details which he has gathered and embodied in this volume are quite complete and full of interest. Tracing the progress of the extraordinary imposture from the pretended discovery of the Golden Plates of the Book of Mormon to the present formidable industrial, social, and missionary organization, he describes the portentous steps of folly and crime by which the followers of the miscreant, JOSEPH SMITH, have attained their actual position in the public eye.

The Wonders of Science; or, Young Humphrey Davy (the Cornish Apothecary's Boy, who taught himself Natural Philosophy, and eventually became President of the Royal Society). The Life of a Wonderful Boy written for Boys. By HENRY MAYHEW. 16mo, Muslin, 75 cents.

In the story, as Mr. Mayhew tells it, there is no lack of incident. If all that Davy accomplished is not narrated, most of it is foreshadowed, and this is done with a tact which is second nature to the author, and the results of which are most attractive to the reader. Though written for boys, the volume may be profitably consulted by both ages and all sexes. Older readers will find in it a story with excitement enough for those who need such stimulus, and, what is far better, with a practical wisdom in its pages, a pouring forth of knowledge in its naturally told incidents, an artistic grouping of characters, and a healthiness of tone, such as distinguish few books, and no boys' books but those of Mr. Mayhew.—*London Athenæum*.

An ingenious and highly successful attempt to popularize the principles of natural science in a manner adapted to the comprehension of the youthful mind. Mr. Mayhew's exposition of the principles of science is simple and attractive. In a style that is a model of descriptive composition for juvenile readers, he elucidates the methods of astronomy and mechanics, connecting the exact results of calculation with a pleasing dialogue, and just enough of a story to keep curiosity awake.

By HENRY MAYHEW. With Engravings of the Scenes and the Persons described, copied from Daguerreotypes taken by Beard expressly for this Work. 8vo, Muslin.

This work exhibits an appalling picture of the lower strata of civilization in London society. Mr. Mayhew's disclosures afford a pregnant commentary on the moral effects of the present intensely competitive system of labor and commerce. His revelations are startling, at times almost incredible, but always instructive. His facts are sustained by ample evidence, and are more impressive for being free from theory or speculation.

Clear and authentic, copious without prolixity, it does not furnish a bald explanation of facts and terms, but a development of principles well illustrated and explained. ## Two Years Before the Mast.

A Personal Narrative of Life at Sea. By R. H. DANA, JR. 18mo, Muslin, 45 cents.

The author of this work is now an eminent lawyer of Boston. Some years ago he shipped as a sailor before the mast on board a vessel bound to California for a cargo of hides. His account of a sailor's every-day life is the most graphic and accurate any where to be found. The British Government were so sensible of the rare merits of this volume, that they caused it to be reprinted in England, and distributed a large edition gratuitously among the sailors. The voyage was made long before the discovery of gold in California; and it is not a little curious to compare the present condition of that country with the aspect it formerly presented.

All knowledge of their true character, and the traits for which they were renowned, existed only in oral tradition.

This great work of Dr. Neander's, now first translated, forms a necessary introduction to his *General History of the Christian Religion and Church*. Its reputation in Germany is too well known for it to need commendation here. Independently of its value as an antidote to the modern skeptical criticism, whether of rationalistic or the mythical school, the work has taken its place as a standard authority on many points of chronology and interpretation, and is, indeed, regarded by many as the best commentary upon the four Gospels now extant. To those who have been accustomed only to expository works of the English school of theology, it will open an entirely new view of the life of the Savior, while, at the same time, its profound spirituality, breathing the very spirit of religion and humility, can not fail to render it as serviceable to the cause of practical holiness as of scientific theology.

Great Events described by distinguished Historians, Chroniclers, and other Writers. By FRANCIS LIEBER, LL.D., Professor of History in Columbia College, N. Y. A New Edition. 12mo, Muslin, 75 cents.

The compiler's design in this useful work is to afford means of forming strong character, awakening generous impulses, and invigorating the mind for future action, by encouraging an early familiarity with great events, and with those prominent men whose bold deeds and persevering exertions were crowned with lasting effects, or whose loftiness of purpose renders them inspiring examples. He has therefore brought together in this volume the record of fifteen great events, from the battle of Thermopylæ, before Christ 480, to the siege of Saragossa, by Wellington, in 1808. The narrators of these events embrace many distinguished historians—Herodotus, Pliny, Gibbon, Bentivoglio, Southey, Napier, &c.

This work is designed as initiatory to the sublime study of Astronomy. The author's aim has been to avoid entering on the more abstruse and recondite portions of the science, and to confine the attention of the reader to the exhibition of *facts*, the foundation on which they rest, and the reasonings by which they are supported. All the prominent facts and discoveries connected with descriptive astronomy, in so far as they relate to the planetary system, are here recorded, and many of them are exhibited in a new point of view; while several new facts and observations are detailed which have hitherto been either unnoticed or unrecorded.

His minute and interesting facts, the entire consecration of the amiable author to his subject, and the easy elegance and simplicity of his style, render White's history a universal favorite—something like Izaak Walton's book on angling, which all admire and hundreds have endeavored to copy. The retired naturalist was too full of facts and observations to have room for sentimental writing, yet in many passages we may trace no common power of picturesque painting.—CHAMBERS.

In this excellent little work a very difficult task has been undertaken, and successfully accomplished—that of making both attractive and intelligible to the minds of the young the great and striking evidences by which the truth of our Divine religion is established. The productions of Uncle Philip are all distinguished for that familiar, easy style of composition so peculiarly adapted to children, and which conveys information through a channel so pleasing as to make its acquisition a recreation rather than a task. The mind is entertained at the same time that it is enlightened, and the child has its amusement within the compass of its studies.

The primary object of this interesting narrative of a tour among the newly-opened cities of China has been to explore the ground, and exhibit the real condition of the country at the present day. In addition to the above, Mr. Smith's connection with the existing British missionary operations in the Chinese Empire has enabled him to collect a valuable store of information respecting that interesting religious enterprise. ## Marco Polo's Travels.

Greatly amended and enlarged from valuable early Manuscripts published by the French Society of Geography, and in Italy by Count Baldelli Boni. With copious Notes, illustrating the Routes and Observations of the Author, and comparing them with those of more recent Travelers, by HUGH MURRAY, F.R.S.E. Maps and a Vignette. 18mo, Muslin, 45 cents.

A romantic and interesting work, which has maintained its place for five centuries, while subsequent works of the kind have rather tended to increase than diminish its value—no trifling evidence of its great merit. It is one of the great literary performances that originated within the walls of a *dungeon*, Marco Polo being, at the time of its composition, imprisoned at Pisa. This enterprising traveler explored more in the very heart of the Chinese empire, and acquired more intimate knowledge of the wandering Tartars of Asia than any one of his predecessors, and indeed, it may be added, his successors, for in the thirteenth century he enjoyed the immunity, since denied, of visiting Peking with his *eyes open*; his description, therefore, can not but be interesting and valuable, especially at the present day.

## Travels in the United States.

By LADY EMELINE WORTLEY. 12mo, Muslin, 75 cents.

This work belongs to the amusing order of travels, and makes no pretensions to intense gravity or profound wisdom. ## The Private Life of Daniel Webster.

By CHARLES LANMAN. 12mo, Muslin, 75 cents.

In these pages we see the great Webster at home, inhaling the pure breezes of the mountain or the sea, courting the pleasures of country life with the first breath of the morning, sitting under the shade of his ancient elms, raising his solemn eyes to the sublime heights of Kearsarge, listening to the ocean's roar, as it broke against the rocky shores of Plymouth; admiring the symmetry of his noble herds, indulging in tender reminiscences of his "dear kindred blood," or conversing with the gray-haired cultivators of the soil, with whom he sported in his boyish days, as he revisited the hallowed spot where "the rude forefathers of the hamlet sleep."

Sets in Half Calf, \$16 65.

A large portion of these volumes is devoted to a popular commentary on several of the books of Scripture, and is equally adapted to the wants of the clergyman, the theological student, and the private family. With an earnest devotion to the instructions of Holy Writ, a sagacious insight into their meaning, and a singular aptness of illustration, Dr. Chalmers was eminently qualified to present their contents in an edifying form, and to give the reader a fresh perception of their significance and value. The admirers of the theological writings of this great divine will find an ample fund of gratification in these characteristic posthumous remains.

## Life and Writings of Dr. Chalmers.

Edited by his Son-in-law, Rev. WILLIAM HANNA, LL.D. 4 vols. 12mo, Muslin, \$1 00 a Volume; Half Calf, \$7 40 a set.

The brave and magnanimous life of the distinguished Scottish preacher, professor, and philanthropist is described in glowing but faithful colors by the author of this work, whose position, as a near relation of Dr. Chalmers, and whose sympathy with his genius, are a guarantee of his ability to do justice to the subject. The details of his private life are related with beautiful simplicity, while the varied details of his public career are dwelt on with a minuteness corresponding to their importance. Few biographical productions are so well adapted to interest the intelligent and thoughtful reader as these memoirs of a man who has been rarely surpassed for sweetness of disposition, vigor of intellect, and fervor of piety.

They consist of selections from his extensive correspondence, for the most part on subjects connected with religion, and unfolding his private views and speculations in regard to those sublime themes which he set forth with such wealth of illustration and energy of rhetoric from the pulpit, the lecture-room, and the press.

The design of this work is to furnish the general reader with a comprehensive view of the principles of Art. Connected with a profound discussion of æsthetic theory, it also gives an outline of the historic progress and social relations of art, including descriptive and critical notices of the most celebrated works of the great European masters. The volume is written in a popular style, is lucid and accurate in its expositions, combines independence and considerateness in its critical judgments, abounds in curious and valuable information, and, at times, rises to the tone of grave and impressive eloquence. It will fill a place in the library of art which has been left vacant, even with the admirable writings of Ruskin, Leslie, and Mrs. Jameson, and can not fail of being read, not only by artists and amateurs by profession, but by all intelligent and cultivated readers.

## Jarves's Italian Sights.

Italian Sights and Papal Principles seen through American Spectacles. By JAMES JACKSON JARVES, Numerous Illustrations. 12mo, Muslin, \$1 00.

In this volume, Mr. Jarves devotes his lively pen to the description of Italian society, illustrating the manners and customs of the people, and the influence of Catholic principles on every-day life. The frequent notices of art with which the work abounds present many valuable suggestions, and furnish an agreeable variety to the striking pictures of social and domestic life that compose a large portion of its contents. Mr. Jarves's exposition of the ceremonies of the Catholic Church, and their bearing on public morality, is replete with instruction, and in the existing state of religious inquiry, must be deemed seasonable and important.

## Parisian Sights and French Principles

Seen through American Spectacles. With Illustrations. 12mo, Muslin, \$1 00.

This is one of the most graphic descriptions of life in the French metropolis which has yet been given by any English or American traveler. The author blends reflection and narrative in a very effective manner, depicting the prominent features of French society with a vivid pencil, and deducing the inferences suggested by his varied experience. Short of a personal visit to the great focus of European fashion, there is no way in which one can obtain such a mass of information on the subject, and in so agreeable a manner, as by reading this lively volume.

## Jarves's Parisian Sights, Second Series.

Parisian Sights and French Principles seen through American Spectacles. Second Series. By JAMES JACKSON JARVES. Numerous Illustrations. 12mo, Muslin, \$1 00.

In this new series of "Parisian sights," Mr. Jarves exhibits the same power of humorous and graphic description which made his former volume one of the most entertaining books of modern travel. With great boldness and freedom of touch, though with entire propriety of delineation, he sketches the many-colored phases of Parisian life, presenting to the curious observer of manners some of the most remarkable features in the grand panorama of French society. Among the series which are here displayed in life-like reality, are the marriage customs of Paris, the Boulevards and the belles, the fashionable shops, the prisons and prisoners, the employments of the poor, the past and present of the streets, and numerous other points of no less attractive interest. The volume is illustrated by a profusion of characteristic and humorous engravings.

## The Capture of Washington.

History of the Invasion and Capture of Washington, and of the Events which preceded and followed it. By J. S. WILLIAMS, Brigade Major and Inspector, Columbian Brigade, in the War of 1812. 12mo, Muslin, \$1 00.

A narrative of the famous Washington campaign, written with the view of removing the obloquy which has been cast upon the American troops engaged in the Battle of Bladensburg. The author has made diligent use of the copious materials furnished by the Congressional investigation of the subject, and by personal statements from those whose position at the time enabled them to obtain a correct knowledge of the affair. The moral which he deduces from the history is favorable to the character of the American soldiery, at the expense of the prominent politicians of the day.

## Rome, Christian and Papal.

Sketches of its Religious Monuments and Ecclesiastical Hierarchy, with Notices of the Jesuits and the Inquisition. By L. DE SANCTIS, D.D., formerly Curate of the Magdalene, Professor of Theology in the Roman University, and Qualificator at the Inquisition. 12mo, Muslin, 75 cents.

The author of this work is a man of ability and cultivation. He was formerly a Catholic priest in the city of Rome, and filled several offices of importance and trust in the Papal court. He lived for twenty-two years in an establishment which was in close relation with the Jesuits. For fifteen years he occupied the confessional. He was commissioned to make official visits to most of the monasteries in Rome, as preacher and confessor. He is, accordingly, able to speak with the authority of actual experience, and not from hearsay or report. In a series of familiar letters, he here describes the interior of the Church of Rome, unfolds the working of its principal institution, and discusses the character of its doctrines and ceremonies.

The narrative is diversified with numerous personal incidents, sketches of frontier life, and animated descriptive passages. Most of the facts recorded in the work are of a novel character, although the historical connection is preserved by appropriate reference to the statements of previous travelers. The style is free from pretension, simple and impressive, lively and often picturesque.

"Mr. JAMES G. SWAN, a gentleman who has resided in an official capacity in Washington and Oregon Territories, and made himself familiar with their geography and resources. The most important plants and animals are noticed, and the Glossary and Index give to the narrative all the advantages of a treatise. The maps are far in advance of any on New Granada hitherto published, and, by the aid of the Index to them, give the approximate place of every town and hamlet, however small, in all the nation. Among the engravings is one of the Falls of Tequendama, from a daguerreotype. They have never been adequately figured even by Humboldt.

## Currer Bell's Novels.

The wondrous power of Currer Bell's stories consists in their fiery insight into the human heart, their merciless dissection of passion, and their stern analysis of character and motive. The style of these productions possesses incredible force—sometimes almost grim in its bare severity—then relapsing into passages of melting pathos—always direct, natural, and effective in its unpretending strength. They exhibit the identity which always belongs to works of genius by the same author, though without the slightest approach to monotony. The characters portrayed by Currer Bell all have a strongly marked individuality. Once brought before the imagination, they haunt the memory like a strange dream. The sinewy, muscular strength of her writings guarantees their permanent duration, and thus far they have lost nothing of their intensity of interest since the period of their composition.

The term of the second competition expired on January 1st, 1855. On the occasion two hundred and eight treatises were delivered to the Trustees. The judges completed their labors in about a year, and awarded the first premium of £1800 (about \$9000) to the Rev. R. A. Thompson, A.M., of Lincolnshire.

Those who wish to know (and it is a matter worth knowing) will find ample means of information in this volume. \* \* \* He (the author) is clear in statement, subtle and consecutive in his logic, and steers as far from dullness as from sourness.—*Perthshire Advertiser.*

## Mexico: Its Peasants and its Priests;

Or, Adventures and Historical Researches in Mexico and its Silver Mines during parts of the Years 1851-52-53-54, with an Exposé of the Fabulous Character of the Story of the Conquest of Mexico by Cortez. By ROBERT A. WILSON, late Judge of Sacramento District, California. With Engravings. A New Edition. 12mo, Muslin, \$1 00.

This is the work of a man of careful observation, keen insight, and vigorous reasoning powers. As a sketch of the Mexico of the present day it is unsurpassed, and, so far as we know, unapproached. As an exponent of the political, social, and religious horoscope of the Mexican people, the writer commands our assured confidence. As an historical critic he is bold and searching, and in the collation of testimonies with one another and with circumstantial evidences, he reminds us of the scientific scepticism of Niebuhr. He certainly demonstrates Cortez to have been as much of a braggart as a ruffian, and, by adroit cross-examination, convicts Bernal Diaz of gross mendacity. He shows little favor to Romanism, and is by no means slow in ascribing the depressed condition and retrograde tendencies of Mexican affairs to the agency of this baptized polytheism. We can not here accuse him of prejudice. His conclusions have their more than ample basis of observed and unquestionable fact.—*North American Review*.

## Uncle John;

Or, "It is too much Trouble." By MARY ORME. 18mo, Muslin, 38 cents.

The plot of this story is simple, and the incidents belong to the region of fact rather than of fancy; but the truthfulness of its description, its masterly delineations of character, and the liveliness of its style, render it highly piquant and agreeable, while the clearness with which it inculcates certain weighty truths, must commend it to the attention of all who desire the infusion of a truer spirit into the details of every-day life.

## Miss Bunkley's Book.

The Testimony of an Escaped Novice from the Sisterhood of St. Joseph, Emmettsburg, Maryland, the Mother House of the Sisters of Charity in the United States. By JOSEPHINE M. BUNKLEY. 12mo, Muslin, \$1 00.

This is the history of the Escaped Novice from the Sisterhood of St. Joseph. In a well-executed, readable, and interesting narrative, it gives an account of the early history of the writer, her conversion from Episcopacy to Catholicism, her experience in the Church and Convent, and a graphic and minute description of life in the interior of that institution. The book will be read with eager avidity by all American citizens. It purports to set before the world, in a clear and authentic manner, the true nature of convent life in the most popular of all the female "communities" of the Roman Catholic Organization, without, however, having the character of a scandalous chronicle.

Or, Recollections of a Burnt Journal. By FRANK MARRYAT.

With numerous Illustrations by the Author. 12mo, Muslin, \$1 25.

The author of this work—a son of the celebrated novelist, spent nearly two years in California. He gives an entertaining account of his experience as a hunter and squatter among the mountains, and of his various unsuccessful attempts to make a fortune in addition to his former adequate estate. In spite of the ill success of his own speculations, the tone of the book is good-humored and hopeful. His book, with its characteristic illustrations, is by far the most racy work which has yet appeared upon California. It derives additional advantage from its clever pictures of life among the Mexican *Caballeros*.

## Hilliard's Speeches and Addresses.

Speeches and Addresses. By the Hon, HENRY W. HILLIARD. 8vo, Muslin, \$1 75.

The greater portion of this volume consists of speeches delivered in the United States House of Representatives, of which the author was a member during a most critical and eventful period. They are devoted to the discussion of the most important questions which have ever agitated the country; prominent among which are the sub-treasury scheme, the Mexican war, the peace which concluded this war, the form of government to be adopted for the newly-acquired territory, and the political aspects of the question of slavery. These are discussed in the light of principles of universal application, rather than on mere temporary and party grounds. Mr. Hilliard takes throughout high Southern views; but, however widely many readers may differ from him in sentiment and principle, no one can fail to recognize the dignified and courteous manner in which the discussion is conducted, and the profusion and aptness of the historical allusions with which the author's view is elucidated and enforced. The addresses of a literary character which are appended show that, in entering the stormy arena of political life, Mr. Hilliard has not neglected the pursuits of the accomplished scholar and thoughtful philosopher.

## Abbott's Napoleon Bonaparte.

The History of Napoleon Bonaparte. By JOHN S. C. ABBOTT. With Maps, Wood-cuts, and Portraits on Steel. 2 vols. 8vo, Muslin, \$5 00; Sheep, \$5 75; Half Calf, \$7 00.

The Memoir of Napoleon, which attracted such universal attention as it appeared in the pages of Harper's Magazine, is reproduced, with the original illustrations, in these two handsome volumes, including copious additions, and a careful revision by the author. In this important contribution to the biography of one of the most prominent historical characters of modern times, Mr. Abbott has taken an independent point of view, made himself master of the subject by assiduous personal research, and, refusing to yield to the influence of early impressions and foreign traditions, has presented an estimate of the illustrious man to whom he has devoted his studies which can not fail to soften prejudices, remove misapprehensions, and purify and exalt the fame of Napoleon in the eyes of all impartial and intelligent readers.

## Napoleon at St. Helena.

Or, Interesting Anecdotes and Remarkable Conversations of the Emperor during the Five and a Half Years of his Captivity. Collected from the Memorials of Las Casas, O'Meara, Montholon, Antommarchi, and others. By JOHN S. C. ABBOTT. With Illustrations. 8vo, Muslin, \$2 50; Sheep, \$2 88; Half Calf, \$3 50.

The author of this volume performs mainly but the unambitious task of compilation. He desires to take the reader to St. Helena, and to introduce him to the humble apartment of the Emperor. He would give him a seat in the arm-chair, by the side of the illustrious sufferer reclining upon the sofa, or lead him to accompany the Emperor in his walk among the blackened rocks, and thus to listen to the glowing utterances of the imperial sage. The literature of our language affords no richer intellectual treat than the conversations of Napoleon. Hitherto widely scattered in many volumes, and buried in the midst of a multiplicity of details of but transient interest, they have been inaccessible to the mass of readers. By presenting them in one volume, they are within the reach of all who can appreciate the eloquence of word and thought.—*Extract from Author's Preface.*

## Abbott's Kings and Queens.

The Corner Stone.

Hoaryhead and M'Donner.

The present edition of Abbott's Young Christian Series is issued in a style of uncommon neatness, and is illustrated with numerous spirited and beautiful engravings. It is superfluous to speak of the rare merits of Mr. Abbott's writings on the subject of practical religion. Their extensive circulation, not only in our own country, but in England, Scotland, Ireland, France, Germany, Holland, India, and at various missionary stations throughout the globe, evinces the excellence of their plan, and the felicity with which it has been executed. In unfolding the different topics which he takes in hand, Mr. Abbott reasons clearly, concisely, and to the point; but the severity of the argument is always relieved by a singular variety and beauty of illustration. It is this admirable combination of discussion with incident that invests his writings with an almost equal charm for readers of every diversity of age and culture.

A series of volumes containing severally full accounts of the lives, characters, and exploits of the most distinguished sovereigns, potentates, and rulers that have been chiefly renowned among mankind, in the various ages of the world, from the earliest periods to the present day.

The successive volumes of the series, though they each contain the life of a single individual, and constitute thus a distinct and independent work, follow each other in the main, in regular historical order, and each one continues the general narrative of history down to the period at which the next volume takes up the story; so that the whole series will, when completed, present to the reader a connected narrative of the line of general history from the present age back to the remotest times.

The narratives are intended to be succinct and comprehensive, and are written in a very plain and simple style. They are, however, not juvenile in their character, nor intended exclusively for the young. The volumes are sufficiently large to allow each history to comprise all the leading facts in the life of the personage who is the subject of it, and thus to communicate all the information in respect to him which is necessary for the purposes of the general reader.

Such being the design and character of the works, they would seem to be specially adapted, not only for family reading, but also for district, town, school, and Sunday-school libraries, as well as for text-books in literary seminaries.

The volumes already issued have had a wide circulation in all parts of the country—more than two hundred thousand volumes having been already sold. The plan of the series, and the manner in which the design has been carried out by the author in the execution of it, have been highly commended by the press in all parts of the country. The whole series has been introduced into the school libraries of several of the largest and most influential states.

The narrative is rendered still further attractive by the introduction of personal incidents which would naturally befall the actors of the story. ## Page's La Plata.

La Plata: The Argentine Confederation, and Paraguay. Being a Narrative of the Exploration of the Tributaries of the River La Plata and Adjacent Countries, during the Years 1853, '54, '55, and '56, under the orders of the United States Government. By THOMAS J. PAGE, U.S.N., Commander of the Expedition. With Map and numerous Engravings. 8vo, Muslin, \$3 00; Half Calf, \$4 00.

This volume contains the Official Narrative of one of the most important Expeditions ever sent out by our Government. The vast region drained by the River La Plata and its tributaries was closed to commerce and navigation by the rigid Colonial Laws of Spain, the civil wars which followed the Independence, and the subsequent selfish policy of Rosas, the tyrant of Buenos Ayres. After the defeat and flight of Rosas, one of the first acts of Urquiza, the able and enlightened Director of the Argentine Confederation, was the decree of August 28, 1852, declaring the waters of the Confederation free to the flags of all nations. Our Government was the first to avail itself of this decree. Early in 1853 the steamer *Water Witch* was placed under the command of Lieutenant PAGE, with instructions to explore the Rivers of La Plata, and report upon their navigability and adaptation to commerce. Lieutenant PAGE executed his commission with rare fidelity and intelligence, and has embodied the results in this volume. The explorations described in the narrative embrace an extent of 3600 miles of river navigation, and 4400 miles of journey by land in Paraguay and the Argentine Confederation. The River Paraguay alone was found to be navigable, at low water, by a steamer drawing nine feet, for more than 2000 miles from the ocean. The basin of La Plata is almost equal in extent to that of the Mississippi, and not inferior in salubrity of climate and fertility of soil, while the head waters of its rivers penetrate the richest mineral provinces of Brazil and Bolivia. The products of this region must find their outlet through the River La Plata. The population numbers scarcely one person to a square mile, but great inducements to emigration are now offered by the Argentine Confederation. The commerce of the country, already considerable, is capable of immediate and almost indefinite increase. Lieutenant PAGE'S Narrative contains ample information respecting the soil, climate, and productions of the country, and the manners, habits, and customs of the people. An interesting and valuable account of the Jesuit Missions in La Plata is appended to the Narrative. The Illustrations comprise the accurate Map of the Country prepared by the orders of our Government, Portraits of Urquiza, Lopez, Francia, and Loyola, and numerous Engravings of Scenery, Character, and Incident.

## Tales from the Operas.

The Incidents of each Opera are related in a graphic and pleasing style, while preserving the force and spirit of the Original. Edited by GEORGE FREDERICK PARDON. 12mo, Muslin.

The usefulness of this book, apart from the interest of the narratives, will at once commend itself to every reader. To those who frequent the Opera it is invaluable, and to those who speak and hear of it only, it is indispensable. The main incidents of the most celebrated Lyric Dramas are embodied in this work, the periods of history to which they refer are illustrated, the principal characters delineated, the plots unravelled, and the genius and spirit of each Opera carefully and lucidly brought out. How few who visit the Opera House understand the nature and particulars of that which is being enacted? and how few participate in the beauty and comprehensiveness of the music? In this book we can once more listen with rapt attention to the stirring tales of the Huguenots; rejoice with Massaniello and William Tell; weep with Norma and Desdemona; shudder at the crimes of Lucrezia Borgia; laugh at the miseries and perplexities of Don Pasquale: make merry with the Barber of Seville; be melted at the woes of La Traviata, or sit spell-bound and watch the Somnambulist crossing the creaking bridge. In a word, how few can intelligently enjoy and appreciate these master-pieces of dramatic and lyric art without an accurate and succinct knowledge of the narratives on which they are founded? To provide this knowledge is the object of the present volume.

## The Laird of Norlaw.

A Scottish Story. By Mrs. OLIPHANT. 12mo, Muslin, \$1 00.

The author is one of the most truthful delineators of domestic life. The first perusal of her books insures a second, and often a third reading, and, like the novels of Sir Walter Scott, the more frequently they are reverted to, the greater the pleasure. We have very little doubt that the same marks of permanent favor which yet abide by the tales of Miss Edgeworth and Miss Austen, and the novels of Scott and Bulwer, are in store for this gifted lady's agreeable works of fiction.—*Messenger*.

## More About Jesus.

With Illustrations and a Map. By the Author of "Peep of Day," "Reading without Tears," &c. 16mo, Muslin.

"Tell me more about Jesus," is the request that would more frequently be heard if parents and teachers would take the pains to make what they tell the children interesting; and this may easily be done by means of the many appliances within reach. A map of the Holy Land, and a plan of Jerusalem, with a few prints, will always enable the intelligent senior to make his or her Scripture lesson agreeable to the juniors. The author of this little book has already shown her aptitude for the work in her "Peep of Day," and other publications, but in none more prominently than in this. It consists of a series of stories, of about two pages long, embracing the whole of the events in the life of our blessed Lord, told in a plain, simple style, suited to the capacities of children of seven or eight years of age. But better still, all good children's books are good for adults; and this will be found equally useful to put into the hands of very ignorant grown-up people; who may from this learn the story of man's redemption in an intelligent manner. Many of the lessons are illustrated with cuts of the places mentioned.

## Reading without Tears;

Or, a Pleasant Mode of Learning to Read. By the Author of "Peep of Day," "More about Jesus," &c. Beautifully Illustrated. Small 4to, Muslin, gilt, 50 cents.

An easy, simple, and pleasant book for the tiny scholars of the nursery-room. It contains a picture for every word of spelling capable of pictorial explanation. The reading lessons have been carefully selected, being composed of the preceding spelling lessons, by which means, together with the picture meanings, the words are easily impressed on the memory of a very young child.—*London Athenæum*.

## Ellis's Madagascar.

Three Visits to Madagascar, during the Years 1853-1854-1856. Including a Journey to the Capital, with Notices of the Natural History of the Country and of the Present Civilization of the People. By the Rev. WILLIAM ELLIS, F.H.S., Author of "Polynesian Researches." Illustrated by a Map and Wood-cuts from Photographs, &c. 8vo, Muslin.

Mr. Ellis is a zealous missionary—an active, intelligent, resolute, handy, observant, and well-informed man—and a lively, interesting, unaffected writer. In this handsome volume he gives us a very minute account of three several visits which he paid within the last five years to the little known but very remarkable island of Madagascar. He took with him a camera, and his book is illustrated by a number of portraits and views of scenery of whose accuracy we are assured by their having been photographed on the spot. Mr. Ellis was accustomed to keep a journal, in which he noted down every evening the events of the day; and that journal, transmitted to England in the form of letters, furnished the materials for the present volume. It is a readable book. It takes us into untrodden fields; and its style is characterized by truthfulness, simplicity, and a pleasing but perfectly unobtrusive earnestness.

The questions opened out by this book are of such public interest at present that we can not err in predicting for it a success scarcely second to Dr. Livingstone's "Journal." We commend our readers, architectural, botanical, political, or theological, to this excellent book.—*London Athenæum*.

## Müller's History of Greek Literature.

A History of the Literature of Ancient Greece. By K. O. MÜLLER, late Professor in the University of Göttingen. Continued after the Author's Death by JOHN WILLIAM DONALDSON, D.D., Classical Examiner in the University of London, and late Fellow of Trinity College, Cambridge. 8vo, Muslin. (*In Press.*)

This work, originally undertaken at the request of the Society for the Diffusion of Useful Knowledge, was written with a view to its appearance in an English form only, and left incomplete by the death of its Author in 1840. The Society had arranged that Dr. Donaldson, who had translated the latter half of the work, should complete it according to the plan proposed by Professor Müller; and the present publishers have resumed the undertaking in the hope of placing within the reach of classical students a complete but convenient Manual of Greek Literary History. The book comprises Chronological Tables, Indices, some Supplementary Notes, and a Memoir and Portrait of the Author.

## Wyoming;

Its History, Stirring Incidents, and Romantic Adventures. By Rev. GEORGE PECK, D.D. Beautifully Illustrated. 12mo, Muslin, \$1 25.

A clear and complete narrative of the early settlement of Wyoming, the massacre of its inhabitants, and the principal incidents in the lives of the survivors. Almost every chapter has in it the groundwork of an historical novel. There is no class of readers who will not peruse it with pleasure. The work is rendered still more interesting by a variety of pictorial illustrations, comprising some artistic sketches.

## Dr. Thorne.

A Novel. By ANTHONY TROLLOPE. Author of "Barchester Towers," &c. 12mo, Muslin, \$1 00.

Mr. Trollope has a real sense of fun—a thing not common in these days. We can promise a hearty laugh to all who undertake "Doctor Thorne"—a laugh that does good to the laugher, not cynical and cruel, but hearty and sympathetic, and there are so few books now-a-days that make us laugh. There is genuine humor in "Doctor Thorne," not strained or ambitiously displayed, but arising from the natural play of the characters. The characters are real creatures of human nature, flesh and blood, vigorously and broadly drawn, but not caricatured.

We are prepared to name him (the author of *Doctor Thorne*) among the illustrious living writers of fiction. \* \* In Doctor Thorne the handling is broad and powerful, but sure, and under strong restraint; every touch tells, because every touch is the result of thought and feeling, subdued with rare technical skill. \* \* The author's broad and vigorous portraiture, his keen insight into character, his subtle and penetrating observation, embrace too widely and pierce too deeply into the society around him not to give to all he writes the strength and consistency of a purpose; and we cheerfully add that his purpose seems to us to be unexceptionable in its courageous independence and brave humanity.—*The Leader.*

## Memoirs of Rachel.

By Madame De B——. 12mo, Muslin, \$1 00.

"A volume full of spicy gossip and anecdote of the great Hebrew tragedienne. The authoress follows her subject minutely, through the many eventful phases of her career; recounting with French liveliness and spirit all those accidents and incidents which made up Rachel's strange and contradictory character. She gives, besides, a most interesting account of the French theatrical world, its management by the government, and of that life behind the green curtain in France, of which Rachel was so long the centre."

## Self-Made Men.

By CHARLES C. B. SEYMOUR. Many Portraits. 12mo, 588 pp., Muslin, \$1 25; Muslin, gilt edges, \$1 40; Half Calf, \$2 10.

The author includes in this volume not only those individuals who have risen to scientific or social eminence without the usual appliances of education, but a great variety of men who, though favored with the usual advantages of literary culture, have carved out their way to usefulness and renown in the midst of formidable obstacles, by the force of their own genius and energy. Thus we have sketches of Daniel Webster, Immanuel Kant, Fichte, Sir William Jones, and others, who, though *self-made* men, can hardly be called self-educated men: these are by the side of Elihu Burritt, Burns, Henry Clay, Dr. Franklin, and several others of a similar stamp, who, in spite of the want of a regular early education, have gained a position among their fellow-men which tempts one to consider the learning of the schools as superfluous. The unity of the volume accordingly, is to be found in the fact that it consists of the biographies of persons who have won distinction by dint of struggle. The subjects comprise statesmen, scholars, poets, inventors, men conspicuous for their mental ability and attractive for their moral worth. The book can not fail to be useful wherever it is read.

## Fred Markham in Russia;

Or, the Boy Travelers in the Land of the Czar. By W. H. G. KINGSTON, Esq., Author of "Salt Water," "Peter the Whaler," "Mark Seaworth," "Manco," &c. Profusely and elegantly Illustrated. Small 4to, Muslin, gilt, 75 cents.

"No youth of an inquiring mind will lay aside this entertaining volume without mastering its contents, and recollecting them, too; for the author has so managed his subject as surely to absorb the minds of his youthful readers. It is full of information, which will be equally interesting to all classes of readers. Indeed, it describes many things in Russia which are scarcely mentioned in works of far greater pretension."

## Adam Bede.

A Novel. By GEORGE ELIOT, Author of "Scenes of Clerical Life." 12mo, Muslin,

Among the new writers of fiction who have recently appeared in Great Britain, we should place George Eliot, the author of *Scenes of Clerical Life*, at the head. We should be at a loss to name any English novelist of the present day who has excelled the author in his pictures of domestic life, or who has shown a higher order of talent in the delineation of individual character, than the author of these admirable tales. They make us acquainted with an entirely new phase of English Life—that of the middle-class religious family—and they are wholly free from the flippancies, affectations, and maudlin sentiments which are peculiar to the majority of the so-called religious novels.—*N. Y. Times*.

## Scenes of Clerical Life.

A Novel. The Sad Fortunes of the Rev. Amos Barton.—Mr. Gilfil's Love-Story.—Janet's Repentance. By GEORGE ELIOT. 8vo, Paper, 50 cents.

Obviously the production of a peculiar and remarkable writer, whose style showed little or no family resemblances with that of any living author. \* \* He has made us weep over his pathos, and laugh over his comedy; and he has done so with a quiet truth which we find in few of his contemporaries.—*Saturday Review* (London).

## A Cyclopedia of Commerce

And Commercial Navigation. Edited by J. SMITH HOMANS, Corresponding Secretary of the Chamber of Commerce of the State of New York, and Editor of "The Bankers' Magazine and Statistical Register;" and by J. SMITH HOMANS, Jr., B.S., Author of "An Historical and Statistical Account of the Foreign Commerce of the U. S." Royal Octavo, 2000 pages, double columns, strongly bound, Muslin, \$6 00; Sheep extra, \$6 75; Half Calf extra, \$8 00. Sheep extra, 2 vols., \$8 00; Law Sheep, 2 vols., \$8 00; Half Calf extra, 2 vols., \$8 75.

This work is a compendium of commercial knowledge, including articles upon the trade of every important maritime country and city in the world; copious and reliable statistics upon the staple productions of every climate; essays upon commercial subjects; synopsis of the laws regulating commerce; and, generally, information and statistics upon every important commercial subject.

The want of a comprehensive commercial work of this kind has long been felt in the United States—a work exhibiting the condition and resources of the United States and the separate States, as well as of foreign nations. The only attempt hitherto made in this country to supply the want of such a work was the reprint, more than twenty-five years ago, of M'Culloch's *Dictionary of Commerce and Commercial Navigation*. This work is very deficient in statistics relating to this continent, particularly of the United States, while many subjects of great importance to commercial men are either omitted entirely or mentioned only incidentally.

The extensive and important changes that have taken place within the past ten years in commercial affairs—the establishment of new States, new Territories, new commercial places—the unexampled increase of the commerce of the United States, of the development and the record of the great industrial resources of the United States—all seem to require a new and distinct work, with a view to place before commercial readers a more ample account of the progress of commerce throughout the world. The present volume has been prepared with a view to supply, in part, this want; and while the editors have aimed at presenting a fair exhibit of the finances, the internal and foreign commerce, the staple products of each State, they have at the same time gathered together the latest statistics in reference to the products and the commercial relations of foreign nations: especially of those with whom the United States have the most intimate intercourse. The work contains over 2700 subjects.

## Life of North American Insects.

With numerous Illustrations drawn from Specimens in the Cabinet of the Author. By Professor JAEGER, assisted by H. C. PRESTON, M.D. 12mo, Muslin.

The present work is the fruit of Entomological investigations, pursued by the author for many years during his extensive travels in Europe, Asia, and on this Continent—and is accompanied by a thorough examination of all the works published on the subject in the various European languages. No branch of Natural History deserves a more careful and thorough study than the class of Insects, because none is more abounding in use or injury to man—none presents so great diversity of occupations and so many grades of society. The study and knowledge of the companions that swarm around us on every tree and flower, in the air about us, and on the earth beneath us, must be important and interesting to every one, of whatever mental capacity or taste. And it has been very generally so considered, for the rich and poor, lettered and unlettered, the statesman and philosopher, manufacturer and merchant, husbandman and horticulturist, clergyman and physician, have often made this study the principal occupation of their leisure hours.

## Fankwei;

Or, The San Jacinto in the Seas of India, China, and Japan. By WILLIAM MAXWELL WOOD, M.D., U.S.N., late Surgeon of the Fleet to the United States East India Squadron, Author of "Wandering Sketches in South America, Polynesia," &c., &c. 12mo, Muslin, \$1 25.

The veteran surgeon of the United States fleet composing the expedition to Siam, here presents an interesting record of his experience in the waters of the East. His volume contains several graphic episodes illustrative of life on board ship, together with a great amount of information concerning the manners and customs, political condition, and religious ideas of the remote regions to which his official capacity gave him intimate access. He writes in a style which bears the impress of a decided individuality, showing the resolute thinker and observer. In addition to the topics which naturally fall within the compass of his narrative, Dr. Wood presents numerous comments on the naval discipline and traditions with which many years have made him familiar. They are brought forward with sailor-like frankness, and man-of-war life is hit off in a manner which will compare favorably with Herman Melville's Sea Sketches.

## The Land and the Book ;

Or, Biblical Illustrations drawn from the Manners and Customs, the Scenes and the Scenery of the Holy Land. By W. M. THOMSON, D.D., Twenty-five Years a Missionary of the A.B.C.F.M. in Syria and Palestine. With two elaborate Maps of Palestine, an Accurate Plan of Jerusalem, and *several Hundred Engravings*, representing the Scenery, Topography, and Productions of the Holy Land, and the Costumes, Manners, and Habits of the People. Two elegant Large 12mo Volumes, Muslin, \$3 50; Half Calf, \$5 20; Half Calf extra, \$5 50; Half Morocco extra, \$6 00.

"The work of Dr. W. M. THOMSON, entitled '*The Land and the Book*' has been prepared under the rare advantages of a long residence in the Holy Land, with special facilities for travel and exploration—a familiar knowledge of the languages of the Bible, and the common language of the country, and the constant observation of manners and customs illustrative of the Word of God. It reproduces to the eye and the mind of the reader, as living realities, the physical characteristics and the social and domestic habits of the land in which the Bible was written, and with which it is permanently associated. This is done with scrupulous accuracy, with fidelity to the sacred text, and at the same time in a popular and engaging style. The work will prove a most valuable aid in the study of the Bible, and will greatly enrich the stores of those who are called to expound it in the pulpit or in the Sabbath School.

"Our personal observation of the Holy Land and its manners and customs enables us to add that the Pictures of the Land and its every-day Life here presented, are both graphic and reliable, and we cordially recommend the work to all who seek a better understanding of the sacred Scriptures."

## Andrews's Latin-English Lexicon,

founded on the larger German-Latin Lexicon of Dr. WM. FREUND.

With Additions and Corrections from the Lexicons of Gesner, Facciolati, Scheller, Georges, &c. Royal 8vo, Sheep extra, \$5 00.

The opinion of scholars, both in this country and Great Britain, is unanimous in its favor, as the best lexicon yet published in any language. It constitutes the most valuable philological and historical index of the language, in its successive periods, that has been given to the world. Its excellence, in every essential quality of a Latin Lexicon, can not be too highly estimated. Every page bears the impress of industry and care. The unequalled fullness in the vocabulary, the philosophical arrangement of the definitions, the abundant references to the Roman authors which support these definitions, the designation of the words as classical or otherwise, with the period to which each word belongs, and the nice attention to the quantity of syllables which runs through the whole, altogether constitute a group of excellences which place this lexicon far above any other of the kind.

The beauty of the typography, which is clean, neat, and judiciously varied, has met with unqualified approbation. The lexicon has already, to a great extent, superseded those in common use, as the cheapest and most acceptable aid to the acquisition of the noble language of Virgil and Cicero.

### Dr. Anthon's Series of School and College Classics.

The unrivaled success which has attended the scholastic labors of Professor Anthon, best attests the distinguished merit with which the following series has been regarded by the learned world. The *London Athenæum* says: "Dr. Anthon has done more for sound classical school literature than any half dozen Englishmen; his books are admirably edited. His merits, as an editor of the school classics, are so well understood and appreciated in this country, as well as in his own, that commendation would be superfluous."

We consider his series of "School Classics" to stand unrivaled in their department of education, whether we regard the extent of scholarship which they display, or the easy gradation by which the student is led from the first principles of a complex language to its final and accurate combinations. A union of the highest classical knowledge, with the power of adapting it to the student, is of rare occurrence: these attributes characterize this excellent series.—*Examiner* (London.)

---

\*\* The plan proposed in the following series is to give editions of all the authors usually read in our schools and colleges, together with such elementary and subsidiary works as may be needed by the classical student, either at the commencement or at particular stages of his career.

The advantages which this series promises to confer are the following: *the latest and best texts; accurate commentaries*, putting the student and instructor in possession of the opinions of the best philologists; together with all such *subsidiary historical and archæological information* as may serve not only to throw light upon the meaning of the author, but also to give rise, in the young student, to habits of correct thinking and to the formation of a correct taste.

Many of the works at present used in our classical schools are either miserably edited reprints of antiquated editions, swarming with errors, not only in the typography, but in the matter itself; or else they are volumes fair to the view, indeed, as far as regards mere mechanical execution, but either supplied with meagre and unsatisfactory notes, or without any notes at all.

The complaint which has been made by some against the volumes of Dr. Anthon's Series, that they furnish the student with too much assistance, appears to be the most illiberal, not to say the most ridiculous, that could possibly be urged. When Dr. Anthon commenced his editorial labors, the system of classical instruction in most of the schools of this country was lamentable in the extreme; and the vocation of a teacher consisted of little more than ringing the changes upon the letters and syllables of his academical horn-book. No wonder the cry was then often heard, as to the little utility likely to be derived from the study of the Greek and Latin languages. This Series introduced a new era. The student was presented with a copious commentary, opening up sources of information, to which he could otherwise have had no possible access, and bringing to bear upon the study of the ancient languages a mass of rich and varied knowledge, which he had looked for in vain from his immediate instructors. The question, therefore, resolves itself simply into this:—Shall such a system of instruction continue to be countenanced, or shall instructor and pupil go back to their old mode of teaching and being taught, and play over once more the venerable game of *blind-man's buff* with the ancient writers."

A Dictionary of Greek and Roman Antiquities, from the best Authorities, and embodying all the recent Discoveries of the most eminent German Philologists and Jurists. First American Edition, corrected and enlarged, and containing also numerous Articles relative to the Botany, Mineralogy, and Zoology of the Ancients, by CHARLES ANTHON, LL.D. Royal 8vo, Sheep extra, \$4 00.

As a dictionary, this is the best aid to the study of classical antiquity which we possess in our language. Valuable as it must be to the student of ancient literature, it will be of scarcely less service to the student of ancient art, for the illustrations have been selected with care and judgment.

The articles are admirably done; they are terse in style, and pregnant, yet not cumbrously so, with accurate knowledge—the best and *latest* authorities are constantly cited. It is a work much wanted, and is invaluable to the young student, and, as a book of reference, it will be most acceptable on the library table of every scholar.

## Smith's Antiquities, Abridged,

Royal 8vo, Sheep extra, \$4 00.

## Anthon's Smith's New Classical Dictionary

Of Greek and Roman Biography, Mythology, and Geography. Numerous Corrections and Additions. Edited by CHARLES ANTHON, LL.D. Royal 8vo, Sheep extra, \$2 50.

The numberless inaccuracies of Lempriere have caused his great work to go almost into disuse, and the present edition of Smith's Dictionary, with the improvements of Dr. Anthon, whose reputation is now world-wide as a scholar, will find its way into the hands of every school-boy who has money to purchase it, and a teacher with sense enough to tell his pupils *what* books are indispensable to them.

## Anthon's Lat.-English & Eng.-Latin Dictionary.

A Latin-English and English-Latin Dictionary, for the use of Schools. Chiefly from the Lexicons of Freund, Georges, and Kaltschmidt. Small 4to, Sheep, \$2 00.

A valuable work, well adapted for the use of schools. No American scholar could judge more accurately of the wants of our schools in this department, or more ably supply them than Dr. Anthon. The characteristics of a good lexicon are every where apparent. The word to be defined is printed in distinct capitals, which greatly facilitates the work of the student who has to make frequent references to his dictionary. The *quantity* of the text-word is also carefully marked, and the different parts of the word given, while, if it be a derivative word, its Greek or Latin root or original is also given; and the definitions are brief, comprehensive, and correct.

## Riddle & Arnold's English-Latin Lexicon,

Founded on the German-Latin Dictionary of Dr. C. E. GEORGES. First American Edition, carefully revised, and containing a copious Dictionary of Proper Names from the best Sources. By CHARLES ANTHON, LL.D. Royal 8vo, Sheep extra, \$3 00.

There is no such Thesaurus of Latin equivalents for English expressions; all others are meagre in the comparison. It is the only English-Latin Dictionary that a student can consult with a reasonable hope of finding what he wants, or with any certainty of being able to trust what he finds; and, as such, it must supersede every similar work now in use in schools and colleges in the United States, as it has already done in England.

"No one can peruse the masterly writings of Butler without great intellectual profit. Of all English authors, his researches in the science of ethics have produced the most precious and the most permanent fruit. As a wholesome discipline, in these days of rash and superficial thought, its value can scarcely be over-rated."

## Buttmann's Greek Grammar.

For the use of High Schools and Universities. Revised and enlarged by his Son, ALEXANDER BUTTMANN. Translated from the 18th German Edition, by EDWARD ROBINSON, D.D., LL.D. 8vo, Sheep extra, \$2 00.

Buttmann's Grammar still retains its place as the *Classical and National Greek Grammar of Germany*. Two large editions of the translation made from the thirteenth edition have appeared in this country. The present, made from the eighteenth edition of the original, brings the subject of Greek Grammar down to the close of 1847. The objections formerly sometimes made to the comparative meagerness of the Syntax are now done away. In its present form, the Syntax is perhaps surpassed in symmetry and fullness by no other one of a like character; while few, if any, can compare with it in clearness, precision, and practical utility.

Buttmann is unquestionably one of the most accurate and reliable of grammarians. His grammar is surpassed by none of the recent works in accuracy, brevity, and adaptation to the wants of a student.

## Burke on the Sublime and Beautiful.

The object of this treatise is to present to the student a full and systematic textbook of practical and theoretical *elementary* algebra. Within a brief compass, the author has embraced a very comprehensive view of the science. The work has been extensively adopted in numerous academies and schools in different sections of the country.

## Comte's Philosophy of Mathematics.

Translated from the Cours de Philosophie Positive, by W. M. GILLESPIE, A.M. 8vo, Muslin, \$1 25.

We rejoice that an American scholar has undertaken and so ably executed a translation of a work which has been so favorably received and so highly commended by the first scientific men of Europe. For comprehensiveness of scope, for clearness of statement and exposition, for breadth of inquiry and depth of thought, we esteem it superior to any work in this department of science with which we are acquainted.—*Evangelical Review*.

## Docharty's Arithmetic.

A Practical and Commercial Arithmetic: containing Definitions of Terms, and Rules of Operations, with numerous Examples. The whole forming a complete Treatise for the use of Schools and Academies. By GERARDUS BEEKMAN DOCHARTY, LL.D., Professor of Mathematics in the New York Free Academy. 12mo, Sheep extra, 75 cents.

This is one of the few works designed for elementary instruction in which the subject is presented in a truly scientific form, and the consecutive parts developed in a manner entirely suited to the recitation room. The definitions are concise and exact, the rules explicit, and the explanations lucid and exactly where they should be. The algebraic notation conduces much to the compactness and simplicity of the operations, and prepares the pupil to enter upon the study of the higher branches of mathematics. The concise, beautiful, and masterly manner in which the Second Part, *Commercial Arithmetic*, is treated, greatly enhances the value of the work for those who are preparing to enter the counting-room or broker's office. As a complete treatise on commercial Arithmetic there is nothing that can compare with it.

## Docharty's Institutes of Algebra.

The Institutes of Algebra. Designed for the use of Schools, Academies, and Colleges. By GERARDUS BEEKMAN DOCHARTY, LL.D. 12mo, Sheep extra, 75 cents.

This is a very comprehensive treatise on the beautiful science to which it is devoted. Commencing with the simplest elements of algebra, in a form adapted to the comprehension of the youngest learner, it unfolds the subject in its more advanced principles, including all that is necessary in a regular collegiate course. The language is uniformly elegant and concise, the principles are stated with rigid exactness, and illustrated by a profusion of apposite examples. A better manual for practical use was never presented to the attention of teachers and students.

## Docharty's Geometry.

Elements of Plane and Solid Geometry, together with the Elements of Plane and Spherical Trigonometry, and an Article on Inverse Trigonometrical Functions. By GERARDUS BEEKMAN DOCHARTY, LL.D., Professor of Mathematics in the New York Free Academy. 12mo, Sheep extra, 75 cents.

A condensed and admirable work, containing in a few pages what is ordinarily spread over octavo quires. Much that is cumbersome and wholly useless to the student in the old treatises is omitted, much that is valuable and new is added, and the whole is so arranged that, while the scholar will find the difficult passages of the *Pons Asinorum* and the Forty-seventh Proposition materially eased, the teacher will see that his own labors are simplified and greatly assisted. A careful examination of this work by teachers must lead to its general adoption in schools.

## Draper's Physiology.

Human Physiology, Statical and Dynamical; or, The Conditions and Course of the Life of Man: being the Text of the Lectures delivered in the Medical Department of the University. By JOHN W. DRAPER, M.D., LL.D., Professor of Chemistry and Physiology in the University of New York. Illustrated by nearly 300 fine Woodcuts from Photographs. 8vo, 650 pages, Muslin, \$4 00; Sheep, \$4 25; Half Calf, \$5 00.

We rise from the survey of this work with an impression of great power and value. We are satisfied that Draper's Physiology will take an important place at once, and will add one more to the number of American text-books which may be placed side by side with the best of those which are obtained from abroad.—*Philadelphia Medical Examiner*.

Dr. Draper's Physiology is perhaps the greatest work ever issued from the American press. The reading and studying of it is worth the reading and studying of all the medical practices of the last quarter of a century.—*St. Louis Medical and Surgical Journal*.

The favorable reception which has been given to this work by the public and the medical profession, both in America and Europe, proves how completely it has accomplished its object of bringing the science on which it treats to the comprehension of the general reader, without any sacrifice of its high scientific position. As a representation of the present state of Physiology, embodying all the recent foreign discoveries in a form not otherwise accessible to the student, it has, in less than a year, been adopted as a text-book in a majority of American Colleges.

Great, however, as its success in that respect has been, the favor extended to it by the reading and educated classes generally is still more striking. They have appreciated the manner in which it brings knowledge on a subject of the highest importance to the well-being of society to the easy comprehension of persons not familiar with medical matters. They have found it to be a book not alone adapted to the university or college, but suited to the instruction of every head of a family. The numerous photographic engravings it contains tend greatly to a clear illustration of the various topics it discusses, enabling those who have only the opportunity of casual study to follow the author in his descriptions without any difficulty.

Of all the sciences, none comes more closely home to us than Physiology. It explains to us how "fearfully and wonderfully we are made," teaches us how the various parts of our system act in a state of health, and enables us to understand the causes of our ailments and diseases. There is no class of society, and, indeed, no individual, who may not profitably become acquainted with it. It is therefore to the general reader, as well as the profession, that this book is offered.

## Draper's Text-Book on Chemistry.

A Text-Book on Chemistry for the use of Schools and Colleges. By JOHN W. DRAPER, M.D., Professor of Chemistry in the University of New York, member of the American Philosophical Society, &c. With nearly three hundred Illustrations. New, revised, and enlarged Edition. 12mo, Sheep extra, 75 cents.

This is a work which has been used in our best schools and colleges. As a practical manual of instruction it is admirably adapted—it is clear, concise, and well arranged. The author's experience in teaching has enabled him so to apportion the subjects of the lectures as to do equal justice to each, and he has followed the best method and order in treating them. Without this practical knowledge as a teacher, no extent of scientific learning could have produced so perfect a class-book. But this is not its only merit. It is not a mere popular compendium; it is a complete view of the science of chemistry, particularly of the science as it now is, its nomenclature, definitions, and doctrines, with the latest discoveries that have been made in it, and it explains the mode of experimenting so clearly, that the student would find no difficulty in using the apparatus without other guidance.

## Draper's Text-Book on Natural Philosophy.

A Text-Book on Natural Philosophy for the use of Schools and Colleges. Containing the most recent Discoveries and Facts, compiled from the best Authorities. By JOHN W. DRAPER, M.D., Professor of Chemistry in the University of New York, and formerly Professor of Natural Philosophy and Chemistry in Hampden Sidney College, Virginia. With nearly 400 Illustrations. 12mo, Sheep extra, 75 cents.

The plan of this work resembles that of the author's "*Text-book on Chemistry*," being based upon his *Lectures*, and embodying the most important recent improvements introduced into the several branches of Natural Philosophy, either as respects new methods of presenting facts, or the arrangement of new discoveries. In this sense the work is to be regarded as a compilation from the authorities, adapted to the use of schools and colleges; enriched by the notes and illustrations of the author—the fruit of his valuable experience and ripe scholarship. The work is illustrated by many wood-cuts, supplying, in a measure, the want of apparatus or other means of illustration.

By P. DUFF, Merchant. 8vo, School Edition, Half Sheep, 75 cents; Mercantile Edition, Muslin, \$1 50.

A book of instruction, to give a clear and satisfactory insight into the very useful science upon which it treats, through all its gradations, from the simplest style suitable to the retailer, to that required for the most varied and complicated commercial business. It should be in the possession of every practical accountant as a useful assistant, as well as in the hands of every one desirous of becoming an accomplished book-keeper.

FOWLER, late Professor in Amherst College. New and revised Edition. 8vo, Muslin, \$1 50; Sheep extra, \$1 75; Abridged Edition, \$1 00.

A profound treatise on the philosophy of Grammar. It treats of the English language in its elements and forms, giving a copious history of its origin and development, and ascending to the original principles on which its construction is founded. There is no work on the subject that is better adapted for a text-book in collegiate instruction, for which purpose it is especially designed by the author. At the same time, it forms an invaluable aid to more advanced students in the niceties of our language, and may be of service to the most practical writers, by showing them the raw material out of which they cunningly weave together their most finished and beautiful fabrics.

A thoroughly reliable, philosophical, and comprehensive, though succinct treatise on the English language for the use of schools; and we take great pleasure in directing the attention of teachers and others to it as such, with the confident expectation that our hearty recommendation of the work will be abundantly justified by their experience in the use of it.—*N. Y. Churchman.*

An Elementary English Grammar for Common Schools. 16mo, Sheep extra.

## Gray's and Adams's Geology.

Elements of Geology. By ALONZO GRAY, A.M., Author of "Elements of Chemistry," and "Elements of Natural Philosophy," and C. B. ADAMS, A.M., Fellow of the American Academy of Arts and Sciences, Professor in Amherst College, and State Geologist of Vermont. Engravings. 12mo, Sheep Extra, 75 cents.

The object of this work is to present the science of geology in form and style suited not only to the instruction of classes, but to the wants of the general reader. It incorporates more of American geology than any preceding work which is designed for the use of students, and is very fully illustrated. Some of the topics presented are the geological agencies, water, fire, and vitality; the principles of zoology which pertain to fossils; paleontology; history of the earth, including a description of the various geological formations with their included fossils; theories of the earth; age of the world; relations of geology to natural theology, and the connection of geology and revelation. As a book of instruction it has no superior; and it is adapted equally to the wants of the home student and to the recitation room of the academy.

## Gray's Natural Philosophy.

Elements of Natural Philosophy. Designed as a Text-book for Academies, High Schools, and Colleges. By ALONZO GRAY, A.M., Author of "Elements of Geology." 360 Woodcuts. 12mo, Sheep extra, 75 cents.

Teachers of high schools and academies will find Prof. Gray's "Elements of Natural Philosophy" a very desirable text-book. The work is divided into short sections, each of which is prefaced by a series of unnumbered propositions, embracing a lucid analysis of what the section contains, thus enabling the learner to arrange and systematize his knowledge of the subject. Numerical questions are appended to the several sections, while all the topics are very fully illustrated by diagrams, explaining articles of apparatus and the experiments performed by means of them. The author has introduced, to an unusual extent, the discoveries and applications of modern science. The most important principles, which are to be carefully committed to memory, are made deservedly prominent, being enunciated as formal propositions at the beginning of each section, and subsequently illustrated and explained.

## Greek Concordance of the New Testament.

No book has been published for many years which will be so welcome to Biblical students as this. Especially will those who have but a limited knowledge of the Greek language find it to supply a want which they have long felt. The simplicity of the plan is only surpassed by its excellence. It presents, in alphabetical succession, every word which occurs in the Greek New Testament, with the passage in which it occurs in the English version.—*Methodist Quarterly Review.*

## Greek-English and English-Greek Lexicon,

The design of the present volume is to render easy and agreeable the study of human anatomy and physiology, by exhibiting the subject in all its bearings and connections. The work describes the various organs, and their functions and adaptations. The arrangement of the subjects treated is new; but the peculiar mode of teaching them is, with some variations that which has been so successful in the hands of Sir Charles Bell, Dr. Arnott, and a few other modern writers.

## Hackley's Algebra.

This work is intended as a complete text-book of general history for the use of schools. It does not consist, as is often the case with books of this class, of a condensed summary of names, dates, and detached chronological events, but presents, in a simple and connected narrative, a general view of the great leading events which have occurred in the history of the world, beginning at the earliest periods, and coming down through the Assyrian, Persian, Grecian, Roman, and British empires, to the organization of the American Republic, and the establishment of the American Constitution. It is intended for Americans, and the narrative consequently follows the line which leads to, and is most directly connected with, the events of our own history.

Small 4to, Muslin, \$1 25; Separately, Muslin, 50 cents each.

A beautiful and useful work. It presents a general survey of the kingdom of nature in a manner adapted to attract the attention of the child, and at the same time to furnish him with accurate and important scientific information. The First Part is devoted to the vegetable world—plants, flowers, and fruits. The Second Part treats of animals, and the Third of air, water, heat, light, &c. Although written for children, it is a beautiful and interesting treatise, which may be read with pleasure by persons of all ages. While the work is well suited as a class-book for schools, its fresh and simple style can not fail to render it a great favorite for family reading.

The Three Parts of this book can be had in separate volumes by those who desire it. This will be advisable when the book is to be used in teaching quite young children, especially in schools. It will take some time to go through each part thoroughly, and the pupil had better, for various reasons, be introduced to each in its order as a new book.

## Kane's Chemistry.

With about 250 Woodcuts. 8vo, Muslin, \$1 50; Sheep extra, \$1 75.

The additional notes of Professor Draper to this comprehensive work have been deemed exceedingly valuable. The leading idea of the author has been to present the student an account of the general principles and facts of chemistry, and of its application to pharmacy, medicine, and the useful arts. For its laborious research, accurate analysis, and profound learning, this work stands unrivaled among the productions of its class.

By TAYLER LEWIS, LL.D., Professor of the Greek Language and Literature in the University of New York. 12mo, Muslin, \$1 50.

"No more acceptable or timely contribution to the cause of sound classical education could possibly have been made than this. The leading objects of the work, even paramount to its relation to education, seems to have been to furnish an antidote to the progress of *atheism* of the present age. The work has been introduced as a text-book in Harvard University."

## Liddell's School History of Rome.

A School History of Rome, from the Earliest Times to the Establishment of the Empire, with Chapters on the History of Literature and Art. By HENRY G. LIDDELL, D.D., Dean of Christ Church, Oxford. Illustrated by numerous Wood-cuts. Uniform with Smith's "History of Greece," "The Student's Gibbon," and "The Student's Hume." 12mo, Muslin, \$1 00.

For the use of schools and colleges, and for a large class of readers, this work must assume the first place among the recent Histories of Rome. Its comparative brevity is secured by condensation rather than by omission. It embodies the last results of historical criticism, and exhibits, not merely the series of Rome's political and military fortunes, but the course and tokens of her progress alike in those manly, hardy traits which made her empress of the world, and in those more showy attributes of national greatness and individual magnificence, which, in their culminating glory, bore the presage of decline, decay, and dismemberment. Dr. Liddell's style is concise, clear, and strong. His numerous classical references and quotations, no less than the chapters expressly devoted to literature, connect the march of events with the development of the national mind, and thus render the work a history of the Romans no less than of Rome.—*North American Review*.

Incomparably the best History of Rome for schools and colleges that we have, and must supplant all others.—*Richmond (Va.) Presbyterian*.

This excellent History of Rome, from the pen of one of the most celebrated scholars of the day, will supersede every other work on the subject. The volume conforms with the "History of Greece," by Dr. Wm. Smith, in typography, literary method, and illustration.—*John Bull*.

## Liddell and Scott's Greek-English Lexicon.

Based on the German Work of FRANCIS PASSOW. With Corrections and Additions, and the Insertion, in Alphabetical Order, of the Proper Names occurring in the principal Greek Authors, by HENRY DRISLER, M.A. Royal 8vo, Sheep extra, \$5 00.

The work of Liddell and Scott is esteemed by scholars as incomparably the best Greek lexicon ever published. It is constructed on the true principles of lexicography, and presents, besides the clear and consistent signification of each word, its history, the changes it has undergone, and especially its usage in each of the great eras of the language. On the score of completeness, accuracy, comprehensiveness, and scholarship, the work is not to be named in comparison with Donnegan, or any other Greek-English lexicon. Its publication was hailed with great satisfaction by all professors and teachers of the Greek language, and has done much to advance Greek learning among us. A significant testimonial to its value is to be found in the fact that, from its first appearance, this lexicon was adopted in the English schools to the exclusion of all others, received the stamp of public approbation, and was awarded the palm of decided superiority over other lexicons. Professor Drisler has not only carefully prepared the work, but has added largely to its value, especially by the insertion of all the proper names in their alphabetical order.

## A Treatise on Arithmetic.

Theoretical and Practical. Fourth edition. 12mo, 352 pages, Sheep extra, 75 cents.

This volume explains, in a simple and philosophical manner, the theory of all the ordinary operations of Arithmetic, and illustrates them by examples sufficiently numerous to impress them indelibly upon the mind of the pupil. The most important information required respecting the usual forms of business is given in a clear and concise manner. The book is designed for the use of advanced students in our public schools, and furnishes a complete preparation for the study of Algebra, as well as for the practical duties of the counting-house.

The answers to about one-third of the questions are given in the body of the work; but in order to lead the student to rely upon his own judgment, the answers to the remaining questions are purposely omitted. For the convenience, however, of such teachers as may desire it, there is published a small edition containing the answers to all the questions.

**LOOMIS'S SERIES, Continued.****Elements of Algebra.**

Designed for the use of Beginners. Fourteenth edition. 12mo, 281 pages, Sheep extra, 62½ cents.

This volume is intended for the use of students who have just completed the study of arithmetic. It is believed that it will be found sufficiently clear and simple to be adapted to the wants of a large class of students in our common schools. It explains the method of solving equations of the first degree, with one, two, or more quantities; the principles of involution and of evolution; the solution of equations of the second degree; the principles of ratio and proportion, with arithmetical and geometrical progression. Every principle is illustrated by a copious collection of examples, and at the close of the book will be found a collection of two hundred miscellaneous problems.

**A Treatise on Algebra.**

Nineteenth Edition. 8vo, 359 pages, Sheep extra, \$1 00.

This treatise is designed to contain as much of algebra as can be profitably read in the time allotted to this study in most of our colleges, and those subjects have been selected which are most important in a course of mathematical study. Particular pains have been taken to cultivate in the mind of the student a habit of generalization, and to lead him to reduce every principle to its most general form. It is believed that, in respect of difficulty, this treatise need not discourage any youth of fifteen years of age who possesses average abilities, while it is designed to form close habits of reasoning, and cultivate a truly philosophic spirit in more mature minds. In accordance with the expressed wish of many teachers, a classified collection of two hundred and fifty problems is appended to the last edition of this work.

**Elements of Geometry and Conic Sections.**

Seventeenth Edition. 8vo, 234 pages, Sheep extra, 75 cents.

The arrangement of the propositions in this treatise is generally the same as in Legendre's Geometry, but the form of the demonstrations is reduced more nearly to the model of Euclid. The propositions are all enunciated in general terms, with the utmost brevity which is consistent with clearness. The short treatise on Conic Sections, appended to this volume, is designed particularly for those who have not time or inclination for the study of analytical geometry. The last edition of this work contains a collection of theorems without demonstration and problems without solution, for the exercise of the pupil.

**Trigonometry and Tables.**

Sixteenth Edition. 8vo, 360 pages, Sheep extra, \$1 50.

The *Trigonometry and Tables*, bound separately. The Trigonometry, \$1 00; Tables, \$1 00.

This work contains an exposition of the nature and properties of logarithms; the principles of plane trigonometry; the mensuration of surfaces and solids; the principles of land surveying, with a full description of the instruments employed; the elements of navigation, and of spherical trigonometry. The tables furnish the logarithms of numbers to 10,000, with the proportional parts for a fifth figure in the natural number; logarithmic sines and tangents for every ten seconds of the quadrant, with the proportional parts to single seconds; natural sines and tangents for every minute of the quadrant; a traverse table; a table of meridional parts, &c. The last edition of this work contains a collection of one hundred miscellaneous problems at the close of the volume.

**LOOMIS'S SERIES, Continued.****Elements of Analytical Geometry,**

And of the Differential and Integral Calculus. Thirteenth Edition. 8vo, 286 pages, Sheep extra, \$1 50.

The first part of this volume treats of the application of algebra to geometry, the construction of equations, the properties of a straight line, a circle, parabola, ellipse, and hyperbola; the classification of algebraic curves, and the more important transcendental curves. The second part treats of the differentiation of algebraic functions, of Maclaurin's and Taylor's theorems, of maxima and minima, transcendental functions, theory of curves, and evolutes. The third part exhibits the method of obtaining the integrals of a great variety of differentials, and their application to the rectification and quadrature of curves, and the cubature of solids. All the principles are illustrated by an extensive collection of examples, and a classified collection of a hundred and fifty problems will be found at the close of the volume.

**Elements of Natural Philosophy.**

Designed for Academies and High Schools. 12mo, 352 pages, Sheep extra, \$1 00.

This volume exhibits in a concise form the fundamental principles of Natural Philosophy, arranged in their natural order, and explained in a clear and scientific manner, without requiring a knowledge of the mathematics, beyond that of the elementary branches. It treats of Mechanics, Hydrostatics, Pneumatics, Acoustics, Heat, Optics, Magnetism and Electricity. Special pains have been taken to make this work both practical and interesting, by borrowing illustrations from common life, and by explaining phenomena which are familiar to all, but whose philosophy is not generally well understood. The volume is designed particularly for the use of the higher classes in Academies and High Schools.

**Practical Astronomy.**

An Introduction to Practical Astronomy, with a Collection of Astronomical Tables. 8vo, 497 pages, Sheep extra, \$1 50.

This work furnishes a description of the instruments required in the outfit of an observatory, as also the methods of employing them, and the computations growing out of their use. It treats particularly of the Transit Instrument and of Graduated Circles; of the method of determining time, latitude, and longitude, with the computation of eclipses and occultations. The work is designed for the use of amateur observers, practical surveyors, and engineers, as well as students who are engaged in a course of training in our colleges. The tables which accompany this volume are such as have been found most useful in astronomical computations, and to them has been added a catalogue of 1500 stars, with the constants required for reducing the mean to the apparent places.

**Recent Progress of Astronomy,**

Especially in the United States. A thoroughly revised Edition. Illustrations. 12mo, 396 pages, Muslin, \$1 00.

This volume is designed to exhibit, in a popular form, the most important astronomical discoveries of the past ten years. It treats particularly of the discovery of the planet Neptune, of the new asteroids, of the new satellite, and the new ring of Saturn, of the great comet of 1843, Biela's comet, Miss Mitchell's comet, &c.; of the parallax of fixed stars, motion of the stars, revolution of the nebulae, &c.; the history of American observatories, determination of longitude by the electric telegraph, manufacture of telescopes in the United States, &c. The new edition of this work has been mostly re-written and much enlarged, and contains the most important discoveries in Astronomy down to the present time.

## Loomis's Meteorology and Astronomy,

Elements of, for the use of Academies and High Schools. 12mo, Sheep extra. (*In press.*)

This volume is prepared upon the same model as the Elements of Natural Philosophy. It exhibits in a concise form the fundamental principles of Meteorology and Astronomy, arranged in their natural order, and explained in a scientific manner, without requiring a knowledge of the mathematics beyond that of the elementary branches.

## Lowry's Universal Atlas.

Constructed and Engraved from the most recent Authorities. 4to, Half Roan, \$5 00.

This atlas contains one hundred Maps of the various countries of the world, with a convenient and copious Index. These Maps are constructed on proportional scales, which are distinguished by precise indications, and afford every facility for ready and accurate comparison of different portions of the earth's surface. They are executed with remarkable neatness, and, embodying the latest geographical discoveries, will be found highly valuable, both for seminaries of learning and the private student.

### PROF. M'CLINTOCK'S CLASSICAL SERIES.

The series of books prepared by Professor John McClintock, and published by Harper & Brothers, which we have now used for nearly two years with signal success, is an immeasurable advance upon the systems pursued, twenty-five years ago, of worrying and wearying through the whole of the Latin and Greek Grammars. By the more rational system now in use, we learn a little of the grammar first, and use it as soon as learned, in oral or written exercises, until it becomes as familiar as one's own mother tongue, and the pupil can render from Latin or Greek into English, or from English into Latin or Greek, with equal readiness.—*School Report, at Lawrence, Mass., Jan., 1859.*

### M'Clintock's First Book in Latin.

A First Book in Latin; Containing Grammar, Exercises, and Vocabularies, on the Method of constant Imitation and Repetition. With Summaries of Etymology, and Syntax. By Rev. J. M'CLINTOCK, D.D., late Professor of Languages, and Rev. GEO. R. CROOKS, D.D., late Adjunct Professor of Languages, in Dickinson College. 12mo, Sheep extra, 75 cents.

This volume has been, perhaps, more largely sold within the last few years than any other Latin elementary book. It is at once philosophical and practical. In the hands of good teachers it can not fail to give pupils a thorough knowledge of the elements of Latin.

### M'Clintock's Second Book in Latin.

Containing Syntax and Reading Lessons in Prose; forming a sufficient Latin Reader, with Imitation Exercises and a Vocabulary. 12mo, Sheep extra, 75 cents.

The Second Book gives the Syntax in an enlarged form. Its reading lessons are taken wholly from Cicero and Cæsar, on the principle that none but the best writers should be read by beginners. The notes are ample, without giving the pupil too much aid. There is no better *Latin Reader* than this, even for classes that have not studied the "First Book."

## M'Clintock's First Book in Greek.

Containing a full View of the Forms of Words, with Vocabularies and copious Exercises, on the Method of constant Imitation and Repetition. Revised Edition. With brief Summaries of the Doctrine of the Verb, and of the Rules of Syntax. 12mo, Sheep extra, 75 cents.

This is "Greek made easy," not by *leaving out the hard parts*, but by presenting the difficulties one at a time, and in the order most consonant to nature and reason. The book has been very widely introduced into the better class of schools.

## M'Clintock's Second Book in Greek.

Containing Syntax, with Reading Lessons in Prose; Prosody and the Dialects, with Reading Lessons in Verse. Forming a sufficient Greek Reader, with Notes and copious Vocabulary. 12mo, Sheep extra, 75 cents.

This is a "Greek Reader," formed on the plan of giving the pupil no more to read than he can thoroughly master. All the Syntax and Prosody that are needed for the reading are given in the volume. The extracts in prose are from Xenophon; those in verse from Homer and Anacreon.

## Mrs. Markham's History of France.

A History of France, from the Conquest of Gaul by Julius Cæsar to the Reign of Louis Philippe. With Conversations at the end of each Chapter. By Mrs. MARKHAM. Prepared for the use of Schools by the addition of a Map, Notes, and Questions, and a Supplementary Chapter, bringing down the History to the present Time. By JACOB ABBOTT. 12mo, Muslin, \$1 00.

The History of France, by Mrs. Markham, is a very clear, succinct, and entertaining narrative. It seems well adapted to its purpose of communicating a distinct and connected idea of the progress of events of which that most remarkable country has been the scene. A very full and carefully executed map of France, not contained in the original work, has been provided for this edition; and in respect to all places of any importance mentioned in the work, there are notes of reference to facilitate finding them upon the map.

## Maury's Principles of Eloquence.

The Principles of Eloquence. By the Abbé MAURY. With an Introduction, by Bishop POTTER. 18mo, Muslin, 45 cents.

## Mill's Logic.

A System of Logic, Ratiocinative and Inductive; being a connected View of the Principles of Evidence, and the Methods of Scientific Investigation. By J. S. MILL. 8vo, Muslin, \$1 50.

It is excellent throughout in its plan, in its illustrative examples, and in its execution every way—in a word, it is perfect of its kind. To most young persons composition is the most painful task in the culture of the mind, and so it must be as long as they are required to write out their thoughts before they have been taught to think. Your book provides a remedy for this very defective system; it teaches the pupil how to take the first step in the difficult art of thinking, and then leads him on until he can do without a guide.—Rev. Dr. COGSWELL.

## Mills's Literature.

The Literature and Literary Men of Great Britain and Ireland. By ABRAHAM MILLS, A.M. 2vols. 8vo, Muslin, \$3 50; Half Calf, \$5 50.

The plan of this work is of a very comprehensive character. It embraces the whole field of English literature, from the origin and formation of the Anglo-Saxon language to the close of the seventeenth century. Account is given of nearly all the noteworthy poets, historians, novelists, dramatists, divines, and philosophers in Great Britain and Ireland during the space of more than twelve centuries, with critical notices of their writings, and choice extracts sufficiently numerous to give a fair impression of the genius and peculiar style of each individual. Such a compendium must be a treasure to all who desire to have the gems of British literature made accessible without labor, and without the expense of a large library.

## Morse's School Geography.

A new System of Geography, for the use of Schools. Illustrated by more than 50 Cerographic Maps, and numerous Engravings on Wood. 4to, Half Bound, 50 cents.

This popular new school geography, entirely *original* in its plan, is extremely beautiful in its pictorial embellishments, lucid and simple in its adaptation to the purposes of popular instruction, as well as by far the cheapest of all works of the kind ever produced. Since its publication over half a million copies have been printed.

The Public School Society of the city of New York *unanimously* adopted Morse's School Geography into their extensive schools, and it has been generally introduced into those of Philadelphia and elsewhere.

The superiority of this Geography over all others, consists in,

1. The *Arrangement* is such that the Map, Questions on the Map, and Description of each country are on the same page, or on pages directly opposite, enabling the pupil to refer readily from one to the other, without the inconvenience of two books, or even the necessity of turning the leaf.

2. The *Maps* are *more numerous*, and generally on a *larger scale* than in any other School Geography.

3. The *Exercises on the Map* are so framed as to present a *connected view* of the great features of each country.

4. The *Descriptions* are a series of short paragraphs, written in a *concise style*, and confined to the most interesting and characteristic matters.

5. The *correct Pronunciation* of difficult names is indicated by dividing into syllables, accenting, &c.

6. The *General and Comparative Views* at the end of the volume are on the plan first introduced by the author in 1820, and since adopted by many other School Geographies. They are regarded as well fitted to exercise and strengthen the judgment.

7. The *new art of Cerography* is applied for the first time to the illustration of a work of this kind, and enables the publishers to sell it at a very low price.

The whole work is the result of long and careful study, and is intended to impress upon the mind of the student such outlines of geography as will form the best foundation for farther and extensive acquisitions.

## Noel and Chapsal's French Grammar.

A new System of French Grammar; containing the First Part of the celebrated Grammar of these Authors. Arranged with Questions and a Key in English. Also, an Abridgment of the Syntax and Grammatical Analysis of the same Authors. To which are added, Lessons in Reading and Speaking, Forms of Drafts, Advertisements, &c. Designed to facilitate the Student in the use of the French Language, 1st. By making it a Medium of Communication between Himself and Teacher. 2d. By enabling him to Read, Write, and Speak it on all Occasions. By SARAH E. SAYMORE. Revised and corrected, by Prof. C. P. BORDENAVE. 12mo, Muslin, 75 cents.

The Grammar of Noel and Chapsal is universally considered to be well adapted for use in our academies. The form of question and answer adopted by Mrs. Seaman, with the translated key at the end, are evident improvements.

## Olmsted's Astronomy.

Letters on Astronomy, in which the Elements of the Science are familiarly explained in connection with Biographical Sketches of the most eminent Astronomers. With numerous Engravings. By DENISON OL MSTED, LL.D., Professor of Natural Philosophy and Astronomy in Yale College. Revised Edition, including the latest Discoveries. 12mo, Muslin, 75 cents.

The name of Professor Olmsted is at once associated in the mind of every one who hears it with such objects as that of which this work treats. It is in the form of letters—a mode of conveying instruction which, when well followed, as in this case, possesses peculiar advantages. This work, whether used as an elementary one by beginners, or as a "refresher" by adults, is one of the best which has ever been published in this country.

## Parker's Outlines of General History.

Outlines of General History, Designed as the Foundation and Review of a Course of Historical Reading. By RICHARD GREEN PARKER, Corresponding member of the New York Historical Society, Author of "Aid to English Composition." New Edition, with Additions. 12mo, Sheep extra, \$1 00.

These Questions on History have been constructed upon the plan suggested by Sir WALTER SCOTT in his letter to Lord MONTAGUE, where he says, "For this species of instruction, I do not so much approve of tasks and set hours for serious reading, as the plan of endeavoring to impart a taste for history to the youths themselves, and suffering them to gratify it in their own way. The knowledge which we acquire at freewill, and by spontaneous exertion, is like food eaten with an appetite—it digests well, and benefits the system ten times more than the double cramming of an alderman." The design of this work is to lay the substratum for a course of historical reading, which may be either spontaneously or systematically assigned. In a word, to present a panoramic view of history, giving its outlines in an abbreviated form, divested of minor and tedious details, and thus inspire a love of study. The work is equally adapted to schools and families.

## Parker's Aids to English Composition.

Aids to English Composition, prepared for Students of all Grades, embracing Specimens and Examples of School and College Exercises, and most of the higher Departments of English Composition, both in Prose and Verse. A new Edition, with Additions and Improvements. By RICHARD GREEN PARKER, A.M. 12mo, Muslin, 80 cents; Sheep extra, 90 cents.

The public have been so long familiar with this excellent volume, that it is unnecessary to say any thing in its praise. It is replete with most valuable and instructive matter, admirably adapted to students, and indispensable to all who appreciate the advantages of acquiring elegance in diction and literary composition. It is just such a work as every man who attempts to prepare any thing for the press ought to possess and study.

## Parker's Geographical Questions,

Adapted for the use of Morse's, Woodbridge's, Worcester's, Mitchell's, Field's, Malte-Brun's, Smith's, Olney's, Goodrich's, or any other respectable Collection of Maps: embracing, by way of Question and Answer, such Portions of the Elements of Geography as are necessary as an Introduction to the Study of the Maps. To which is added a concise Description of the Terrestrial Globe. 12mo, Muslin, 20 cents.

These Questions embrace none of the tedious and uninteresting details of geography. They are designed to simplify the study of this important science, by means of the useful and important process of classification. There are few questions among them that can not be answered from *any* respectable atlas; they will prove useful and convenient on this account, as they may be used without subjecting a class of pupils to the expense frequently attendant on a required uniformity of maps. These Questions are used in many of the leading schools in New England.

## Plautus.

"The Captives." A Comedy of Plautus. With English Notes for the use of Students. By JOHN PROUDFIT, D.D. 18mo, Paper, 38 cents.

"The Captives" has generally been esteemed the masterpiece of the father and prince of Roman comedy. It is free from the immoralities which a rude and licentious age has impressed on most of his productions; it contains much to illustrate the deeply interesting subject of ancient slavery; its plot possesses unusual variety and interest; and it abounds in the most beautiful and impressive moral sentiments.

## Potter's Principles of Science.

The Principles of Science applied to the Domestic and Mechanic Arts, and to Manufactures and Agriculture, with reflections on the Progress of the Arts, and their influence on National Welfare. By the Rt. Rev. ALONZO POTTER, D.D., formerly Professor of Moral Philosophy and Rhetoric in Union College, Schenectady, New York. Revised Edition. With illustrative Cuts. 12mo, Muslin, 75 cents.

A Manual for the use of Teachers, Employers, Trustees, Inspectors, &c., &c. In two Parts. Part I. By ALONZO POTTER, D.D., Bishop of Penn. Part II. By GEORGE B. EMERSON, A.M., of Massachusetts. Part I. The School; its Objects, Relations, and Uses. With a Sketch of the Education most needed in the United States, the present State of Common Schools, the best Means of improving them, and the consequent Duties of Parents, Trustees, and Inspectors, &c. Part II. The proper Character, Studies, and Duties of the Teacher, with the best Methods for the Government and Instruction for the Common Schools, and the Principles on which School-houses should be Built, Arranged, Warmed, and Ventilated. Engravings. 12mo, Muslin, \$1 00.

A volume of great value to both pupil and teacher. Two well-known instructors have combined the results of their experience and observation. The work treats of the objects and relations of the school; discusses the present condition of common schools, and the best means of their improvement; the character to be maintained, the studies to be pursued, and the duties to be performed by the teacher; the best methods of instruction and government; and the proper method of constructing school-houses. In fact, there is hardly a topic connected with the subject of common schools which is not here considered.

By JAMES RENWICK, LL.D., Professor of Natural and Experimental Philosophy and Chemistry in Columbia College. With Questions. Engravings. 18mo, Half Sheep, 75 cents.

## Robinson's Greek Lexicon of the Testament.

A Greek and English Lexicon of the New Testament. By EDWARD ROBINSON, D.D., LL.D., Professor of Biblical Literature in the Union Theological Seminary, N. Y. A New Edition, Revised, and in great part re-written. Royal 8vo, Muslin, \$4 50; Sheep extra, \$4 75.

The excellence of this edition of the "Greek and English Lexicon" is found in many particulars: 1. It embodies the results of the labors of the best lexicographers and grammarians down to the present time, together with the author's own materials, accumulated during his whole professional life, and including his personal explorations in the land of the Bible; 2. It is marked by the presiding influence of *good judgment* in the combination and use of these materials; 3. It combines the qualities both of a *Concordance* and *Commentary*. How completely the first edition supplied a great want in the theological literature of the day readers will readily judge, from the fact that three rival editions of it were speedily reprinted in London and Edinburgh, besides two subsequent abridgments.

## Russell's Juvenile Speaker.

The Juvenile Speaker; comprising Elementary Rules and Exercises of Declamation, with a Selection of Pieces for Practice. By the Rev. FRANCIS T. RUSSELL, A.M., Professor of Elocution in the Berkley Divinity School. 12mo, Muslin, 60 cents; Half Bound, 70 cents.

The object of this work is to present the first principles of elocution as they apply to the practices of boys in declamation; to reduce every principle to immediate practice by the introduction of appropriate exercises; to illustrate the principles of gesture; and to furnish young speakers with a supply of suitable pieces for a more extended application of the rules of elocution.

## Salkeld's Roman and Grecian Antiquities.

Classical Antiquities; or, a Compendium of Roman and Grecian Antiquities, including a Sketch of Ancient Mythology. By JOSEPH SALKELD. With Maps, &c. 18mo, Muslin, 38 cents.

The merits of this work consist in the systematic order and arrangement of the subject, and in the full information given, not only upon Roman and Grecian antiquities, but upon the kindred topic of heathen mythology.

## Salkeld's First Book in Spanish;

A first Book in Spanish, or, a Practieal Introduction to the Study of the Spanish Language. Adapted to every Class of Learners; containing full Instructions in Pronunciation; a Grammar; Reading Lessons, &c. 12mo, Sheep extra, \$1 00.

I can with truth say that I have never met with a work professing to teach any foreign language which combines so many excellent qualities, and is so well adapted for all classes of learners. It contains all that the pupil needs, and in a very convenient compass. The judicious arrangement of your work especially pleases me.—DON JULIO CIRILO DE MOLINA, *formerly Professor of the English, Spanish, and French Languages, in the Cities of Madrid, Paris, and London.*

## Schmucker's Psychology.

Psychology; or, Elements of a new System of Mental Phylosophy, on the Basis of Consciousness and Common Sense. Designed for Colleges and Academies. By S. S. SCHMUCKER, D. D. 12mo, Muslin, \$1 00.

This production, the fruit of some twenty years' scholastic experience, avowedly owes its existence to the desire of the author to promote the cause of truth and science. It exhibits in a lucid manner the analysis of mental philosophy as the basis of metaphysical science and religious belief.

## Smith's Mechanics.

An Elementary Treatise on Mechanics, embracing the Theory of Statics and Dynamics, and its Application to Solids and Fluids. By AUGUSTUS W. SMITH, LL.D., late President in the Wesleyan University. Illustrations. 8vo Muslin, \$1 50; Sheep extra, \$1 75.

This work is the product of much careful study, and is a felicitous condensation of all that has been developed by Whewell, Fierson, Francœur, and Gregory, in this important branch of scientific research. The author is widely known as a professor of mathematics and astronomy in the Wesleyan University, and his experience as a teacher has induced him to adopt the analytical in preference to the geometrical method of investigation, as being more universal in its application, shorter in practice, and more exact in results. It also tends to invest the study with additional interest to the student.

## Smith's New Classical Dictionary.

See Anthon's Smith's Classical Dictionary, p. 199.

## Strong's Harmony of the Gospels.

A Harmony of the Gospels, in the Greek of the received Text. With the most important various Readings, brief Grammatical Explanations, Select Biblical References, and Chronological Notes. For the use of Students and others. By Rev. JAMES STRONG, D.D. 12mo, Muslin, \$1 25.

## Dr. Smith's History of Greece.

A History of Greece from the Earliest Times to the Roman Conquest, with Supplementary Chapters on the History of Literature and Art. By WILLIAM SMITH, LL.D., Editor of the Dictionaries of "Greek and Roman Antiquities," "Biography and Mythology," and "Geography." Revised, with an Appendix, by GEORGE W. GREENE, A.M. For Schools and Students, Illustrated with 100 Wood-cuts. 12mo, Muslin, \$1 00.

Several excellent school Histories of Greece have been of late years published, but we have no hesitation in pronouncing this by far the best. In its plan it is more comprehensive than any other, special chapters being devoted to the history of Greek literature and art. In the narrative of historical events, Dr. Smith has had the advantage of consulting the latest works, among which, that of Mr. Grote is pre-eminent. In the account of Greek literature the work of Colonel Mure has been of great assistance. Dr. Smith's name, as a learned and accomplished scholar, is sufficient guarantee for the research and accuracy.—*Literary Gazette*.

Dr. Smith shows himself to be not only thoroughly acquainted with his subject, but, what is a much rarer merit, possessed of that practical skill which is indispensable to the production of a good school-book. The logical skill manifested in the arrangement of this book is only equalled by the happy tact with which the attention is kept alive—now by an apt and striking quotation from some ancient or modern poet; now by a characteristic anecdote, or by a just and appropriate reflection, in which the sound judgment and the enlightened views of the author are unequivocally displayed. The style adopted by Dr. Smith is just what such a work requires—simple, easy, and idiomatical, yet perfectly accurate, and in good taste throughout.—*Journal of English Education*.

This is not only the best school History of Greece now before the public, but the most suitable for popular reading. As a manual for common use, it must soon take the place of every other. It embodies the results of Mr. Grote's important investigations as well as of other modern writers. In the department of literature and art it is particularly rich. The style is lucid, elegant, and spirited. There can be no doubt that it will at once justify its claims to be a standard work on the subject.

## Spencer's Greek New Testament.

The four Gospels and Acts of the Apostles, in Greek, with English Notes, Critical, Philological, and Exegetical, on the Gospels and Acts; Maps, Indexes, &c., together with the Epistles and Apocalypse. The whole forming the complete Text of the New Testament. For the use of Schools, Colleges, and Theological Seminaries. By Rev. J. A. SPENCER, D.D., Author of "The Christian Instructed," "History of the English Reformation." 12mo, Muslin, \$1 00: Sheep extra, \$1 25.

An attempt to furnish such matter in the notes as will render the historical books of the New Testament suitable for general use in colleges, academies, and theological seminaries. The notes are principally devoted to the settling of the text, the critical meaning of the original Greek, the illustration of geography, history, and antiquities of the New Testament, together with the exegesis of the more important passages relating to the cardinal doctrines of the Gospel. Each book has a brief introduction prefixed; and there are several maps, copious indexes, &c., attached.—*Strong's Harmony of the Gospels*.

## The Student's Gibbon.

The History of the Decline and Fall of the Roman Empire. By EDWARD GIBBON. Abridged. Incorporating the Researches of Recent Commentators. By WILLIAM SMITH, LL.D., Editor of the "Classical Dictionary," "A School Dictionary of Greece," &c. Illustrated by 100 Engravings on Wood. Uniform with Liddell's Rome, Smith's History of Greece, and the Student's Hume. 12mo, Muslin, \$1 00.

We hardly know whether to admire more the modesty of Dr. Smith, in contenting himself with editorial labor, when he is so eminently capable of writing an original work on Roman history, or his skill in condensing the six volumes of Gibbon's magnificent work into one, without losing its spirit or impairing its connection. We miss nothing of Gibbon's splendid style, and the omission of unimportant episodes and incidental discussions imparts a vivacity to the narrative which even the original does not possess. One also feels especial confidence in the accuracy of a history which, written by such an author as Gibbon, has passed through the hands of such an editor as Dr. Smith. The work is copiously illustrated with engravings representing persons, places, manners, costumes, &c., and contains valuable genealogical tables and a full index. It eminently deserves the name which the editor has given it, of "*The Student's Gibbon.*"—*N. Y. Evening Post.*

## The Student's Hume.

The Students Hume. A History of England from the Earliest Times to the Revolution in 1688. By DAVID HUME. Abridged. Incorporating the Corrections and Researches of Recent Historians; and continued down to the Year 1858. Illustrated by Engravings on Wood. Large 12mo, uniform with "The Student's Gibbon," "Smith's History of Greece," and "Liddell's History of Rome." (*Shortly.*)

This work is designed to supply a long-acknowledged want in our School and College Literature—a STUDENT'S HISTORY OF ENGLAND in a volume of moderate size, free from sectarian and party prejudice, containing the results of the best modern historians, tracing more particularly the development of the Constitution, and bringing out prominently the characters and actions of the great men of our country. It has lately been the fashion in some quarters to underrate the merits and exaggerate the faults of Hume; but the most competent judges have generally been among the first to render homage to his greatness as an historian. Thus Mr. Hallam remarks, that the domestic transactions in the reign of Edward I. have been "extremely well told by Hume, the first writer who had the merit of exposing the character of Edward I.;" and a recent critic (*The Times*, April 1, 1858) has observed, "That Hume's account of our English annals is still, with all its defects, the best history of the period over which it extends."

As much prominence as possible is given in the present work to the rise and progress of the Constitution; but in order to economise space, and at the same time not to interrupt the narrative, much important information is inserted in a smaller type in the "Notes and Illustrations," where the student will find an account of the "Government Laws, and Institutions of the Anglo-Saxons," of the "Anglo-Norman Constitution," of the "origin and progress of Parliament," and of other matters of a similar kind.—*Extract from Preface.*

## Upham's Mental Philosophy.

Elements of Mental Philosophy; embracing the two Departments of the Intellect and Sensibilities. By Rev. THOMAS C. UPHAM, D.D., Professor of Moral and Mental Philosophy in Bowdoin College. 2 vols. 12mo, Sheep extra, \$2 50.

Abridged for Schools and Academies. 12mo, Sheep, \$1 25.

Professor Upham has brought together the leading views on the most important topics of mental science, and exhibited them with great good judgment, candor, clearness, and method. Out of all the systematic treatises in use, we consider the volumes of Professor Upham by far the best we have.—*New York Review*.

## Upham on the Will.

Philosophical and Practical Treatise on the Will. Forming the third Volume of a System of Mental Philosophy. By T. C. UPHAM, Professor in Bowdoin College. 12mo, Sheep extra, \$1 25.

This work is one of great value to the literary and religious community. It indicates throughout not only deep and varied research, but profound and laborious thought, and is a full, lucid, and able discussion of an involved and embarrassing subject. The style is perspicuous, and often elegant; the work entitles the author to rank among the ablest metaphysicians of our country.—*Christian Advocate and Journal*.

## Whately's Logic.

Elements of Logic: comprising the Substance of the Article in the Encyclopedia Metropolitana. With Additions, &c. By RICHARD WHATELY, D.D., Archbishop of Dublin. The only complete American Edition. 18mo, Muslin, 38 cents.

## Whately's Rhetoric.

Elements of Rhetoric: comprising an Analysis of the Laws of Moral Evidence and of Persuasion. With Rules of Argumentative Composition and Elocution. By RICHARD WHATELY, D.D., Archbishop of Dublin. 18mo, Muslin, 38 cents.

## Yonge's English-Greek Lexicon.

Containing all the Greek Words used by Writers of good Authority, in Chronological Order, for every Word used; explaining the Construction, and giving the Declension or Conjugation of each Word when Irregular, and marking the Quantities of all doubtful Syllables. Edited, with large Additions, by HENRY DRISLER, M.A., Professor of Latin in Columbia College, N. Y. Royal 8vo, Sheep extra. (*In Press*.)

This is the first really accurate and complete work of the kind that has been given to scholars either on this or the other side of the Atlantic, and is the only *separate* English-Greek Dictionary ever published in this country. It must at once displace those dictionaries which, notwithstanding their defects and inaccuracies, have hitherto held their places in academies and colleges because there was no better. The work has been carefully and faithfully revised and corrected by Prof. Drisler, of Columbia College; and, as there was no *English-Greek* part to his edition of Liddell and Scott's Dictionary, this edition of Yonge's *English-Greek Lexicon* is necessary to complete that incomparable Dictionary.
